Project

Microsoft Project & Portfolio Management

Harness the power of project portfolio management (PPM) capabilities to effectively plan, prioritize, and manage project and portfolio investments.

Leon Gallegos

I have had the opportunity to work with a wide range of customers and students worldwide as a senior PPM consultant and trainer for MS Project Pros (MPP).

MPP provides consulting and training in the Microsoft PPM space. Learn more at msprojectpros.com.

Office 365 tenant. Common Data Service Solutions Power BI Project View reporting data Portfolio Service Connect to your Project Online and Project for the web data to view reports.

Usage Scenarios

Enterprise Project Management (P1, P3, P5)

- Applies to a large organization whose area of focus is top-down planning driven through the Project Management Office (PMO)
- More frequently seen in the product development and manufacturing markets

Time tracking (P3, P5)

- Applies to professional services
- Mainly used to capture and report time
- Employees and contractors use timesheet functionality to submit hours worked on tasks during specific time periods

Demand & Work Management (P1, P3, P5)

- Applies to any medium-to-large organization that want to use Microsoft PPM to manage project demand and work requests and workflow routing
- Lightweight Project & Task Management
