

3. WATER USE

A. Proposed Source and Amount of Water

Provide the certificate number or, if no confirming certificate has been issued, the decree reference, of the existing water right associated with this proposed project:

_____.

Identify the amount of water you propose to use from each source, for each powerhouse, in cubic feet-per-second (CFS).

(1 cubic foot per second = 448.8 gallons per minute 1 acre-foot = 43,560 cubic feet)

Source	Amount (AF, CFS, GPM)

C. Power Development

The project will utilize _____ (*number of feet*) of gross head to develop _____ (*Amount*) theoretical horsepower (*THP*).

THP is calculated by multiplying the quantity of water to be diverted in cubic feet per second by the vertical head in feet and dividing the product by 8.8). The head is the difference in elevation between the intake of the pipeline and the return discharge to the stream.

D. Location

Identify the following points on a copy of the final proof map for the certificate.

- 1) The point of diversion is in the : _____^¼ of the _____^¼ of Section _____, Township _____, Range _____, W.M
- 2) The power plant is to be located within the _____^¼ of the _____^¼ of Section _____, Township _____, Range _____, W.M.
- 3) After passing through the power plant, the water will be discharged to:

4. WATER MANAGEMENT

How will you monitor your diversion to ensure the volume of water use is within the limits of the water right and that no water is being wasted?

- Weir Meter Periodic Sampling

Describe measuring devices and the frequency of recording. _____

5. FEDERAL ENERGY REGULATORY COMMISSION (FERC) COMPLIANCE

Provide a copy of your FERC exemption application; if applicable.

If a FERC exemption is not needed, please explain why in the remarks section below.

Note: Oregon Water Resources Department will not issue a certificate for the proposed project until a FERC exemption is issued, if applicable. The exemption order will describe resource protection measures for fish screens, bypass flows, fish passage, water quality and/or other natural resources.

6. REMARKS

If you would like to clarify any information you have provided in the application, please do so here and reference the specific application question you are addressing.

7. MAP REQUIREMENTS

Attach a copy of the final proof map for this certificate that clearly indicates the township, range, section, and quarter-quarter section of the existing diversion point from the stream and add any proposed diversions from the existing canal or pipeline. Indicate the location of the proposed powerhouse. Also, map existing and proposed canals, pipelines and or penstocks that will be part of the hydroelectric use. See the map guidelines sheet for detailed map specifications. **SEE PAGES 7-9.**

8. SIGNATURE

By my signature below I confirm that I understand and agree:

- I own the land that the point of diversion, conduit and powerhouse will be located or I have a recorded easement or written authorization permitting access.
- I will be billed annually based on the theoretical horsepower produced by the hydroelectric project. Failure to pay this invoice by the prescribed date may result in cancellation of the hydroelectric water right certificate.
- Use of water for hydroelectric purposes will not exceed the rate, duty, season and any other limitations of the existing certificated water right.
- Water may be used for hydroelectric use, only if the same water is being used for its original purpose as described in the attached certificate.
- If development of the hydroelectric use is not according to the terms of the certificate, the certificate may be canceled.
- I have provided all the exhibits identified below.

I affirm that all information provided in this application is true and correct to the best of my knowledge.

Signature of applicant

Date

END OF APPLICATION

9. EXHIBITS

The following Exhibits must be included as a part of this application:

- Exhibit A** Final proof map for attached certificate showing existing point of diversion and proposed additional canals, pipelines, penstocks, and powerhouse. **See the examples provided on pages 8 and 9.**
- Exhibit B** Copy of certificate to which hydroelectric use is to be added.
- Exhibit C** A narrative statement describing the proposed project from the point(s) of diversion to where the water re-enters the distribution system for its primary use. Otherwise, a FERC exemption application is required.
- Exhibit D** Copy of FERC exemption order describing fish screening, bypass devices, and fish passage measures as required by Oregon Department of Fish and Wildlife.
- Exhibit E** Evidence of water use for at least one of the past five years for the primary water right.
- Exhibit F** If the water to be used for the proposed hydroelectric project is delivered by a public entity other than the applicant for a certificate under this section, a statement from that entity that the entity will be able to deliver water as described in the application.
- Exhibit G** Land use form. Land use form must be signed by the local planning official, certifying that the use and structures associated with this project are allowed. The land use form is available from the OWRD Salem office or OWRD web site, <http://www1.wrd.state.or.us/pdfs/landuseform.pdf>

NARRATIVE STATEMENT OR FERC EXEMPTION APPLICATION

Provide a detailed written description of each component of the proposed Project from the point(s) of diversion to the water return area. The reader should be able to draw a basic picture of the Project based on the Narrative Statement. Such features include points of diversion, dams and appurtenant works and structures, storage, diverting or forebay reservoirs connected therewith, conduits or pipes, powerhouses, water wheels, and primary lines transmitting power to the point of junction with a distributing system, or with any interconnected primary system, miscellaneous works and structures used in connection with the Project or any part thereof, rights of way, lands, flowage rights and all other properties, rights and structures necessary or appropriate in the use, operation and maintenance of the

Project.

Before you submit your application be sure you have:

- Answered each question completely.
 - Attached a legible map which includes township, range, section and quarter-quarter section.
 - Attached and labeled exhibits A thru G as appropriate.
 - Included a check payable to the Water Resources Department for \$500.
-

Section 5 of HB 2785:

- (5) **At a minimum, a certificate issued under this section must contain the following conditions:**
- a) **Fish screens, by-pass devices and fish passage as required by the State Department of Fish and Wildlife.**
 - b) **That use of the water be limited to periods when the applicant's existing water right is put to beneficial use without waste and that the amount used is not greater than the quantity of water diverted to satisfy the authorized specific use under the existing water right described in subsection (2)(a) of this section.**
 - c) **That use of water be limited by rate, duty, season and any other limitations of the applicant's existing water right described in subsection (2)(a) of this section.**
 - d) **That the applicant measure and report the quantity of water diverted.**
 - e) **Any other conditions that the Water Resources Department deems necessary to protect the public interest.**
 - f) **That the restrictions established in ORS 543.660 shall apply as conditions of use to a certificate issued under this section to a district as defined in ORS 543.655**
 - g) **That a certificate issued under this section shall be invalidated upon a change in the point of diversion of the existing water right described in subsection (2)(a) of this section.**
 - h) **The Water Resources Department shall conduct a review of certificates issued under this section and shall issue a final order and a superseding certificate that corresponds to any changes or adjustments made to the applicant's existing water right described in subsection (2)(a) of this section.**
 - i) **That the right to use water under a certificate issued under this section is invalidated if the Federal Energy Regulatory Commission exemption related to the certificate is canceled or invalidated.**

MAP REQUIRMENTS

In order to properly examine your application, OWRD must have an accurate map showing the location of the water source and the area(s) of use. The maps submitted must meet the following criteria:

- Be of permanent quality and drawn clearly in ink on good quality paper.
- Maps larger than 11x17 inches must be drawn on tracing vellum or Mylar, or four copies must be submitted.
- Be drawn to a standard, even scale of not less than 4 inches = 1 mile. Small area maps may be more easily and clearly drawn to a larger scale, such as 1 inch = 400 feet. The scale must be indicated on the map.

Each copy of the map must clearly show the elements of the project.

- The location of the dam or water diversion. The location should be described by distance from a corner.
- The location of main canals, ditches, pipelines, flumes and powerhouse.
- The section number, township, range, tax lot lines and numbers, nearest quarter-quarter section, and a north directional symbol.

A platted and recorded subdivision map, deed description survey map or county assessor tax lot map may be submitted as the application map if all the required information listed above is clearly shown on each print.

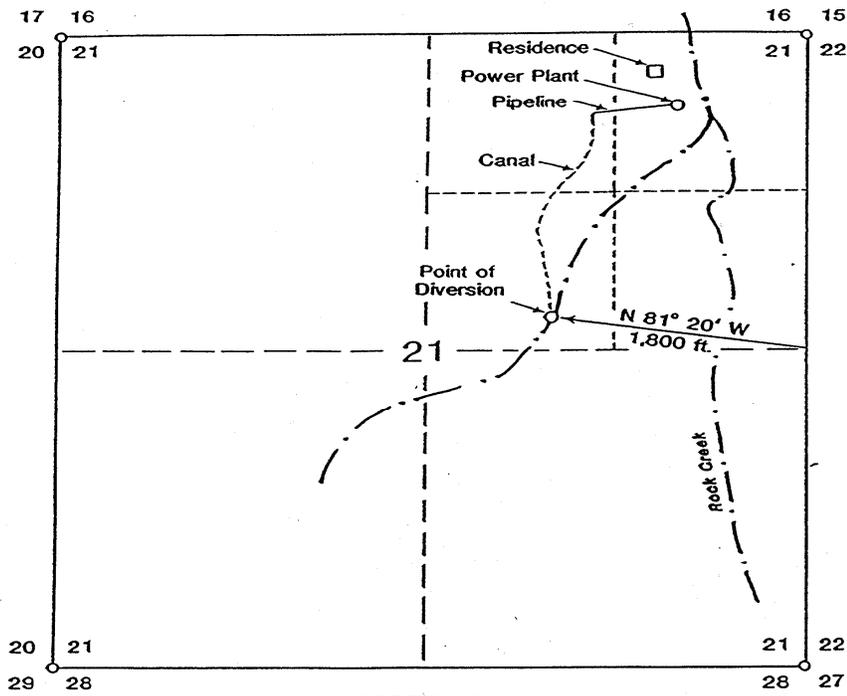

See the examples below.

NOTE: Due to re-sizing, this sample map is not to scale.

EXHIBIT A

MAP TO ACCOMPANY APPLICATION FOR HYDROELECTRIC LICENSE

A.C. Smith
January, 1988

SECTION 21
TOWNSHIP 2 SOUTH, RANGE 2 WEST, W.M.

Scale: 1" = 1,000'

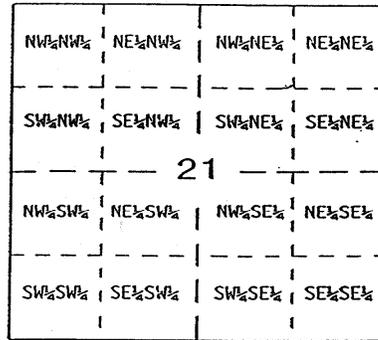

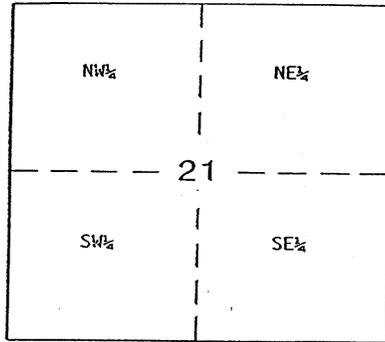

SAMPLE

Land descriptions used to locate various project features are based on Section, Township, and Range. A Township is divided into 36 Sections, as shown below:

	6	5	4	3	2	1
	7	8	9	10	11	12
Township 2 South	18	17	16	15	14	13
	19	20	21	22	23	24
	30	29	28	27	26	25
	31	32	33	34	35	36

Range 2 West

When describing a particular location, Sections are further divided into quarter sections (160 acre portions), and sixteenth sections (40 acre portions), as shown below:

For example, the 40 acre portion shown in black on the diagram above right would be described as follows:

"The SW_{1/4} of the NE_{1/4} of Section 21, Township 2 South, Range 2 West, W.M."
