

Oregon Department of Transportation

UPDATE 7/18/2016

# NOTICE OF ROAD WORK

## U.S. 395 & U.S. 26 CHIP SEALS

*(Grant County area)*

Beginning around July 28 the Oregon Department of Transportation (ODOT) will be chip sealing an eight-mile-long section of the John Day-Burns Highway (U.S. 395) south of John Day between Canyon Creek Road and the Paulina-Izee Highway junction, mile post 10-C to 18-C. The project is expected to take about three or four days to complete. *See map on back page. (NOTE: Earlier notice indicated project between mile posts 13.4-C to 18-C. Project has been extended to now cover mile post 10-C to 18-C).*

Starting in August chip seal work will also take place along U.S 26 between Mt. Vernon and the junction of OR Hwy. 19 (mile post 124.17–154.03), taking about three weeks to complete. More information will be shared when a start date for this US 26 project is confirmed.

**TRAVEL IMPACTS:** Expect up to 20-minute delays, reduced speeds, loose rock on the roadway, flaggers, and pilot cars directing single lane traffic through the work zones. Minor delays during nighttime/early morning hours for road sweeping. Please slow down and watch for construction activities in the area and plan extra travel time during this highway preservation project.

**REQUEST TO RANCHERS:** To prevent chip rock adhesion problems due to animal waste on the roadway, ODOT is asking ranchers to keep all cattle and other livestock off the work areas of US 395 July 21 through August 2, and US 26 August 1 through 31. Animals can be driven on appropriate open range highway sections after the chip seal has been applied.

*NOTE: Chip seal work is weather dependent. All dates are subject to change, depending on weather condition.*

**SLOW DOWN.  
BETTER ROADS AHEAD.**

*The Way to Go. Transportation Safety — ODOT*

**More information:** Contact ODOT Public Information Officer Tom Strandberg at 541.963-1330, mobile 541.663-6261 email: [Thomas.m.Strandberg@odot.state.or.us](mailto:Thomas.m.Strandberg@odot.state.or.us).
