OREGON ASPARAGUS

Asparagus was first cultivated about 2,500 years ago in Greece. "Asparagus" is a Greek word, meaning stalk or shoot.

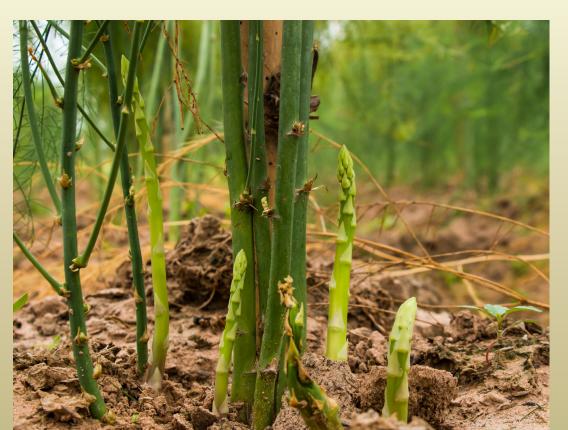

In ancient times, asparagus was considered an aphrodisiac.

NUTRIENTS FOUND IN ASPARAGUS

- Asparagus is an excellent source of vitamin K, which is important for healthy blood and strong bones.
- Asparagus is a good source of vitamin A, which is important for good eyesight and a healthy immune system.
 Asparagus is a good source of folate, which is needed for a healthy pregnancy and helps cells grow and repair.
 Asparagus is a good source of vitamin C, which promotes a healthy immune system, heals cuts and wounds, and helps our bodies fight infection.

Asparagus contains asparagusic acid, which breaks down into sulfurcontaining compounds that give your urine a strong scent. Some people have a gene that doesn't allow them to smell these compounds.

- ~ Asparagus is a good source of thiamin, which is needed to help turn food into energy.
- ~ Asparagus is a good source of fiber, which is good for your heart and healthy digestion.
- ~ Asparagus contains glutathione, an antioxidant that can help destroy carcinogens.

Asparagus spears grow from a crown that is planted about a foot deep and takes two to three years to be ready to harvest. An Asparagus spear can grow 10 inches in 24 hours!
