Class Title: ARFF (Aircraft Rescue & Fire Fighting) For Structural Firefighters and Ethanol Ble

Overview:
OBJECTIVE: This is class is especially designed to prepare structural firefighters to respond to emergencies involving general aviation (non-commercial) aircraft, using standard structural firefighting equipment. Additional training will include the use of Class B foams (AFFF & AR-AFFF) when managing emergencies associated with ethanol blended fuels.

CERTIFICATION: This course does not meet any ARFF related certification for working at larger airports which have commercial aircraft (PDX, Eugene, SeaTac, etc.)

TOPICS:
- Characteristics of Small Airports - Students will learn airport information that is necessary for safe and effective operations, and how to gather information about their own airports.

- Aircraft Types, Features & Rescue Procedures - Emphasis will be placed on a variety of non-commercial type aircraft (single/twin engine prop, smaller corporate jets, helicopters, military aircraft, etc.). Students will be shown how to acquire and use aircraft rescue and firefighting pre-fire plans.

- ARFF Safety - Special attention paid to liquid fuel fires and other safety considerations in and around aircraft (rotors, propellers, wheels, explosive systems, HAZMAT, etc.).

- Adapting Structural Equipment for ARFF Emergencies - Emphasis will be placed on use of class B foam. Students will participate in live-fire training evolutions (full PPE & SCBA required).

- Special training will be conducted on how to manage ethanol blended fuel emergencies (not associated with aircraft), using both aqueous film forming foam (AFFF) and alcohol resistant - AFFF (AR-AFFF)

- Aircraft Emergencies - Students will examine a variety of typical/unusual aircraft incidents. A number of table top exercises will be conducted.

- ARFF Protocols/Strategy & Tactics - Students will be shown how to use modified structural procedures for rescue and firefighting operations on aircraft. Sample SOGs will be provided.

- ARFF drills - Students will participate in simulated "crash" drills. Students will need to bring turnouts to participate in drills.

Class Title: ARFF (Aircraft Rescue & Fire Fighting) For Structural Firefighters and Ethanol Ble

Prerequisites:

Registration: Call: (541) 888-7432, Email: rkirch@socc.edu to register, or for more details

ABOUT THE INSTRUCTOR: Paul Reynolds. Paul is the director of fire science training at Southwestern Oregon Community College. He is a retired 20+ year ARFF veteran for the US Air Force. Paul has taught this course for other fire science programs, at OVFA conferences and fire departments with airports across the state. Because of Paul's background in class B foam, a special segment on managing ethanol blended fuels has been added.

Instructors: "SEE OVERVIEW"

Overview: Course Description: The NAEMSP© is the preeminent organization for EMS medical directors, and it has offered the NAEMSP© Medical Direction Overview CourseTM for a number of years. The distinguished faculty are recognized as experts in various aspects of prehospital and disaster medicine/management. This interactive course focuses on EMS in the “real world” and serves to enhance medical directors’ expertise in EMS issues.

Course Objectives: Upon completion of the course, participants will be able to:

- Describe the process for implementation and review of protocol, policy and procedure development
- Identify special issues and unique considerations related to clinical care protocol in the pre-hospital setting
- Describe the role of medical oversight for all aspects of the delivery of out-of-hospital care
- Discuss the components and challenges in conducting pre-hospital research
- Recognize the impact of applicable state laws, rules and regulations on EMS medical oversight and the EMS medical director

CME Credit: Please note that your evaluation for this course will be electronic. You will receive the evaluation by email. Please complete your evaluation promptly. Your CME Certificate will be sent to you within 4-6 weeks following receipt of the evaluation.

The NAEMSP® Medical Direction Overview Course™ has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of the Medical College of Wisconsin and the National Association of EMS Physicians®. The Medical College of Wisconsin is accredited by the ACCME to provide continuing medical education for physicians. Designation of Credit Statement: The Medical College of Wisconsin designates this live activity for a maximum of 7.0 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Overview: The Oregon Office of State Fire Marshal (OSFM) will be conducting training on the Smoke Alarm Installation Program (SAIP), which is required for agencies who wish to participate in the OSFM SAIP. The program provides smoke alarms, educational materials, and funding assistance to Oregon fire agencies who wish to conduct a SAIP project in their jurisdiction.

Topics covered include:
• Planning a smoke alarm installation project
• Replacing smoke alarms and batteries
• Oregon smoke alarm law
• Smoke alarm types and installation
• Installation briefing
• Program requirements
• Applying for the program, ordering smoke alarms, and educational materials
• Project funding

Prerequisites:

Registration: If you are interested in attending a smoke alarm training in a location near you, the attached flier has several dates and locations to choose from. This information can also be found on the OSFM website: http://www.oregon.gov/osp/SFM/Pages/Training.aspx

Course Title: NFA F0635 Best Practices in Community Risk Reduction

Target Audience:
- Fire and emergency services personnel who help develop and deliver fire prevention and community risk reduction programs.
- Fire and emergency services staff with an interest in advancing risk reduction efforts in their community.
- Allied health and community service personnel who help develop and deliver risk reduction programs.

Overview:
Best Practices in Community Risk Reduction demonstrates to students nationally recognized principles that, when used appropriately, can lead to community risk reduction programs that can measure success in local communities. This course will give students the opportunity to explore programs from communities across the U.S. that have been showcased at Vision 20/20 symposiums. These programs demonstrate what nationally recognized organizations identify as examples of “best practices” in community risk reduction. At the end of the course learners will be evaluated through a 25 question multiple choice examination. A final grade will be provided to each student. The minimum score needed to pass is 70.

There is a pre-course assignment due one week before class that should take about 1 hour to complete.

Selection criteria:
The target audience for this course may include the following:
- Fire and emergency services personnel who help develop and deliver fire prevention and community risk reduction programs.
- Fire and emergency services staff with an interest in advancing risk reduction efforts in their community.
- Allied health and community service personnel who help develop and deliver risk reduction programs.

Cost: Ranges from $150.00 to $599.00

Instructors:

Overview: Description -2015 Annual OVFA Training Conference: We hope to welcome many of you to the 57th annual Training Conference sponsored by the Oregon Volunteer Firefighters Association and co-hosted by Pendleton Fire & Ambulance Department. We want to personally invite your department to send as many representatives as you can to this conference and to take advantage of the quality training opportunities offered in Pendleton this year. OVFA offers scholarship opportunities and tries to make it possible for anyone to attend conference if at all possible. OVFA Training Conferences are not just about the volunteer firefighters; bring your family to enjoy attractions in the area; attend the welcome BBQ on Wednesday night, the vendor night on Thursday and the awards banquet on Friday night. Come early or plan to stay an extra day to enjoy all the area has to offer.

Classes this year have been set up in designated tracks for easy registration but also the option of building your own track to meet your training needs. Training includes EMS classes, Swift Water Rescue, Explosive Device Recognition, Vehicle Car Extrication, High Angle Rope Rescue, DPSST Mayday & Self Rescue, as well as courses in HazMat Awareness, Instructor II, and Railroad Incidents.

Where: Oregon Public Safety Academy (DPPST), Aumsville Hwy Salem, Oregon 97317

Cost: FREE

Instructors: Cadre

Overview: This is a two week course that meets the needs of fire executive management. The Fire Officer III/IV combination course satisfies the requirements of National Fire Protection Association (NFPA) 1021, Chapters 6 and 7 and provides the tools necessary to obtain certification through the Texas Commission on Fire Protection (TCFP) and the National Board on Fire Service Professional Qualifications (Pro Board). The course is designed around classroom lectures and group interactive exercises to improve your abilities to manage a fire service organization. The course emphasizes community/government relations, model planning, budgeting, human resources, trends and support organizations, and emergency service delivery. The course includes a written project that requires you to develop a strategic plan. Fire service professionals who successfully complete this course will receive DPSST and ProBoard NFPA Fire Officer III & IV certifications.

Any exam candidate with a documented disability may be eligible for nonstandard testing accommodations. If you believe you may need any adjustments, modifications, or accommodations, you should contact Rich Daniel at rich.daniel@state.or.us by one week prior to class date to request suitable arrangements.

Instructors: Battalion Chief John Oliver

Overview: This course was originally designed for the Northwest Fire Trainers, Metro Fire Officers 2 series. Through years of presentation and constant development the course has evolved into a fresh and cutting edge design of multi-media and new age applications. This is not the traditionally generic NFA style class. This course is specifically designed for the west coast Incident Commander covering regional tactical applications and local building construction. The student will begin with the base theories of fire ground strategies and build upon the mastery of strategic directives and tactical operations. Continuously analyzing and applying appropriate resource applications during the deficient resource stage, each showcased incident will give the student street level applications no matter what size of organization they are from. The scope of Emergencies covered in the class will range from multi-family residential structures to low rise and heavy commercial facilities. This class is tailored to educate not only the metropolitan responder but also the most rural and resource challenged IC’s.

Topics covered are:

Implications and moral responsibility of Incident Command, Application state and federal policies and procedures, Knowledge and application of the expanded National Incident Management System, Critical thinking and focus on today’s fire ground Strategies, Completion and application of formal Incident Action Plans, Personnel and resource accountability applications Progressive communication models and application

Instructors: Responders are being struck and killed at traffic incidents in the US on an average of: 5 fire fighters each year, 1 law enforcement officer each month, 1 tow truck operator each week and numerous transportation professionals from DOTs, Public Works and Safety Service Patrols each year.

It is time to collaboratively enhance our safety and efficiency on incident scenes by training as a single cross disciplined team! The National TIM Responder Training Program was developed by responders for responders, and was designed to establish the foundation for and promote consistent training of all responders to achieve the three objectives of the TIM National Unified Goal (NUG):

• Responder Safety
• Safe, Quick Clearance
• Prompt, Reliable, Interoperable Communications

Don’t miss this opportunity to interact with your local partners in Traffic Incident Management!

A cross-disciplined group of local Oregon’s response trainers will lead interactive discussions through nine modules covering:

• Introduction to the TIM program
• TIM Fundamentals and Terminology
• Notification and Scene Size-Up
• Safe Vehicle Positioning
• Scene Safety
• Command Responsibilities
• Traffic Management
• Special Circumstances,
• Scene Clearance and Termination

Lodging:
Overview: The International Association of Fire Fighters (IAFF)/International Association of Fire Chiefs (IAFC)/American Council on Exercise (ACE) Peer Fitness Trainer (PFT) Certification Program is a certification program to provide a fitness trainer standards consistent with the health and fitness needs of the Fire Service throughout the United States and Canada. Those successfully passing the certification examination will have demonstrated they possess the knowledge and skills required to design and implement fitness programs, improve the wellness and fitness of the uniformed members in their departments, assist in the physical training of recruits, and assist the broader community in achieving wellness and fitness. [https://www.iaff.org/hs/PFT/PeerIndex.htm](https://www.iaff.org/hs/PFT/PeerIndex.htm)

The PFT study materials and workshop will focus on applicable scientific foundations and practical applications and will include anatomy, kinesiology, biomechanics, exercise science, exercise testing, exercise programming, exercise techniques, instructional/coaching techniques, nutrition, fire service wellness/fitness, motivation, and communication techniques.

The workshop will begin at 8:00am and end at 5:00pm on most days provided that all of the learning objectives for that day are covered. One hour will be given for lunch. Workshops will be taught using small group learning methods, which encourages student participation. Students will spend part of the time in a classroom setting and the rest of the time in a practical/experiential exercise setting. Students should be physically capable and cleared to perform exercise sessions. Workshops will be taught by IAFF/IAFC/ACE Certified PFT Instructors.

It is strongly recommended that all candidates must register at least three months prior to the workshop to allow sufficient time to complete the required pre-requisite online learning modules.

Eligibility Requirements

In order to be eligible to take the PFT examination you must be a fire fighter, EMS provider, or employed by a fire department and involved in a wellness-fitness program.

The current PFT Certification Program is undergoing extensive updates. This course will include all of the updates. Current registration cost is $800 per candidate. This cost may change after the updates have been initiated. Candidates will be responsible for all travel, lodging, and meal costs while attending the workshop.

Incident Command System

6/16-17/2015

Class Title: Critical Thinking for the Initial IC
Target Audience: 
Sponsoring Agency: 
When: 6/16-17/2015
Registration Deadline: 
Contact: ;
Hours: 0830-1700
Where: Bend Fire and Rescue 63377 Jamison Rd., Bend, OR 97701
Cost: $125/person.
Instructors: 'SEE OVERVIEW'
Overview: Course overview

On a structure fire the initial incident commander is faced with the expectation of making critical decisions in a compressed time frame. CRITICAL THINKING for the INITIAL INCIDENT COMMANDER uses Bloom's Taxonomy and Costas' Levels of Intellectual Functioning methodology in addressing Critical Thinking as applied to the Initial IC when dealing with structure fires.

The class will also look at the components and relationship of "Criteria Based Decision Making" with "Recognition Primed Decision Making" as they apply to fire ground decisions. Students will understand which criteria are critical and how to utilize these criteria in making effective decisions. Subjects that will also be covered include:

* Fire Dynamics/Reading Smoke
* Coordinated Ventilation
* Applying Strategic and Tactical Priorities
* Pitfalls in Decision Making

This is a 16 hour class designed for the Initial Incident Commander whether the student is a Company Officer or Response Chief.

Instructor Bio

Stan Cooke has been with the Spokane Valley FD in Spokane, Washington, since 1981 and has filled the position of Operations Battalion Chief since 2000. He has been qualified as a Type 3 Incident Commander and was an Incident Commander for one of three Incident Management teams for the Spokane County for 3 years.

He is also co-developer of the Command Competency Clinic as well as the co-developer of the Integrated Tactical Accountability System (ITAC), presenting these programs since 1998. These two programs have been taught by BCCooke for individual fire departments, and at fire and life safety conferences in Washington, Idaho, Oregon, and Montana.

Target Audience: Mid-Willamette Valley Fire Instructors

Sponsoring Agency: Mid-Willamette Valley Fire Instructors

When: 6/6-7/2015

Registration Deadline:

Contact: ; ;

Hours: 0800*-1700

Where: Chemeketa Brooks Campus, Building 2, 4910 Brooklake Rd NE, Brooks, Oregon 97305

Cost: $60.00 for one class or $100.00 for both classes.

Instructors: 'SEE OVERVIEW'

Overview: This course is a real-world case study of taking the latest in fire dynamics research to the street level. While most agree that the latest research can improve firefighter safety, they struggle to translate the research into fireground tactics and implement that change in a successful manner. This program rethinks the tactics of old and incorporates the latest research into tactics using the S.L.I.C.E.R.S method. S.L.I.C.E.R.S is an acronym developed to "operationalize" fire dynamic research concepts. The concept has been vetted with the lead researchers involved and has their endorsements. The program also discusses overcoming resistance to change and the lessons learned in real world implementation. The learning objectives of this course are:

1. Participants shall be aware of the outcomes of recent research in fire dynamics and their direct impact on firefighter safety. Participants shall understand predictable resistance to change and strategies and considerations to overcome this resistance.
2. Participants shall be oriented to S.L.I.C.E.R.S. tactical acronym and methods to train department members in its use.

A case study will be presented on how Hanover Fire and EMS successfully migrated to this method and the lessons learned along the way. The intent is for the participants to benefit from that experience and be better prepared to take this new life-saving information back to their departments.

Eddie Buchanan began his fire service career in 1982 and is currently a division chief with Hanover Fire & EMS in Richmond, VA. He is a past president of the International Society of Fire Service Instructors and the 2015 recipient of the George D. Post Instructor of the Year Award. He is the author of the Volunteer Training Officers Handbook and serves on the executive advisory board for FDIC and Fire Engineering Magazine.

Leadership Principles of a Highly Effective Supervisor by Todd Keathley, Deputy Chief of Portland Fire & Rescue in Portland, OR (Meets Fire Officer 1 - 4.2 Human Resource Management)

This presentation begins by identifying the critical qualities of a leader and the foundation of leadership. We will have an honest discussion about true leadership, what it is, how to develop it, and how to determine when you are leading appropriately. We will define what true leadership is and identify several leadership myths. We will discuss the importance of influence and the impact leadership can have on all levels of the organization. We will review the 5 levels of leadership and methods for reaching each level. We will evaluate the role of the first-line supervisor and the critical nature of the company officer as a leader. We will assess the direct connection between leadership and firefighter safety and where to find the most powerful leadership in any organization.
Leadership

Class Title: Fire & Leadership Weekend Event!!

We will discuss the benefits of positive reinforcement and the impact it has on the individual employee and the work group as a whole. We will identify opportunities to recognize positive performance and methods for acknowledging that behavior. We will discuss positive reinforcement as a tool to improve and maintain employee performance and behavior.

We will identify clearly defined expectations and explore the importance of clear expectations as they relate to firefighter safety and the supervisor/subordinate relationship. Participants will learn causes of poor performance and actions to be taken by the supervisor to improve performance. We will address successful conflict resolution and how conflict avoidance hampers healthy leadership. We will review steps to be taken to prevent the employee's performance from declining initially. We will discuss the issue of dealing with a substandard employee and the leadership opportunity that it presents. We will identify the appropriate steps to be taken before addressing the struggling employee and the importance of determining the root cause of the performance or behavioral issue.

We will review of the required steps in the disciplinary process and identify the legalities of disciplining a represented employee. We will discuss the organizational benefit of administering an appropriate level of discipline and the process of determining that level. Further, members will understand the importance of fact-finding and proper documentation to ensure a fair and impartial disciplinary process. Participants will learn the importance of counseling and disciplining an employee while salvaging the supervisor/subordinate relationship. The class will consist of a PowerPoint presentation coupled with lecture and group discussion.

Chief Keathley has been a member of Portland Fire & Rescue for 26 years and is currently a Deputy Chief in the Emergency Operations Division. He has been a Chief Officer for ten years, including two years as the Chief Safety Officer. He has spoken on numerous fire service topics both inside his organization and throughout the region. Chief Keathley is the recipient of the Northwest Association of Fire Trainers (NAFT) 2013 Instructor of the Year and the Oregon Fire Instructors Associations (OFIA) Instructor of the Year for 2014.

NFA Classes

6/16-17/2015

Class Title: NFA SHAPING THE FUTURE

Target Audience:

Sponsoring Agency: Lower Columbia River Training Officers Association

When: 6/16-17/2015

Registration Deadline:

Contact: ;

Hours: 0800-1700

Where: Lee Broadbent Training Center 58577 McNulty Way, St. Helens, OR 97051, 503-543-5026

Cost: $35.00

Instructors: Phil Davis

Overview: This 2-day course is the first of two courses on midlevel management covering the skills and techniques midlevel managers will need to provide leadership and direction for their departments. The first module focuses on identifying opportunities and/or problems. Topics include environmental scanning, paradigm shifts, and methods for reframing problems accurately. The second module deals with group problem-solving techniques. The third module explains the need to quantify, justify, and communicate decisions so they will be implemented effectively. Managing change will be discussed in the final module. Topics include people who resist change, overcoming that resistance, and monitoring and evaluating the change before, during, and after implementation.

This class is part of the National Fire Academy Managing Officer Program

The Instructor, Phil Davis retired in 2005 as the Deputy Fire Chief of the Elk Grove Fire Department in California. He has also served as the Assistant Fire Chief for the UC Davis Fire Department. His fire experience spans 28 years (and in emergency services for 33 years) and has worked as a firefighter/paramedic, captain, training officer, EMS coordinator and Chief Fire Officer. He has served on two Type-2 Incident Management Teams for CALFIRE in California. After retiring from the fire department, Chief Davis served as the regional Emergency Services Director for the American Red Cross, Capital Region Chapter. His experience also includes part-time adjunct faculty positions at the National Fire Academy, UC Davis and Chico State University as well as numerous California community colleges.
