03010.50 - Fencing Materials – Chain Link Posts

General – ODOT keeps a list of posts used to mount chain link fencing. We allow various shapes and sizes. Our standard is based on AASHTO M181. The fabric and other parts of this system are not listed on the Qualified Products List (QPL) at this time. Refer to the Specifications for details. You can review our Standard Specifications at:

<http://www.odot.state.or.us/techserv/roadway/specs/home.htm>

Our standard Drawing can be found at that Website also. Our requirements for shapes and sizes can be reviewed there.

Specifications:

General Fencing Posts: AASHTO M181
Bridge Protective Fencing: ASTM A53 / A53M Grade B.

Process – Submit the following:

- Preliminary Information for Product Evaluation Form.
- Independent Test Results showing compliance with Specs listed below.
- Spec Data Sheet.
- Detailed drawings showing dimensions, thickness' of coatings, side walls, etc.
- Detailed installation instructions.
- List of Limitations and Precautions.

Submit documentation to:
