SECTION 1. POSITION INFORMATION

Table with 4 columns: Classification Title, Classification No, Effective Date, Position No, Working Title, Agency No, Section Title, Budget Auth No, Employee Name, Repr. Code, Work Location, Supervisor Name, Position, FLSA, Eligible for Overtime.

SECTION 2. PROGRAM AND POSITION INFORMATION

a. Describe the program in which this position exists. Include program purpose, who's affected, size, and scope. Include relationship to agency mission.

The mission of the Oregon Department of Corrections is to promote public safety by holding offenders accountable for their actions, and reducing the risk of future criminal behavior. In support of this, the Department has deployed an integrated statewide felony offender tracking and management system and other related information systems which include a mission critical, online, real time accounting system (budgeting, purchasing, contracts, accounts payable, manufacturing); an institution staffing application, a mission critical inmate trust accounting system; client/server email systems; a pharmacy system; a decision support system for research and evaluation; and a Help Desk problem tracking system. These systems are deployed on the Department's network that extends to all its locations statewide and is comprised of many central and remote servers including an IBM I-Series server, several Windows servers, and numerous other network servers.

These systems are supported and maintained by the Information Technology Services Unit of the Administrative Services Division. To accomplish this, the unit is divided into three sections: Application Services; the section responsible for creating and/or maintaining all software, Business Support and Operations; the section responsible for project management, helpdesk, server support, and customer relations, and Technical Support; the section responsible for maintaining the desktop devices used on the network.

- b. Describe the primary purpose of this position, and how it functions within this program. Complete this statement. The primary purpose of this position is to:**

This position works as part of a team, assists in the design, development, modification, and maintenance of agency-wide applications, with a focus on Java applications.

SECTION 3. DESCRIPTION OF DUTIES

- The employee in this position is expected to recognize their responsibility to act ethically at all times in accordance with the very highest standards of integrity.
- Regular attendance is an essential function required to meet the demands of this job and to provide necessary services.
- The incumbent is expected to perform position duties in a manner which promotes customer service and harmonious working relationships, including treating all persons courteously and respectfully; engage in effective team participation through willingness to assist and support co-workers, supervisors, and other work-related associations; develop good working relationships with division and agency staff and supervisors through active participation in cross-divisional group projects and in identifying and resolving problems in a constructive, collaborative manner; demonstrate openness to constructive feedback and suggestions, in an effort to strengthen work performance, and contribute to a positive, respectful and productive work atmosphere.

The Oregon Accountability Model (OAM) depends upon a team approach to custody with security-series personnel and non-security personnel communicating effectively to maintain safe, secure, and sanitary correctional environments while preparing inmates for successful reentry into the community. The vast majority of ODOC inmates will return to Oregon communities. Enhanced public safety, lower crime rates, and reduced recidivism can all be tied directly to attitudes and actions of correctional staff who must effectively apply ODOC rules and transition initiatives in their daily interaction with inmates. All staff are expected to model pro-social behaviors; reinforce positive behaviors; redirect negative behaviors; and effectively communicate observed behaviors to responsible program staff, administrators, and supervisors in support of the OAM.

Correctional Case Management (CCM), the next critical step toward implementation of the Oregon Accountability Model, is a proactive, collaborative, multi-disciplinary process. The CCM process unifies procedures and personnel to balance departmental resources and an inmate’s needs throughout his/her incarceration and community supervision.

All correctional staff has a valuable role in the delivery of multi-disciplinary services in DOC facilities. Despite differences in training, culture, and job specific mission, they all have some common goals. When all correctional staff share appropriate information and assist in the case planning of inmates, both the quality of change and the safety of the correctional environment improve. Mutual respect, proper orientation and training, and ongoing communication and cooperation provide the foundation of correctional case management. All staff is expected to follow CCM principles and practices.

List the major duties of the position. State the percentage of time for each duty. Mark “N” for new duties, “R” for revised duties or “NC” for no change in duties. Indicate whether the duty is an “Essential” (E) or “Non-Essential” (NE) function.

% of Time	N/R/NC	E/NE	DUTIES
-----------	--------	------	--------

Note: If additional rows of the below table are needed, place curser at end of a row (outside table) and hit “Enter”.

10%	NC	E	Customer Assistance <ul style="list-style-type: none"> Works with users from multiple jurisdictions and remote locations to understand and document requirements for system modifications and for developing new applications.
30%	NC	E	Analysis <ul style="list-style-type: none"> Perform detailed analysis existing systems. Evaluate existing statewide integrated criminal justice system for improvements and modification. Analysis involves diagnosis of problems in complex, nonstandard systems which may require changes throughout a statewide criminal justice application, with implications for numerous integrated programs and functions to be considered. Participate in walk-through to evaluate specifications with co-workers. Review and coordinate design changes with data base staff, users, and supervisor.
50%	NC	E	Construction <ul style="list-style-type: none"> Determine functional business requirements to modify significant portions of large, existing systems. Projects usually involve new processes within established business. Users and business functions usually represent multiple jurisdictions from remote locations. Provide input to and work with the database team to create and integrate new data structures. These systems usually involve a variety of users, mixed standards and version compatibility issues. Develop and test applications programs to meet system requirements using open component-based systems/client server technology Work with users to present screens, business and program logic, database, stored procedures and triggers. Maintain rapport with users, coworkers and contractors. Prepare documentation to meet the needs of users. Train users and user support staff in the use of modified systems. Accept responsibility on assigned development and maintenance projects to complete the project to the customer's and supervisor's satisfaction in accordance with phased development plans, standards and tight deadlines agreed upon by supervisor, customer, other personnel and employee. Be responsible for keeping the customer and supervisor advised of progress.
5%	NC	E	Operations <ul style="list-style-type: none"> Install software/technology consistent with Department procedures. Install software/technology in multiple sites / institutions meeting distributed needs within the agency.
5%	NC	E	Planning <ul style="list-style-type: none"> Participate in the evaluation and selection of tools and vendors to promote the Departments strategic technology direction.

			<ul style="list-style-type: none"> • Evaluate and recommend technologies new to the Department for workload and work flow, and make recommendations for performance and technical improvement. • Work with other technical staff to plan the deployment of software/technology new to the Department. Create, maintain and recommend changes/updates to ITS System & Coding Standards.
