

**PUBLIC UTILITY COMMISSION OF OREGON
STAFF REPORT**

PUBLIC MEETING DATE: December 18, 2001

REGULAR _____ **CONSENT** X **EFFECTIVE DATE** December 19, 2001

DATE: December 6, 2001

TO: Phil Nyegaard

FROM: Celeste Hari through Lance Ball

SUBJECT: Sprint/United Telephone Company of the Northwest:
(Advice No. 543) (1) Makes revisions of Indexes and Tables of Content to more accurately reflect current contents and location; (2) removes references to services that no longer exist; and (3) adds or deletes text inadvertently omitted in previous filings and other miscellaneous changes.

STAFF RECOMMENDATION:

The Commission should allow the Sprint/United Telephone Company of the Northwest (United) tariff filing, filed on November 6, 2001, to go into effect.

DISCUSSION:

This filing makes several "housekeeping" changes to the text in PUC OR. No. 3. The changes include: 1) revision of Indexes and Tables of Content to more accurately reflect the current contents and location within the tariff, 2) removal of references to services that no longer exist, 3) addition or deletion of text inadvertently omitted in previous filings, and other miscellaneous text changes.

None of the changes include customer rates or services. There is no revenue impact associated with these changes as they involve only updating of text. No change is controversial.

The Commission has the option of allowing the filing to go into effect or suspending the filing in order to investigate the changes. Given the non-controversial nature of the filing, Staff recommends allowing the filing to go into effect.
