

Vehicle Inspection Program

Recognized Automotive Repair Shops

Fall 2017

The Vehicle Inspection Program of DEQ maintains a list of recognized automotive repair shops in the greater Portland metro area. Each facility has demonstrated having the required diagnostic equipment, and should employ at least one currently certified A.S.E. (Automotive Service Excellence) technician(s) performing emission diagnoses, related adjustments, and repairs. These facilities have volunteered to be *recognized* by DEQ and this list is simply a guide to those that meet minimum experience and equipment requirements. You need to screen the facility to ensure they can repair your vehicle.

This listing is not a recommendation from the Vehicle Inspection Program of DEQ nor does DEQ guarantee the work of the listed facilities.

Some facilities may have additional accreditations beyond the minimum requirements to be represented on this recognized shop list. Facilities may be noted for Master A.S.E. certified, Eco-Business, or offer hybrid services.

When the dashboard Malfunction Indicator Lamp (MIL) is on an emission related system problem has been identified by the diagnostic system of the vehicle.
