

Physical Education

OREGON CORE STANDARDS¹

In 2008, the U.S. Department of Health and Human Services (HHS) released the first comprehensive guidelines on physical activity for all Americans and included key recommendations for children and adolescents. HHS recommended children and adolescents be physically active at least 60 minutes daily and should participate in activities that are mostly moderate to vigorous in intensity, and muscle and bone-strengthening. Physical Education is the cornerstone to a comprehensive school effort to increase the physical activity level of students.

High-quality physical education is characterized by standards-based instruction and includes moderate-to-vigorous physical activity for at least 50 percent of the class time, but not at the expense of skill development or high-quality instruction; follows appropriate instruction practices; and is developmentally appropriate to students' physical, cognitive and social needs of children (NASPE, 2003).

Standard 1. The physically literate individual demonstrates competency in a variety of motor skills and movement patterns.

Standard 2. The physically literate individual applies knowledge of concepts, principles, strategies and tactics related to movement and performance.

Standard 3. The physically literate individual demonstrates the knowledge and skills to achieve and maintain a health-enhancing level of physical activity and fitness.

Standard 4. The physically literate individual exhibits responsible personal and social behavior that respects self and others.

Standard 5. The physically literate individual recognizes the value of physical activity for health, enjoyment, challenge, self-expression and/or social interaction.
