OPERATING PERMIT CLOSURE REQUEST CHECKLIST

Under ORS 517 and OAR 632

INSTRUCTIONS & REQUIREMENTS

Submit the following to the Oregon Department of Geology and Mineral Industries (DOGAMI) Mineral Land Regulation & Reclamation Program (MLRR) at the address above or via email to mlrr.info@dogami.oregon.gov:

- Complete Operating Permit Closure Request Form (next page)**
Complete all sections of this form prior to submitting.
- Current Reclamation Plan(s)**
You may request a full copy of the permit file, including the Reclamation Plan, from DOGAMI through a Public Records Request.
- Supporting Documentation of Reclamation Success**
Based on the post-mining beneficial use identified in the Reclamation Plan, provide geolocated photos, along with any other pertinent information that clearly demonstrates the reclamation obligations have been achieved.
For reclamation requiring revegetation, supporting documentation should demonstrate successful establishment of vegetation and control of noxious weeds. If required revegetation is not successful, the site is not eligible for closure.

After DOGAMI has reviewed and accepted the supporting documentation, a Reclamationist will be assigned to conduct a site inspection.
