Application for Instream Lease Pooled Lease Form

A summary of review criteria and procedures that are generally applicable to these applications is available at www.wrd.state.or.us/OWRD/PUBS/forms.shtml.

Pursuant to ORS 537.348(2) and OAR 690-077

Optional Identification by Lessor/Lessee: _____

Lease Application Number (assigned by WRD): _____

The water right to be leased is located in _____ County.

This Lease is between:

Lessor #2: Irrigation District or Other Water Purveyor

Name _____

Mailing address _____

City, State, Zip Code _____

Telephone number _____

E-mail address** _____

Lessee (if different than Oregon Water Resources Department):

Name _____

Mailing address _____

City, State, Zip Code _____

Telephone number _____

E-mail address** _____

****BY PROVIDING AN E-MAIL ADDRESS, CONSENT IS GIVEN TO RECEIVE ALL CORRESPONDENCE FROM THE DEPARTMENT ELECTRONICALLY. COPIES OF THE FINAL ORDER DOCUMENTS WILL ALSO BE MAILED.**

Trustee:

Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, OR 97301-1266
(503) 986-0900

~I~ Water Right Holder and Water Right Information

1.2 Lessor #2 is the (Check one):

- Official representative of _____, the irrigation district, which conveys water to the subject water rights.
- Another party with an interest in the subject water rights representing .
- Not applicable.

1.3 For the water right(s) being leased, list all water rights appurtenant to the same lands. Indicate if there are any supplemental or overlying rights.

Certificate No(s). _____

1.4 Are some or all of the lands being leased part of a Conservation Reserve Enhancement Program. Yes No or other Federal Program: _____

1.5 Water Rights Proposed to be Leased Instream.

The first right to be leased identified in Section 1.3 is further described as follows:

Certificate No.: _____

(If you need to enter another leased right, please use the additional water right form for pooled instream lease.)

Priority date: _____ Type of use: _____

Legal Season of Use: _____

If an irrigation right, total number of acres to be leased: _____

Total acre-feet of storage to be leased, if applicable: _____

Maximum rate associated with subject water rights (cfs) being leased: _____

If there is more than one rate associated with a water right, describe below:

Season 1 (cfs) _____ Time period: _____

Season 2 (cfs) _____ Time period: _____

Season 3 (cfs) _____ Time period: _____

Maximum duty associated with subject water rights (ac-ft): _____

Conditions or other limitations, if any:

~II~ Instream Water Right Information

2.1 **Public use.** This lease will increase streamflows that will benefit:

- Conservation, maintenance and enhancement of aquatic and fish life, wildlife, and fish and wildlife habitat
- Pollution abatement
- Recreation and scenic attraction

2.2 **Instream use created by lease for the water right described in Section 1.5.**

In the _____ River

Tributary to _____ in the _____ Basin.

Instream volume in acre-feet (may be up to the same as the duty identified in Sec 1.5): _____

Instream rate in cfs (may be up to the same as the rate identified in Sec 1.5): _____

(If more than one rate, describe the rate associated with each time period or instream reach.)

Rate in CFS: _____

Rate in CFS: _____

(If not certain of the instream rate or volume, please contact the Department for more information on how to fill out this section of the application).

- Instream use protected at the point of diversion (POD).
- Or within a proposed reach.

Describe the proposed reach (an instream reach generally begins at the POD and generally ends at the mouth of the source creek/river). If possible list the reach by river mile):

Please check this box if you are not sure of the proposed reach and want water to be protected within a reach below the POD, if possible.

(If no reach is identified or the above box is not checked, and there is only one POD listed on the certificate, the lease may be processed to be protected at the POD.)

If the POD is not described on the Certificate or if there is more than one POD listed on the certificate, then the specific POD must be described:

Conditions to prevent injury, if any (use this section to indicate a more restrictive period of use than allowed by the water right):

None

The instream flow will be allocated on a daily average basis up to the described rate from _____ through _____.

Other (describe):

(Note: The Department may identify additional conditions to prevent injury and/or enlargement.)

2.3 Term of lease. This lease shall terminate on _____.

2.4 Flow protection. The Trustee will regulate use of water from the source, subject to prior appropriation and the agency enforcement guidance, to assure the water is delivered to the point of diversion, and through the reach past junior downstream users, so long as flow is sufficient to meet the demand under priority date of the new instream use (see Section 2.2). As part of regulation activities the watermaster or a designee has access to the point of diversion and place of use for the water rights involved in this lease. No party is required to continuously measure the flow of the waterway described in Section 2.2.

~III~ Other Information

3.1 Accuracy. The Undersigned Lessor(s) and Lessee(s) declare that, to the best of their knowledge and belief, the information contained in this application is true, correct and complete. If after the lease order is signed, any information is determined to be false, the lease order may be modified or terminated. The lease only exercises the water rights being leased, for the term of the lease. It shall not be construed to overcome any claim that the water right may otherwise be subject to forfeiture for nonuse pursuant to ORS 540.610 during the period of time prior to the execution of the lease.

3.2 Lease. Lessor(s) and Lessee(s) agree to lease the water rights listed in Section(s) 1.5 for instream use for the term of this lease through Lessee to the Trustee, the Oregon Water Resources Department, pursuant to the provisions of ORS 537.348(2) and OAR 690-077.

3.3 Precedent. If a right which has been leased is later proposed to be leased again or transferred to an instream use under ORS 537.348 and OAR 690-077 a new injury review

shall be required, and a prior short term lease shall not set a precedent for the amount of water to be leased or transferred instream.

3.4 Suspension of original use. During the period of the lease, the water right holder agrees to suspend use of water allowed under the subject water rights and under any water right that is supplemental to the subject water rights.

3.5 Termination provision.

- For multiyear leases, the Lessor(s) shall have the option of terminating the lease each year with written notice to the Department. The lease may be terminated at any time during the calendar year. However, if the termination request is received less than 30-days prior to the period of allowed instream use or after the period of allowed use has begun for the water right(s) being leased, water may not be used under the right(s) leased until the following calendar year, unless the Director determines that enlargement would not occur. The Department may also require:
 - Written notice to the Department;
 - Consent by all parties to the lease; and/or
 - Written notice to the Watermaster's office.
- For multiyear leases, the lessor shall not have the option of terminating the lease, without consent by all parties to the lease.

3.6 Modification to prevent injury. Allocation of water to the instream use described in Section 2.2 during the term of this lease is not reasonably expected to cause injury to other rights to use water from the same source. If injury is found after this lease is signed, the lease may be modified or terminated to prevent injury.

3.7 Fees. Pursuant to ORS 536.050, the following fee is included:

- \$400 for an application with four or more landowners or four or more water rights.
- \$250 for all other applications.

Lessor #2: _____ Date: _____

Lessee: _____ Date: _____

Other Attachments as Needed:

Attachment 1: Tax Lot Map. (See instructions.)

Attachment 2: Detailed map illustrating lands under subject rights to be leased; required if only part of a right is being leased instream. (See instructions.)

Attachment 3: Supporting documentation indicating why a right is valid and not subject to forfeiture even though the right has not been exercised for five or more consecutive years (required if the second box in Section 1.6 is checked).

Attachment 4: Split Season Instream Use Form

Attachment 5: Pooled Lease Water Right Holder Form

Instructions for the Pooled Instream Leasing Form

When Do I Use This Form?

Most individuals will use the “Standard Lease Form.” The “Pooled Lease Form” is most frequently used by irrigation districts that want to group or “pool” several water right holders on the same lease application form. If you wish to lease more than one water right, then also use the “Additional Water Rights Form” for each additional water right to be leased. For more information on the different types of lease forms go to www.wrd.state.or.us/OWRD/mgmt_leases.shtml.

Instructions

Lease Agreement Number: Water Resources Department staff in Salem will assign this number.

Required Parties to the Lease

Lessors: The Lessor is the water right holder, or an authorized agent, of the property where, during the term of the lease:

- Water use will be suspended; or
- Water stored in a reservoir will be released for instream use.

If the lands to which the subject water rights are attached fall within the boundaries of an irrigation district or other water purveyor, as defined in ORS Chapters 545, 547, 552, 553, or 554, that organization must be a party to the lease and should be listed as Lessor #2.

Spouses and immediate family can all be listed as Lessor #1. If another individual or organization also has an interest in the rights being leased, they should be listed as Lessor #2, #3, etc.

Lessee: The Lessee is normally an organization, agency or individual who may compensate (or provide other consideration of value to) the Lessor for leasing the subject right for instream use.

Trustee: The Trustee is the Oregon Water Resources Department. If a person leases a right to the State without third party involvement, the Department will also be considered the Lessee.

Other Parties: Private ditch companies, mortgage holders and others may have an interest in the lease. The legally required parties may, at their discretion, add other parties as co-lessors.

Section One

1.1 This section is omitted from the “Pooled Lease” form, and is included on the “Pooled Water Right Holder” form.

1.2 Identify who is Lessor #2, #3, etc., if necessary. If this section does not apply, indicate so.

1.3 Provide an inventory of all of the water rights appurtenant to the same lands as the water right(s) being leased. Water rights information may be found at <http://www.wrd.state.or.us/OWRD/WR/wris.shtml>. List all supplemental, as well as all primary rights, even if the supplemental rights are still in permit status. Indicate if the supplemental rights are not being leased instream.

Only water right certificates can be leased instream, with the exception that a secondary right to use stored water, even if in permit status, can be leased. If this type of permit is being leased, indicate that it is a permit and list its number.

1.4 Indicate if some or all of the lands are enrolled in the federal Conservation Reserve Enhancement Program. The Department will send a copy of the lease application and the associated order to the Farm Services Administration.

1.5 Complete a water right profile for each right, or portion of a right, proposed to be leased for instream use. The priority date, type of use, and other information describing the right will be found on your certificate, which can be viewed online at <http://www.wrd.state.or.us/OWRD/WR/wris.shtml>. (Note: Profiles of supplemental rights are required only when these rights are also proposed to be leased.)

“Priority date” should include the day and month, if applicable, in addition to the year.

If the entire water right is being leased, check the “Yes” box indicating this and skip to the number of acres being leased.

If the entire water right is not being leased, check the “No” box indicating this and fill in the remainder of Section 1.5.

“Acre-feet of storage” is the quantity of water that is released from a reservoir. If no reservoir is involved, indicate “N/A.”

“Maximum rate associated with leased rights” should show the total rate of use. For example, if 40 acres are being leased instream and the rate is described as 1/80 cfs/acre, then the rate would be 0.5 cfs (40 acres * 1/80 cfs/acre).

“Maximum duty associated with leased rights” should show the total duty. For example, if 40 acres are being leased instream and there is a 4 ac-ft duty per acre the maximum duty would be 160 ac-ft (40 acres * 4.0 ac-ft/ac). If no duty is listed on the certificate or in the decree, then “N/A” should be indicated.

Attachment 3, a detailed map illustrating lands under subject rights to be leased, is required if only part of a right is being leased instream. If a map is required it needs to include the township, range, section, ¼ ¼, a north arrow, scale and crosshatching or other photocopyable means of differentiating the lands being leased from the remaining lands.

1.6 Only valid rights are eligible to be leased for instream use. Except for municipal water rights, a water right that has not been used for five or more years may no longer be valid under Oregon law. Once a water right is forfeited for non-use, resuming use will not make the right valid again. If the Department reasonably suspects the right may have been forfeited, it may refuse to execute the lease, or may require an affidavit attesting to the use.

By signing this lease application, the Lessor(s) attest that the rights proposed to be leased have been beneficially used under the terms and conditions of the rights within the last five years. If the rights are for irrigation, the Lessor(s) also attest that such irrigation took place on all lands being leased. If other water purveyors, such as an Irrigation District are party to the lease, the District may confirm that the water right has been exercised.

Section Two

2.1 Check one or more boxes to identify the public use(s) to be served by the new instream use. The use(s) may be to:

- Mitigate for a deficiency in the water supply of an existing instream right or minimum flow;
- Mitigate for a deficiency in the water supply of an instream water right application or scenic waterway (Diack) flow; or
- A specific use or need identified by Oregon Department of Fish and Wildlife, Department of Environmental Quality, or Oregon Parks and Recreation Department.

If an instream right or minimum streamflow already exists for the reach and the right proposed to be leased instream is senior to the existing right, then, unless otherwise indicated, the senior priority date of the right being leased will be substituted for a portion of the existing instream right. If the priority date is junior to an existing instream right, then the applicant should submit additional information (such as a letter from ODFW, DEQ, or OPRD) describing the instream benefits of making the rights additive.

2.2 This section is best completed in close consultation with the local district watermaster (a listing is available at www.wrd.state.or.us/OWRD/offices.shtml), who will be responsible for making a number of recommendations relating to the reach, amount, timing, and duration of the instream use. If a water right is used at its maximum rate for the entire season, it will frequently exceed its allowable duty (volume), and/or need to have the season of use reduced to prevent enlargement or injury of other water rights.

Variables among water rights include:

- The way in which use under the right is distributed throughout the season.
- Use allowed during a certain period of the year only.
- Specific provisions relating to total volume and rate.
- Particular conditions of individual rights which will also apply to the new use.

The watermaster will:

- Review factors such as losses, return flow, and consumptive use in determining whether the proposed location of the new use will be allowed.
- Recommend to the Director if and how far the Department can protect the new instream use past the original point of diversion. (In some instances, the new use may need to be broken into reaches of decreasing amounts. The reach below the original point of diversion would be managed like the shepherding of stored water.)
- Identify any conditions to be placed on the new use, which are necessary to prevent or mitigate injury to existing rights.

2.3 The term of the lease can be from one to five calendar years. For seasonal water rights, the date the lease commences should be the first day the water can be legally used for the first year of the lease, continue through the last day the water can be legally used (e.g. the irrigation season), for the last year of the lease.

For year-around rights, January 1, (year) and December 31, (year) should be used.

The lease is exercised the first day that water is legally protected instream. Frequently, this information is found in Section 2.2 and may be for a shorter time period than the legal season of use.

2.4 This section contains standard lease provisions.

Section Three

3.1 to 3.4. These sections contain standard lease provisions.

3.5 For multiyear leases, identify whether the lessor has the option of terminating the lease each year.

3.6 This section contains standard lease provisions.

3.7 Include the appropriate fee by check or money order made out to the Oregon Water Resources Department. Applications received without the proper fee will be returned.

Next Steps

The signed Lease Application should be sent to the Water Resources Department office in Salem (725 Summer Street NE, Suite A; Salem, Oregon 97301). Once the lease application is received, two steps simultaneously take place:

- The watermaster or other Department field staff is contacted to prepare a written assessment of whether the lease agreement meets the requirements to suspend the original use and avoid injury or enlargement.
- The lease application is included in the Department's weekly public notice mailing. This mailing initiates a 21-day public comment period and is sent to any water purveyor listed in the proposed agreement, posted in the affected watermaster district office, and available at http://apps.wrd.state.or.us/apps/misc/wrd_notice_vie/?notice_id=21.

If the watermaster review indicates that no injury or enlargement will occur and no comments are received, the Director presumes that no injury or enlargement of a water right would result from the proposed Lease Application. The Director, or designee, would sign an order that executes the lease.

If the watermaster review indicates that injury or enlargement will occur, or if other comments were received, they are reviewed by all the parties to decide whether to execute the lease, execute with modifications, or deny the lease.
