Specific Project Work To Be Completed

This project is proposed to implement trail construction by means of restoring the existing Historic Canal features to their original design as an opportunity to interpret historic values and provide hiking opportunities within the ACEC. Youth will work under supervision of the archaeologist and the landscape architect to implement a trail system for hikers in the ACEC. Additional work will include repairing past damage from motorized use in the canals. Specifically, youth will be digging and leveling mounds of dirt, filling in ruts, moving rock, posting trail markers, closing unauthorized routes, moving and/or transplanting vegetation, and limbing trees. Preferred provider Heart of Oregon Corps.
