

Oregon Watershed Assessment Manual

Table of Contents

ACRONYMS USED IN THIS MANUAL

INTRODUCTION TO WATERSHED ASSESSMENT

What Is “Watershed Assessment?”

Why Conduct a Watershed Assessment?

How this Assessment Works

About the Manual

Glossary

WATERSHED FUNDAMENTALS

Introduction

What is a Watershed?

Watershed Terminology

Definitions

Assessment Size

Regional Patterns in Watershed Conditions

Large-Scale Processes

Stream Network

Water Dynamics

The Hydrologic Cycle

Hydrologic Data: Collection and Use

Consumptive Uses of Water

Soil Erosion and Sediment In Streams

Raindrop Splash

Ravel

Surface Rilling

Shallow and Deep-Seated Landslides

Soil Creep and Earth Flows

Road-Related Erosion

Channel Erosion

Vegetation

Role of Upland Vegetation

Role of Riparian Vegetation

Role of Ambient Air Temperature

Summary

Wetlands

Water Quality Improvement

Flood Attenuation and Desynchronization

Oregon Watershed Assessment Manual

Glossary

COMPONENT I—START-UP AND IDENTIFICATION OF WATERSHED ISSUES

The Assessment Start-Up Process

Overview

Step 1: Identify Project Manager

Step 2: Coordinate Community Input

Step 3: Identify Assessment Team

Step 4: Compile Initial Materials

Step 5: Create the Base Map

Step 6: Refine the Land Use Map

Step 7: Acquisition and Compilation of Other Data

Identification of Watershed Issues

Critical Questions

Identify Typical Issues Associated with Land Use

References

Glossary

Fisheries

Water Quality Laws and Programs

Appendix I: Blank Form

Oregon Watershed Assessment Manual

Table of Contents (continued)

COMPONENT II—HISTORICAL CONDITIONS ASSESSMENT

Introduction

- Critical Questions
- Assumptions
- Materials Needed
- Necessary Skills
- Final Products of the Historic Conditions Component

Methods

- Step 1: Gather Existing Information
- Step 2: Complete a Descriptive Historical Narrative
- Step 3: Complete Historical Conditions Time Line
- Step 4: Organize Historical Information by Subwatershed
- Step 5: Map Historical Channel and Riparian Modifications
- Step 6: Complete Summary and Conclusions
- Step 7: Document Sources of Information
- Step 8: Evaluate Confidence in the Assessment

References

Appendix II-A: Outline of the Historical Conditions Report

Appendix II-B: A Historical Conditions Narrative for a Watershed

Appendix II-C: A Historical Conditions Time Line for a Watershed in Oregon

**Appendix II-D: Organization of Historical Information on Watershed Resources
by Subwatershed Locations**

Appendix II-E: Blank Forms

Oregon Watershed Assessment Manual

Table of Contents (continued)

COMPONENT III—CHANNEL HABITAT TYPE CLASSIFICATION

Introduction

- Critical Questions
- Assumptions
- Materials Needed
- Necessary Skills
- Final Products of the CHT Classification Component

Methods

- Overview
- Step 1: Prepare Maps and Materials
- Step 2: Break Out Stream Segments Based on Gradient Class
- Step 3: Estimate Channel Confinement
- Step 4: Assign Initial CHT Designation
- Step 5: Improve the Mapping
- Step 6: Determine CHT Sensitivity
- Step 7: Evaluate Confidence in Mapping
- Step 8: Prepare for Condition Evaluation

References

Glossary

Appendix III-A: Descriptions of Channel Habitat Types

- Channel Habitat Typing Background
- Small Estuarine Channel (ES)
- Large Estuarine Channel (EL)
- Low Gradient Large Floodplain Channel (FP1)
- Low Gradient Medium Floodplain Channel (FP2)
- Low Gradient Small Floodplain Channel (FP3)
- Alluvial Fan Channel (AF)
- Low Gradient Moderately Confined Channel (LM)
- Low Gradient Confined Channel (LC)
- Moderate Gradient Moderately Confined Channel (MM)
- Moderate Gradient Confined Channel (MC)
- Moderate Gradient Headwater Channel (MH)
- Moderately Steep Narrow Valley Channel (MV)
- Bedrock Canyon Channel (BC)
- Steep Narrow Valley Channel (SV)
- Very Steep Headwater (VH)

COMPONENT IV—HYDROLOGY AND WATER USE

Introduction

Linkages To Other Components

Section I: Hydrology

Critical Questions

Assumptions

Materials Needed

Necessary Skills

Final Products of the Hydrology Section

Hydrologic Condition Characterization

Hydrologic Condition Assessment

Section II: Water Use

Critical Questions

Assumptions

Materials Needed

Final Products of the Water Use Section

Water Use Characterization

Water Use Assessment

Confidence in Assessments

Further Analyses

References

COMPONENT V—RIPARIAN/WETLANDS ASSESSMENT

Introduction

Section I: Riparian Zone Condition

- Critical Questions
- Assumptions
- Materials Needed
- Time Needed
- Necessary Skills
- Final Products of the Riparian Zone Condition Section
- Methods

Section II: Wetland Characterization and Functional Assessment

- Purpose
- Critical Questions
- Assumptions
- Materials Needed
- Necessary Skills
- Final Products of the Wetland Characterization Section
- Wetland Characterization Methods

References

Glossary

Appendix V-A: Blank Forms

Appendix V-B: Field Measurement of Stream Shading

COMPONENT VI—SEDIMENT SOURCES ASSESSMENT

Introduction

- Critical Questions
- Assumptions
- Materials Needed
- Necessary Skills
- Final Products of the Sediment Sources Component

Methods

- Step 1: Update Roads on Watershed Base Map
- Step 2: Identify Potential Sediment Sources
- Step 3: Evaluate Sediment Sources
- Step 4: Evaluate Confidence In Assessment

References

Glossary

Appendix VI-A: Examples of Finished Sediment - Source Maps

Oregon Watershed Assessment Manual

Table of Contents (continued)

COMPONENT VII—CHANNEL MODIFICATION ASSESSMENT

Introduction

- Critical Questions
- Assumptions
- Materials Needed
- Necessary Skills
- Final Products of the Channel Modification Assessment

Channel Modification Mapping Procedures

- Step 1: Gather Available Information
- Step 2: Map Channel Modifications
- Step 3: Evaluate Impact of Modifications
- Step 4: Identify Affected CHTs
- Step 5: Evaluate Confidence in the Assessment

Glossary

Appendix VII-A: Blank Forms

COMPONENT VIII—WATER QUALITY ASSESSMENT

Introduction

- Critical Questions
- Assumptions
- Materials Needed
- Necessary Skills
- Final Products of the Water Quality Assessment

Assessment Overview

- Step 1: Identify Sensitive Beneficial Uses in the Watershed
- Step 2: Identify Water Quality Criteria Applicable to the Sensitive Beneficial Uses
- Step 3: Assemble Existing Water Quality Information
- Step 4: Evaluate Water Quality Conditions Using Available Data
- Step 5: Draw Inferences from the Water Quality Assessment

Additional Resources

- EPA Publications
- US Geological Survey
- The Oregon Plan

References

Glossary

Appendix VIII-A: Watershed Characterization of Temperature—Umpqua Basin

Appendix VIII-B: Data Assessment

Appendix VIII-C: Blank Forms

Table of Contents (continued)

COMPONENT IX—FISH AND FISH HABITAT ASSESSMENT

Introduction

- Critical Questions
- Assumptions
- Materials Needed
- Necessary Skills
- Final Products of the Fish and Fish Habitat Component

Assessment Methodology

- Step 1: Identify Fish Species and Populations
- Step 2: Create Fish Distribution Maps
- Step 3: Complete Habitat Condition Summary
- Step 4: Migration Barrier Identification
- Step 5: Evaluate Confidence in the Assessment

References

Glossary

Appendix IX-A: ODFW Habitat Benchmarks

Appendix IX-B: Example Habitat Condition Summary Forms

- Example Form F-2a: Pool Habitat Condition Summary Big Elk Watershed
- Example Form F-2b: Riffle and Woody Debris Habitat Condition Summary
- Example Form F-2c: Riparian Habitat Condition Summary

Appendix IX-C: Example Form F-3: Fish Passage Evaluation

Appendix IX-D: Blank Forms

Oregon Watershed Assessment Manual

Table of Contents (continued)

COMPONENT X—WATERSHED CONDITION EVALUATION

Introduction

- Critical Questions
- Assumptions
- Materials Needed
- Necessary Skills
- Final Products of the Watershed Condition Evaluation

Methods

- Step 1: Review Summary Data and Identify Missing Pieces
- Step 2: Gather Assessment Products and Produce Channel Habitat–Fish Use Map
- Step 3: Organize Watershed Condition Evaluation Meetings
- Step 4: Summarize Historical and Current Watershed Conditions
- Step 5: Identify Watershed Protection and Restoration Opportunities
- Step 6: List Action Issues and Map Watershed Protection and Restoration Opportunities

References

Appendix X-A: Blank Forms

Appendix X-B: Examples of Watershed Issues and Action Opportunities

COMPONENT XI—MONITORING PLAN

Introduction

- Necessary Skills
- Final Products of the Monitoring Component
- Filling Data Gaps

Identifying Data Gaps

Developing a Monitoring Plan

- Stage 1: Objectives
- Stage 2: Resources
- Stage 3: Monitoring Details
- Stage 4: Pilot Project
- Stage 5: Review and Revise

Written Monitoring Plan

Monitoring Protocols

Additional Resources for Developing Monitoring Plans
