Chrome OS 57 Not Yet Approved for Testing and Chrome OS 57 ELPA21 Recorder Issue

Chrome OS 57 was released on March 23, 2017. AIR's policy is to officially support new versions of Chrome OS after fully completing quality assurance testing. This testing is still ongoing, and Chrome OS 57 is therefore not yet approved for administering any assessments.

During quality assurance testing, AIR identified an issue with the voice recorder that impacts the speaking segment of ELPA21. It is currently unknown whether this is the same issue that occurred with Chrome OS 56 and was resolved with patch number 56.0.2924.110. The issue that impacted Chrome OS 56 only affected devices with AMD processors, but the issue impacting Chrome OS 57 is affecting devices with both AMD and Intel processors. Schools and districts using the Chrome operating system should continue to administer ELPA21 tests on Chrome OS 56 using patch number 56.0.2924.110 until a fix for Chrome OS 57 is deployed and the operating system is fully supported.

AIR recommends that all schools that administer ELPA21 tests on Chromebooks take a practice test on the model of Chromebook they are using and verify that ELPA21 Speaking records correctly before administering the test to students.

An update on Chrome OS 57 support will be provided by April 4.

Question & Answer
ANSWERS TO COMMON QUESTIONS FROM THE FIELD

Question: Is my student able to skip questions on the Smarter Balanced assessment?

Answer: Students may not skip items on any assessment. For items that are part of an item group, while the student may respond to the items on the screen out of order, the student will still be required to respond to all items in the item group before moving on to the next screen. For example, if questions 5-8 are part of an item group and the student answers 5, 7, and 8, they will not be notified that they skipped item 6 until they try to advance to the next screen.
