To whom it may concern!

Please consider making our medicine available to us it really does work for so many of us. I am a 69 year old male who got on the OMMA program in the beginning. At the time I was just a short ways away from being stuck in a wheelchair.

My problem is I fell from a second story building I was painting and lit on a brick wall breaking my back in a couple of places in 1983. As the years passed it steadily got worse until I drug my right leg behind me when walking and had horendous muscle spasms. Over the years more and more drugs were prescribed until I was a walking mummy- when I could walk.

Since the inception of this great program[OMMA] almost 12 years ago and medical canabis was made available I have steadily improved not only in my physical stature but with my mental status also. I'm not depressed all the time now as I was on pharmaceuticals.

The quality of my life has went from almost non-livable to a decent place where I can deal with it and by golly that was absolutely due to cannabis as my main source of medicating. I had tried almost every pain killer and muscle relaxer on the market the 17 years I was on them.

Canabis is truely a real medicine and it absolutely does not belong on such a strict schedual .Please let it be a schedual 3-or 5 where we are not called criminals for using something that truely does work for us and will truely help so many more people once they are not afraid to give a try. There are over 30,000 of us that have a better quality because of this wonderful plant please give us access to it again as was had by all before 1938 when the american politicians of the time took it from us for polital ,and monitary reasons.

Not because anything was ever proved against it because nothing ever has been. No death ever has been caused by cannibis alone. Why was it ever put in the schedual it was?/ Ask yourselves this question and please give us back access to the best medicine available on this planet bar none. It's a wonderful herb that belongs to the people of this planet put here for our use when the place was formed. Seems throughout history it has appeared almost every time we dwell into uses of medicinal herbs within a scoiety.

Respectively
Robert[brother bob]Walker
