### **INTRODUCTION**

The Oregon Health Authority (OHA) contracts with managed care organizations, also known as Coordinated Care Organizations (CCOs), to provide health care services. Understanding the experience of people who are Oregon Health Plan (OHP) members is important to clinicians, policy makers, patients and consumers, quality monitors and regulators, provider organizations, health plans, community collaboratives, and those who are responsible for monitoring and evaluating the quality of and access to health care services.

Introduced by the Agency for Healthcare Research and Quality (AHRQ) in the mid-1990s, the Consumer Assessment of Healthcare Providers and Systems (CAHPS) program encompasses the full range of standardized surveys that ask consumers and patients to report on and evaluate their experiences with health care. These surveys cover topics that are important to consumers, such as accessibility of services and communication skills of providers.

OHA conducts annual CAHPS surveys asking consumers and patients to report on and evaluate their experiences with health care. These surveys cover topics that are important to consumers and focus on aspects of quality that consumers are best qualified to assess, such as the communication skills of providers and ease of access to health care services. The survey results help inform decisions for those involved with providing care to OHP members and to improve the quality of health care services.

The survey measures member satisfaction with the experience of care and gives a general indication of how well the health plan meets members' expectations. Surveyed members are asked to rate various aspects of the health plan based on their experience with the plan during the previous 6 months. In addition, the survey collects data on Effectiveness of Care measures, including influenza vaccinations and smoking cessation measures.

### WHAT'S NEW IN 2021

### **2021 SURVEY FIELDING UPDATES**

#### SURVEY INSTRUMENTS

In response to significant changes in consumer behavior during the past year and the accompanying shift in care delivery toward telemedicine, NCQA updated the CAHPS Health Plan Survey to version 5.1H. Several questions were reworded to include any care received "in person, by phone, or by video" during the past six months. References to "seeing a provider" or "visiting a doctor's office or clinic" were removed or replaced with more inclusive language to reflect this expanded array of care settings. To date, NCQA has not issued trending guidelines for the revised questionnaires. OHA adopted these changes for the surveys administered to OHP members.

OHA also implemented additional survey items for the Adult Medicaid version of the survey instrument only to further understand the care experience with telemedicine and the impact of the COVID-19 pandemic.

The race/ethnicity survey items were also relocated to the end of both survey instrument versions and an additional survey item was introduced to identify a member's primary racial or ethnic identity.

### CHILDREN WITH CHRONIC CONDITIONS REPORTING

In order to align with NCQA reporting of CCC results, all children identified as having a chronic condition, as defined by the member's responses to the CCC survey-based screening tool (i.e., Questions Q55 – Q68 in the child survey instrument). A child member is identified as having a chronic condition if all questions for at least one specific health consequence are answered "Yes."

The general population data set and CCC population data set are not mutually exclusive groups. For example, if a child member is selected for the CAHPS child survey sample and is identified as having a chronic condition based on responses to the CCC survey-screening tool, the member is included in general population and CCC population results.

### IMPACT OF COVID-19 ON OHA REPORTING

Citing concerns about the impact of COVID-19 on CAHPS data collection and response rates, as well as the potential for response bias because members were asked to reflect on their health care experiences over the past year while simultaneously living through a pandemic, NCQA issued a general recommendation against using the 2020 benchmarks for improvement scoring and year-over-year trending. In this context, your organization's 2021 survey results and any comparisons to prior-year performance benchmarks should be interpreted with caution.

### **UPDATES TO THE 2021 OHA CAHPS SURVEY RESULTS REPORT**

CSS has made several updates to the 2021 CAHPS Results Reports:

- The Member Profile and Analysis of Plan Ratings by Member Segment section has been updated for revised primary race survey item.
- The CSS Key Driver Model has been updated using CSS's Book-of-Business data collected over the past two years.
- An updated Health Plan Quality Improvement Resource Guide is included.

### **EXECUTIVE SUMMARY**

CSS administered the Adult Medicaid version of the 2021 CAHPS Health Plan Survey for the Oregon Health Authority on behalf of PacificSource - Central Oregon between January 7 and April 7, 2021.

The final survey sample for PacificSource - Central Oregon included 1,150 members. During the survey fielding period, 249 sample members completed the survey. After final survey eligibility criteria were applied, the resulting NCQA response rate was 21.98 percent.

This was the second survey administration cycle taking place during the COVID-19 pandemic. In response to significant changes in consumer behavior during the pandemic and the accompanying shift in care delivery toward telemedicine, NCQA expanded the CAHPS questionnaires to include any care received "in person, by phone, or by video." While NCQA has not provided trending guidelines for the revised questionnaires, in June of 2020 NCQA recommended against using its 2020 CAHPS national benchmarks for improvement scoring and year-over-year trending. In this context, your organization's 2021 survey results and any comparisons to prior-year performance benchmarks should be interpreted with caution.

This Executive Summary focuses on key CAHPS performance metrics, including year-over-year changes in results and comparisons to relevant state Oregon Health Plan benchmarks. Also identified are top organizational priorities for quality improvement based on CSS's *Key Driver Analysis*.

<sup>&</sup>lt;sup>1</sup> For more information, see <a href="https://www.ncqa.org/covid/">www.ncqa.org/covid/</a>

### **RESULTS ON KEY SURVEY MEASURES**

### STATISTICALLY SIGNIFICANT IMPROVEMENTS OR DECLINES COMPARED TO 2020

Reportable Rate IMPROVED	Reportable Rate DECLINED
Getting Care Quickly (by 9.7 points)	No statistically significant declines

### STATISTICALLY SIGNIFICANT DIFFERENCES FROM STATE OREGON HEALTH PLAN

Reportable Rate ABOVE Benchmark	Reportable Rate BELOW Benchmark					
2021 State OHP						
Getting Care Quickly (by 7.4 points)	None					

### TOP PRIORITIES FOR QUALITY IMPROVEMENT

CSS's Key Driver Analysis identifies the areas of health plan performance and aspects of member experience that shape members' overall assessment of their health plan. To the extent that these specific areas or experiences can be improved, the overall rating of the plan should reflect these gains. Up to five quality improvement opportunities with the highest return on investment for PacificSource - Central Oregon are identified below. Effective interventions in these areas have the greatest potential impact on the Rating of Health Plan score.

Top Priorities for Quality Improvement				
1. Improving health plan provider network (highly-rated personal doctors)				
2. Improving member access to care (ease of getting needed care, tests, or treatment)				
3. Improving health plan provider network (highly-rated specialists)				
4. Improving the ability of the health plan customer service to provide necessary information or help				

All results reported in this section are based on the rates of members answering 8, 9 or 10 for the overall rating questions and *Usually* or *Always* for all other CAHPS measures.

The remainder of this report examines these and other findings in greater detail.

### **SURVEY RESULTS AT A GLANCE**

An overview of summary measures is presented in Exhibit 1. This includes CAHPS ratings and composites and comparisons to the state Oregon Health Plan results, and prior year data (where available).

EXHIBIT 1. 2021 PACIFICSOURCE - CENTRAL OREGON ADULT MEDICAID OHA CAHPS SURVEY: RESULTS AT A GLANCE

		Globa	Global Proportions and Question Summary Rates				Valid Responses			
	CAHPS 5.0H Survey Measures	2019		2020		2021	2019	2020	2021	2021 State OHP

(% Always or Usually)	Q4. Got urgent care as soon as needed	82.95%		82.11%		92.05%	88	123	88	83.42% 🛕
(% Always of Osually)	Q6. Got routine care as soon as needed	81.88%		76.54%		86.00%	149	179	150	79.82%
	How Well Doctors Communicate Composite	90.97%		94.70%		95.15%	144	184	145	91.76%
How Well Doctors	Q12. Doctor explained things	94.44%		96.20%		94.44%	144	184	144	92.85%
Communicate*	Q13. Doctor listened carefully	89.58%		94.02%		96.55%	144	184	145	91.98% 🔺
(% Always or Usually)	Q14. Doctor showed respect	89.58%		95.65%		95.17%	144	184	145	92.69%
	Q15. Doctor spent enough time	90.28%		92.93%		94.44%	144	184	144	89.54%
Customer Service	Customer Service Composite	89.09%		93.67%		92.78%	55	102	90	88.12%
(% Always or Usually)	Q24. Provided needed information/help	87.27%		89.32%		88.89%	55	103	90	81.95%
(% Always of Osually)	Q25. Treated with courtesy/respect	90.91%		98.02%		96.67%	55	101	90	94.29%
	Q17. Coordination of Care (% Always or Usually)	86.73%		89.34%		86.73%	98	122	98	83.66%
	Advising Smokers and Tobacco Users to Quit	67.21%		79.17%		69.64%	61	72	56	65.86%
Effectiveness of Care	Discussing Cessation Medications	34.43%		61.43%		44.64%	61	70	56	49.26%
Measures	Discussing Cessation Strategies	36.07%		57.14%		48.21%	61	70	56	43.27%
	Flu Vaccinations for Adults	45.97%		45.53%		39.42%	211	235	208	37.37%

If n is less than 30, "Low n" is displayed next to score.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the denominator threshold (n=30). All statistical tests are conducted at the 95% confidence level prior to rounding. Statistically significant differences between your organization's current-year rate and the comparison rate are marked as  $\triangle$  when your rate is higher or  $\nabla$  when it is lower.

### **ABOUT THIS REPORT**

The key features of this 2021 CAHPS report, prepared by CSS for PacificSource - Central Oregon, are highlighted below.

- Survey results presented in this report were calculated following the NCQA guidelines published in *HEDIS* 2021, *Volume 3: Specifications for Survey Measures* unless otherwise noted. Summary Results are reported regardless of whether the denominator threshold is met, however, any summary measure where the denominator is less than 30 is marked as "Low n".
- Throughout the report, the 2021 PacificSource Central Oregon survey results are compared to the 2021 State OHP. The 2021 State OHP is calculated by pooling Adult Medicaid survey responses across CCOs surveyed by the Oregon Health Authority.
- Executive Summary provides a high-level overview of survey findings. This section highlights the areas where PacificSource Central Oregon performs significantly above or below the state Oregon Health Plan benchmarks. If prior-year survey results are available, any statistically significant improvements or declines on key survey measures are also noted. Top organizational priorities for quality improvement based on CSS's Key Driver Analysis are identified.
- Summary of Survey Results presents the 2021 PacificSource Central Oregon survey scores on key measures, including question summary rates, global proportions, and changes in rates and global proportion scores from the previous year (if applicable); and comparisons to relevant state Oregon Health Plan benchmarks. Statistically significant differences in scores are noted.
- Detailed Performance Charts are provided for the rating questions, composite measures, and individual survey items representing the various CAHPS domains of care. The 2021 PacificSource Central Oregon QSRs and global proportions are compared to the 2021 State OHP on all measures. Where available, a three-year trend in scores is also shown.
- A one-page summary of the *Effectiveness of Care* measures includes comparisons to prior-year results (if available) as well as to the 2021 State OHP rates. All rates are calculated according to the NCQA guidelines, but are presented regardless of their eligibility for NCQA reporting.
- Member Profile and Analysis of Ratings by Member Segment compares the 2021 PacificSource Central Oregon respondent profile to the relevant state Oregon Health Plan distribution(s) of demographic characteristics and utilization variables. Variation in Rating of Health Plan measure by member segment is examined.

- Key Driver Analysis identifies key member experience touch points that appear to drive the overall Rating of Health Plan. The CSS Key Driver Model quantifies the contribution of each key driver to the overall member assessment of the plan. The 2021 PacificSource Central Oregon results on each key driver are compared to the highest score among all the Adult CCOs contributing to the 2021 State OHP, yielding a measure of available room for improvement in each area. The result is then weighted by the key driver's contribution to the overall Rating of Health Plan score. Opportunities for improvement are prioritized based on the expected improvement in the PacificSource Central Oregon Rating of Health Plan score due to improved performance on the key driver measure. A separate section of the report provides some helpful resources for health plan quality improvement.
- The *Appendix* includes:
  - Score calculation guidelines and methodology
  - A glossary of terms
  - A copy of the survey instrument
  - Detailed cross-tabulations of survey responses for every survey question, with additional tables summarizing performance on key survey measures

### SURVEY METHODOLOGY

### SURVEY PROTOCOL AND TIMELINE

CSS administered the Adult Medicaid version of the 2021 CAHPS Health Plan Survey for the Oregon Health Authority on behalf of PacificSource - Central Oregon using a mixed methodology of internet, mail, and telephone. The Oregon Health Authority's mixed methodology consisted of the following milestones:

- A prenotification letter with an invitation to complete the survey online, which was mailed on January 7;
- An initial questionnaire with cover letter, which was mailed on January 13;
- A replacement questionnaire with cover letter, which was mailed on February 11;
- A telephone follow-up phase targeting non-respondents, with up to four telephone follow-up attempts spaced at different times of the day and on different days of the week, which started on March 8; and
- Close of data collection on April 7, 2021.

### **SURVEY MATERIALS**

The survey instruments (both English and Spanish) used for PacificSource - Central Oregon are provided in the Appendix. CSS designed the survey following instructions from OHA and the NCQA specifications detailed in *HEDIS 2021, Volume 3: Specifications for Survey Measures* and *Quality Assurance Plan for HEDIS 2021 Survey Measures*. The materials referred to Oregon Health Plan and included the Oregon Health Authority logo on all the mailing materials.

Each survey package included a postage-paid business reply envelope. Besides the core CAHPS questions, the survey included 44 additional questions added by OHA. These included questions on mobility impairment, cultural competency, access to dental care, telemedicine, COVID-19 and REALD demographics. All mailings included a duplex English and Spanish cover letter. Members received either an English or Spanish survey based on language information provided by Oregon Health Authority. Members had the option to request the survey in the other language using a telephone request line.

The website URL and a personal web ID was listed in the prenotification letter and second survey package cover letter to complete the survey online.

### **SAMPLE SELECTION**

CSS followed Oregon Health Authority's instructions to generate the survey sample for PacificSource - Central Oregon. For the Adult Medicaid survey, sample-eligible members were defined as plan members who were 18 years old or older as of December 31, 2020; were currently enrolled; Sample-eligible members were defined as plan members who were 18 years old or older as of November 30, 2020; were currently enrolled; had been continuously enrolled for six months (with no more than one enrollment break of 45 days or less); and whose primary coverage was through Medicaid.

Prior to sampling, CSS carefully inspected the member file(s) and noted any errors or irregularities found (such as incomplete contact information or subscriber numbers). Once the quality assurance process had been completed, CSS processed member addresses through the USPS National Change of Address (NCOA) service to ensure that the mailing addresses were up to date. The final sample was generated following the NCQA systematic sampling methodology, with no more than one member per household selected to receive the survey. The exception to this rule was any CCO that failed to meet the desired sample size in which case more than one member per household could be selected. CSS assigned each sampled member a unique identification number, which was used to track their progress throughout the data collection process.

The Oregon Health Authority chose to oversample for targeted race and ethnicity groups to ensure these groups were appropriately represented in the state sample. Data for those sample members only appear in the State OHP results and not the individual CCO results. Therefore, the final combined survey sample for PacificSource - Central Oregon included 1,150 members.

### DATA CAPTURE

Returned mail questionnaires were recorded using either manual data entry or optical scanning. Responses recorded via manual data entry were keyed by two independent data entry operators, and any discrepancies between the two response records were flagged and reconciled by a supervisor. Individual responses on surveys recorded via optical scanning were sent to data entry operators if the scanning technology was unable to identify the specific response option selected with a predefined degree of certainty. Responses from online questionnaires were stored on CSS internal servers.

Computer Assisted Telephone Interviewing (CATI) technology was used to electronically capture survey responses obtained during telephone interviews. Members were able to complete the survey in either English or Spanish. CATI supervisors maintained quality control by monitoring the telephone interviews and response capture by interviewers in real time and auditing recorded interviews. At least 10 percent of the interviews were monitored by supervisors.

Due to the multiple outreach attempts, multiple survey responses could be received from the same sample member. In those cases, only one survey response (the most complete survey) was included in the final analysis dataset.

### **MEMBER DISPOSITIONS AND RESPONSE RATE**

During the survey fielding period, 249 sample members completed the survey. After final survey eligibility criteria were applied, the resulting NCQA response rate was 21.98 percent. Additional detail on sample member status at the end of data collection (dispositions) is provided in Exhibit 2.

EXHIBIT 2. 2021 PACIFICSOURCE - CENTRAL OREGON ADULT MEDICAID OHA CAHPS SURVEY: SAMPLE MEMBER DISPOSITIONS AND RESPONSE RATE

	To		
Disposition	Number	% Initial Sample	2021 State OHP
Initial Sample	1,150	100.00%	
Disposition			
Complete and Eligible - Mail	174	15.13%	16.36%
Complete and Eligible - Phone	61	5.30%	6.19%
Complete and Eligible - Internet	14	1.22%	1.77%
Complete and Eligible - Total	249	21.65%	24.32%

31530

<sup>\*</sup>Response rate = Complete and Eligible Surveys/[Complete and Eligible + Incomplete (but Eligible) + Refusal + Nonresponse after maximum attempts + Added to Do Not Call (DNC) List]

### SATISFACTION WITH THE EXPERIENCE OF CARE

### PATIENT EXPERIENCE OF CARE MEASURES

### **GLOBAL RATINGS**

CAHPS Health Plan Survey (version 5.1H) includes four global rating questions that utilize the scale of 0 to 10, representing the lowest and highest possible rating. Results are reported as the proportion of members selecting one of the top three ratings (8, 9, or 10).

- Rating of Personal Doctor (0 = worst personal doctor possible; 10 = best personal doctor possible)
- Rating of Specialist Seen Most Often (0 = worst specialist possible; 10 = best specialist possible)
- Rating of All Health Care (0 = worst health care possible; 10 = best health care possible)
- Rating of Health Plan (0 = worst health plan possible; 10 = best health plan possible)

### **CAHPS COMPOSITES**

NCQA calculates results for several CAHPS composite measures. CAHPS composites combine results from related survey questions into a single measure to summarize health plan performance in the areas listed below.

- **Getting Needed Care** combines two survey questions that address member access to care. Both questions use a *Never, Sometimes, Usually*, or *Always* response scale, with *Always* being the most favorable response. Results are based on the proportion of members answering the following questions as *Usually* or *Always*.
  - In the last 6 months, how often was it easy to get the care, tests, or treatment you needed?
  - In the last 6 months, how often did you get an appointment to see a specialist as soon as you needed?

- **Getting Care Quickly** combines responses to two survey questions that address timely availability of both urgent and check-up/routine care. The questions use a *Never*, *Sometimes*, *Usually*, or *Always* scale, with *Always* being the most favorable response. Results are based on the proportion of members selecting *Usually* or *Always* in response to the following questions:
  - In the last 6 months, when you needed care right away, how often did you get care as soon as you needed?
  - In the last 6 months, how often did you get an appointment for a check-up or routine care as soon as you needed?
- **How Well Doctors Communicate** combines responses to four survey questions that address physician communication. The questions use a *Never*, *Sometimes*, *Usually*, or *Always* scale, with *Always* being the most favorable response. Results are reported as the proportion of members answering the following questions as *Usually* or *Always*:
  - In the last 6 months, how often did your personal doctor explain things in a way that was easy to understand?
  - In the last 6 months, how often did your personal doctor listen carefully to you?
  - In the last 6 months, how often did your personal doctor show respect for what you had to say?
  - In the last 6 months, how often did your personal doctor spend enough time with you?
- **Customer Service** combines responses to two survey questions that ask about member experience with the health plan's customer service. The questions use a *Never*, *Sometimes*, *Usually*, or *Always* scale, with *Always* being the most favorable response. Results are reported as the proportion of members selecting *Usually* or *Always* in response to the following questions:
  - In the last 6 months, how often did your health plan's customer service staff give you the information or help you needed?
  - In the last 6 months, how often did your health plan's customer service staff treat you with courtesy and respect?
- Coordination of Care is based on a single survey question, which uses a Never, Sometimes, Usually, or Always scale (with Always being the most favorable response). Results are based on the proportion of members selecting Usually or Always in response to the question below:
  - In the last 6 months, how often did your personal doctor seem informed and up-to-date about the care you got from these doctors or other health providers?

### CALCULATION AND REPORTING OF RESULTS

### QUESTION SUMMARY RATES AND COMPOSITE GLOBAL PROPORTIONS

**Question Summary Rates** express the proportion of respondents selecting the desired response option(s) on a survey question. Examples include percent selecting *Usually* or *Always* or percent rating 9 or 10.

**Composite Global Proportions** express the proportion of respondents selecting the desired response option(s) from a predefined set of two or more related questions on the survey. The proportions are calculated by first determining the relevant proportion on each survey question contributing to the composite and then averaging these proportions across all questions in the composite.

Throughout the report, all question summary rates and composite global proportions are rounded to two decimal places for display purposes (e.g., 0.23456 is displayed as 23.46%). However, all calculations involving rates and proportions, including statistical significance testing, are carried out prior to rounding. For more details on the calculations please refer to *HEDIS 2021*, *Volume 3: Specifications for Survey Measures* or consult Appendix A.

### **DENOMINATOR THRESHOLD**

The denominator for an individual question is the total number of valid responses to that question. The denominator for a composite is the average number of responses across all questions in the composite (note: composite denominators are rounded for display purposes). If the rate denominator is less than 30, a measure result of "Low n" was assigned. This report presents results for all measures, regardless of denominator size. Any result that does not meet the denominator threshold of 30 valid responses is denoted with "Low n" to inform interpretations of results.

#### COMPARISONS TO BENCHMARKS AND PRIOR-YEAR RESULTS

Throughout the report, the 2021 PacificSource - Central Oregon results are compared to the 2021 State OHP as well as to the highest and lowest performing CCO. The 2021 State OHP is calculated by pooling Adult Medicaid survey responses across CCOs surveyed by the Oregon Health Authority.

If available, prior-year survey results are provided for comparison and year-to-year changes in results are tested for statistical significance. All the statistical tests are carried out at the 95% confidence level (i.e., there is a 95% probability that the observed difference is not due to chance).

### **SUMMARY OF SURVEY RESULTS**

Exhibit 3 provides a high-level PacificSource - Central Oregon performance overview on key survey measures. These include overall ratings, composite global proportions, and summary rates for additional measures. Where applicable, changes in scores over time and comparisons to benchmarks are reported and tested for statistical significance.

EXHIBIT 3. 2021 PACIFICSOURCE - CENTRAL OREGON ADULT MEDICAID OHA CAHPS SURVEY: PATIENT EXPERIENCE MEASURES

		Difference	** between 2021 Rate and			
CAHPS 5.0H Survey Measures*	2021 Rate	2020 Rate	2019 Rate	2021 State OHP

Coordination of Care	86.73%	-2.61%	0.00%	3.08%		

3 153

<sup>\*</sup> Results were calculated following NCQA specifications and prior year results may differ from those previously reported.

<sup>\*\*</sup> Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the small denominator threshold (n=30). All differences in rates are calculated prior to rounding and are rounded for display purposes only. All statistical tests are conducted at the 95% confidence level. Statistically significant differences between your organization's current-year rate and the comparison rate are marked as when your current-year rate is higher or when it is lower.

### **DETAILED PERFORMANCE CHARTS**

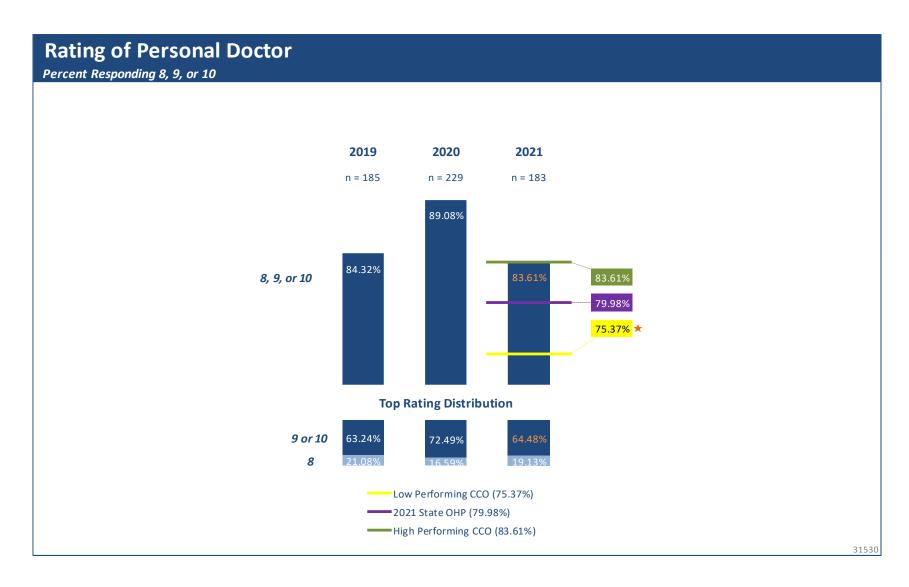

Detailed charts are provided for CAHPS composite global proportions and question summary rates. The charts have the following features:

### TREND IN RESULTS

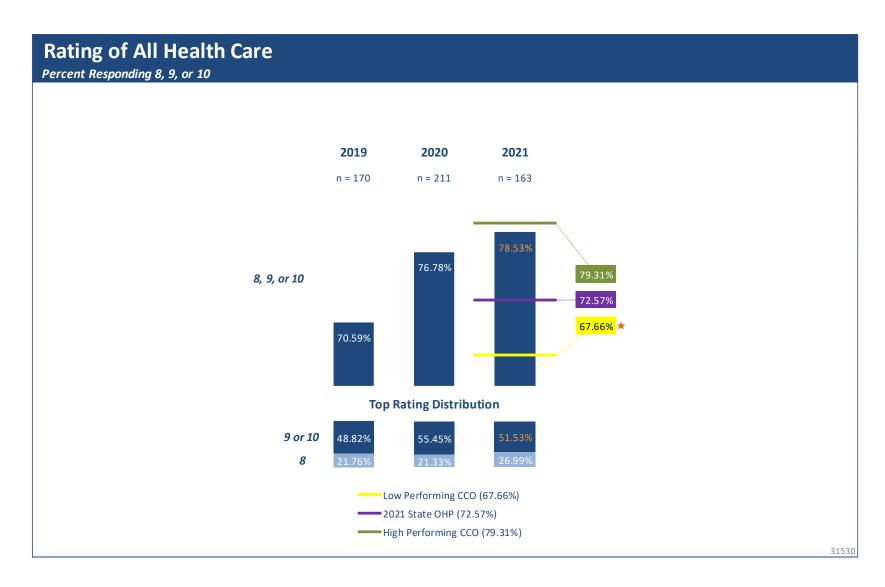

- Survey scores are trended over three consecutive years of data collection, if available. A result may not be available if the survey was not administered in a given year, if the measure is new, or if the measure is not deemed appropriate for trending. In such cases, "no data" appears in place of the score.
- Where appropriate, changes in the distribution of favorable ratings over time are shown in the *Top Rating Distribution* panel of the chart (i.e., percent responding 8 vs. percent responding 9 or 10, or percent responding *Usually* vs. percent responding *Always*).
- The number of valid responses (*n*) appears above each bar. If the number of responses is less than 30, "Low n" appears next to the value of *n*, indicating that the result does not meet the denominator threshold. CSS calculates all rates regardless of this threshold.
- Statistical comparisons are conducted between the current-year and each of the prior-year rates, if available. Differences in rates are tested for statistical significance at the 95% confidence level. Statistically significant differences are indicated with a ★ symbol next to the comparison score. For example, ★ appearing next to the 2020 rate denotes a statistically significant difference between the 2021 and 2020 rates.

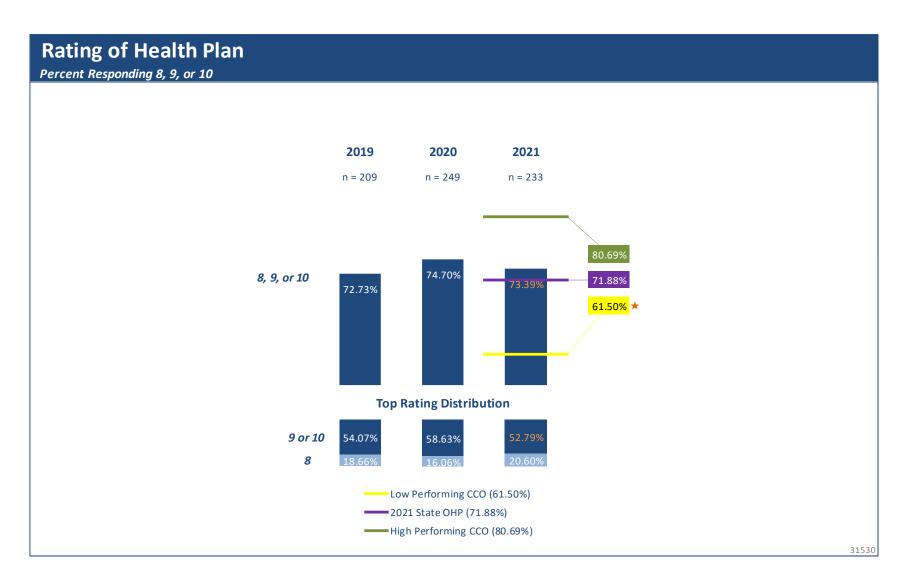

### COMPARISONS TO BENCHMARKS

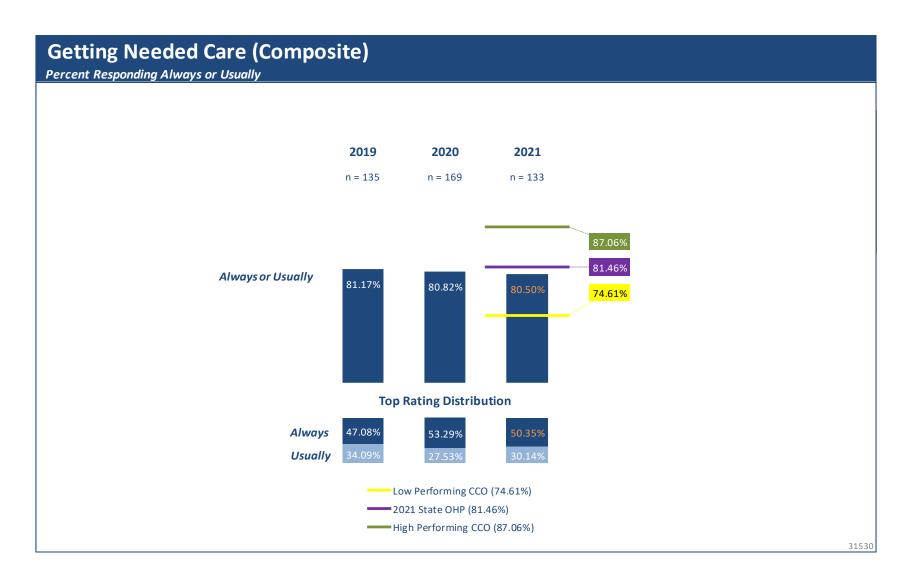

• The horizontal lines displayed on the charts correspond to the 2021 State OHP as well as to the highest and lowest performing CCO. If the 2021 score is significantly different from any of these benchmark scores at the 95% confidence level, \* appears next to the relevant score.

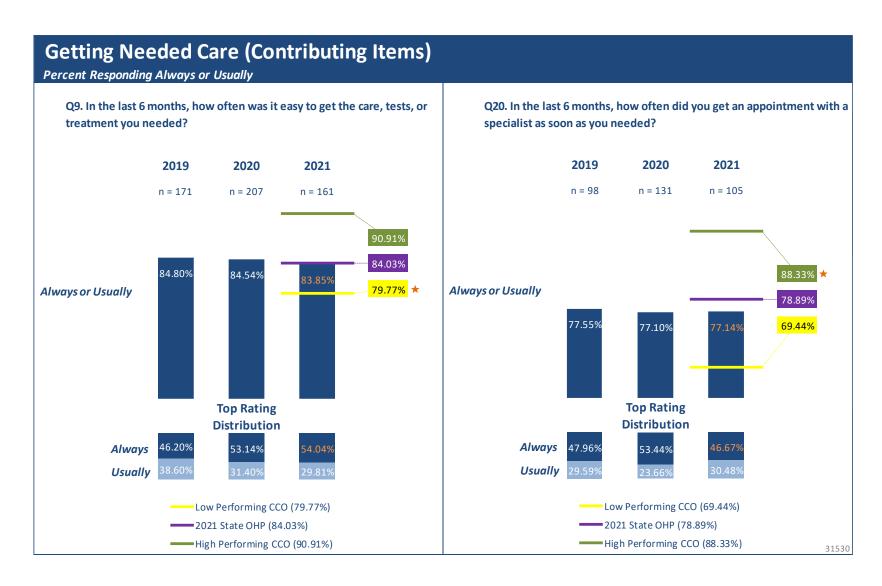

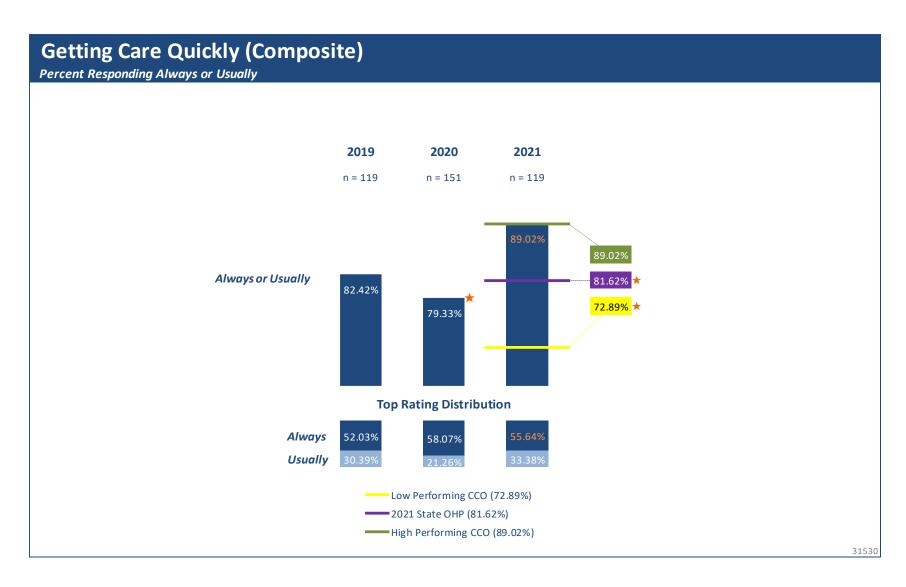

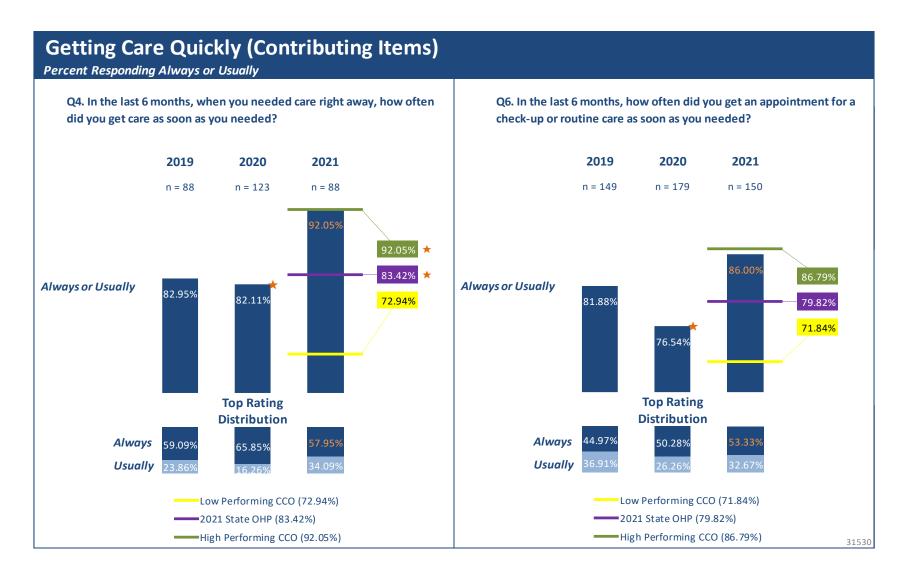

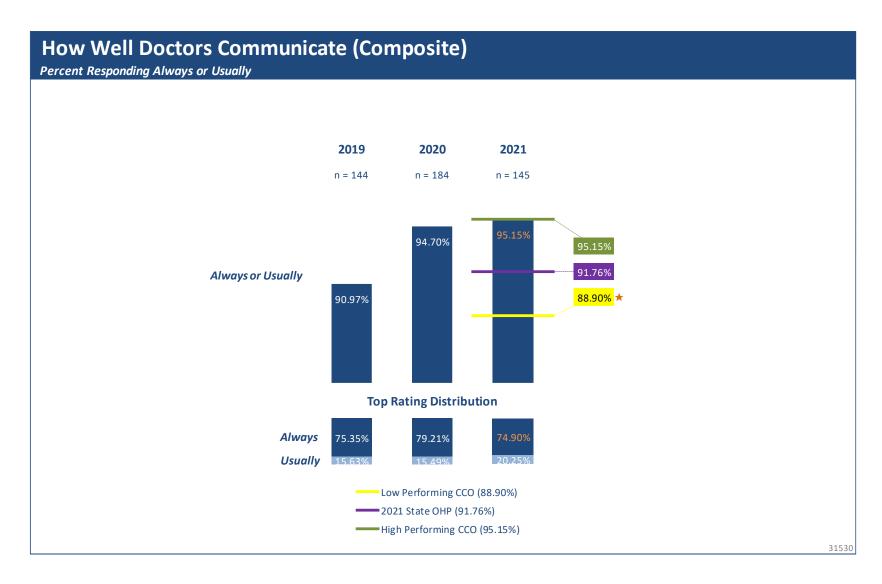

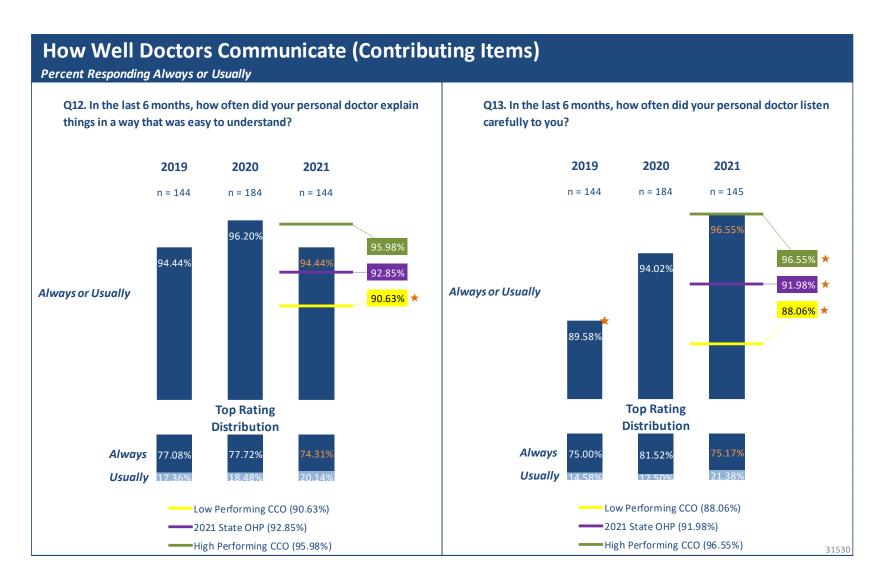

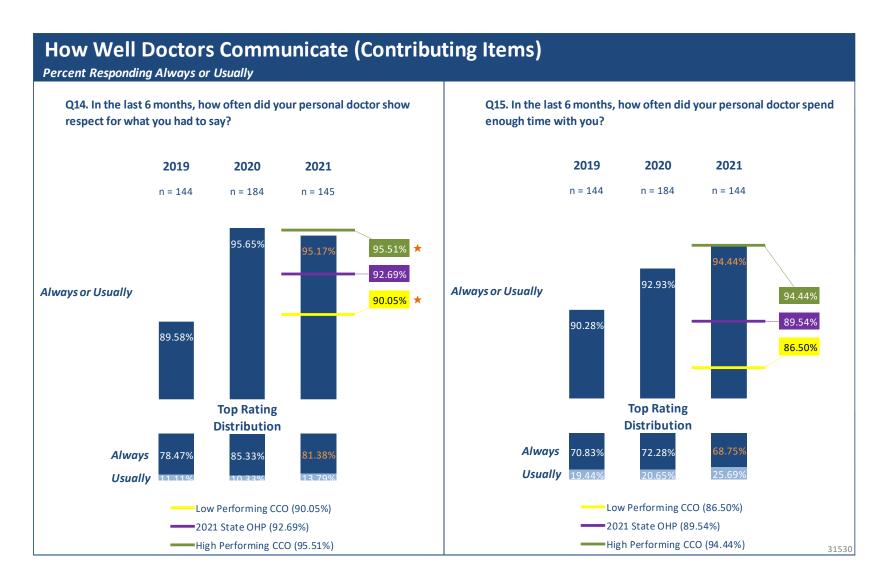

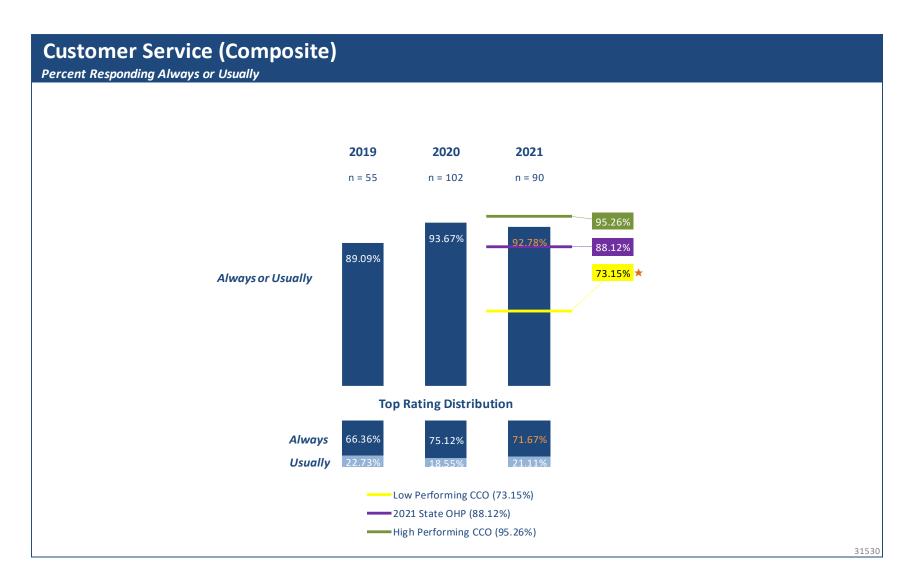

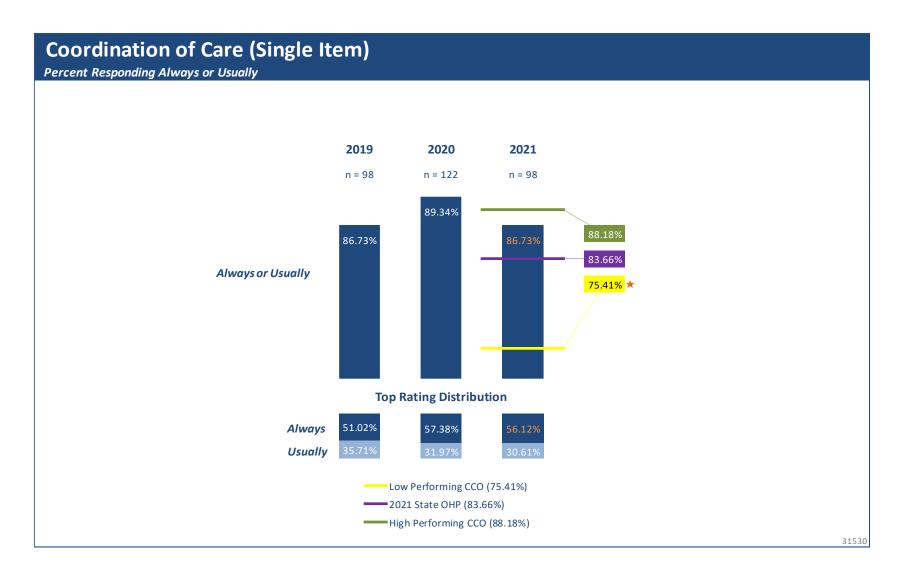

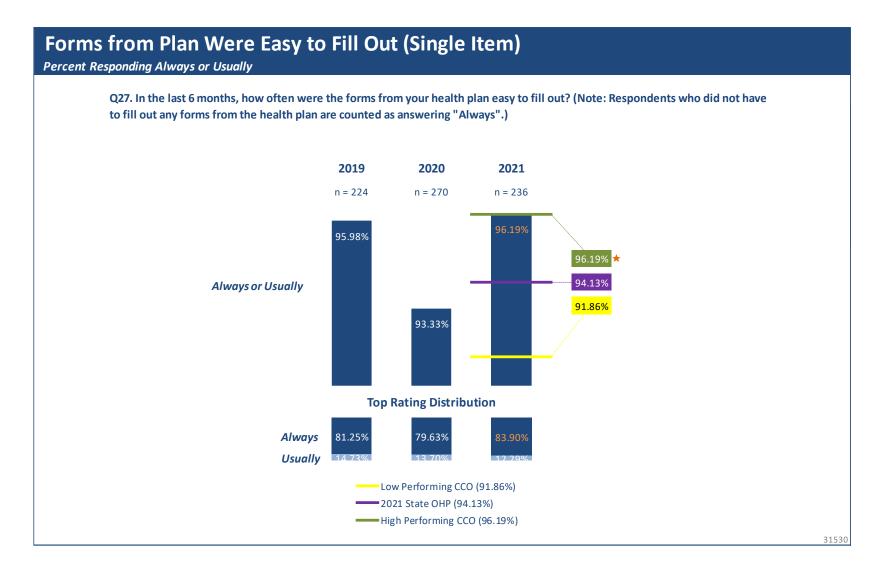

#### **Customer Service (Contributing Items) Percent Responding Always or Usually** Q24. In the last 6 months, how often did your health plan's customer Q25. In the last 6 months, how often did your health plan's customer service give you the information or help you needed? service staff treat you with courtesy and respect? 2019 2020 2021 2019 2020 2021 n = 101n = 55 n = 103n = 90n = 55 n = 9098.02% 94.29% 96.679 83.33% 91.58% ★ 90.91% 89.32% 87.27% 81.95% Always or Usually **Always or Usually** 62.96% **Top Rating Top Rating** Distribution Distribution 58.18% Always 61.11% 63.11% 74.55% Always 87.13% Usually Usually 16.36% Low Performing CCO (83.33%) Low Performing CCO (62.96%) -2021 State OHP (94.29%) -2021 State OHP (81.95%) High Performing CCO (91.58%) ----High Performing CCO (98.95%) 31530

Tests of statistical significance were conducted for the following reportable rates: (Always + Usually) and Always. Statistically significant differences, tested at the 95% confidence level, between your organization's current-year rate and a comparison rate (prior-year, or national rate) are marked with a  $\frac{1}{2}$  symbol next to the comparison rate.

### **EFFECTIVENESS OF CARE**

The Effectiveness of Care domain applies to adult health plan members only and includes the following measures: Flu Vaccinations for Adults Ages 18–64 (FVA) and Medical Assistance with Smoking and Tobacco Use Cessation (MSC). The MSC measure is based on two years of data collection and is calculated using the NCQA rolling average methodology. The FVA measure is a single-year rate. A brief description of each measure, as it appears in HEDIS 2021, Volume 3:

Specifications for Survey Measures, Section 2: Effectiveness of Care, is reproduced below. Please refer to Volume 3 for additional information on the measures, including rolling average calculation methodology and NCQA reporting rules.

### **EFFECTIVENESS OF CARE MEASURES**

### FLU VACCINATIONS FOR ADULTS AGES 18-64 (FVA)

Flu Vaccinations for Adults represents the percentage of members 18–64 years of age who received a flu vaccination between July 1 of the measurement year and the date when the survey was completed.

### MEDICAL ASSISTANCE WITH SMOKING AND TOBACCO USE CESSATION (MSC)

The following components of this measure assess different facets of providing medical assistance with smoking and tobacco use cessation:

- Advising Smokers and Tobacco Users to Quit a rolling average rate represents the percentage of current smokers or tobacco users who received advice to quit during the measurement year.
- Discussing Cessation Medications a rolling average rate represents the percentage of current smokers or tobacco users who discussed or were recommended cessation medications during the measurement year.
- Discussing Cessation Strategies a rolling average rate represents the percentage of current smokers or tobacco users who discussed or were provided cessation methods or strategies during the measurement year.

### **EFFECTIVENESS OF CARE RESULTS**

Exhibit 4 provides a summary of PacificSource - Central Oregon results on HEDIS *Effectiveness of Care* measures. Comparisons to prior-year rates (if available) as well as to the 2021 State OHP rates with statistical significance tests are included.

EXHIBIT 4. 2021 PACIFICSOURCE - CENTRAL OREGON ADULT MEDICAID OHA CAHPS SURVEY: EFFECTIVENESS OF CARE MEASURES

		Difference** between 2021 Rate and		
Effectiveness of Care Measures*	2021 Rate	2020 Rate	2021 State OHP	
Flu Vaccinations for Adults (FVA)				
Flu Vaccinations for Adults	39.42%	-6.11%	2.05%	
Medical Assistance with Smoking and Tobacco Use Cessation	(MSC)			
Advising Smokers and Tobacco Users to Quit	69.64%	-9.52%	3.78%	
Discussing Cessation Medications	44.64%	-16.79%	-4.61%	
Discussing Cessation Strategies	48.21%	-8.93%	4.94%	

31530

<sup>\*</sup> Effectiveness of Care results were calculated by CSS following NCQA specifications with the exception that rates for the MSC measure were calculated using a single year rate methodology.

<sup>\*\*\*</sup> Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the denominator threshold (n=30). All differences in rates are calculated prior to rounding and are rounded for display purposes only. All statistical tests are conducted at the 95% confidence level. Statistically significant differences between your organization's current-year rate and the comparison rate are marked as when your rate is higher or when it is lower.

#### MEMBER PROFILE AND ANALYSIS OF RATINGS BY MEMBER SEGMENT

This section of the report presents a detailed profile of the PacificSource - Central Oregon membership. In addition to member demographics and health status, responses to survey items that assess utilization of healthcare services are included.

A CCO's membership mix is shaped by multiple factors, most of which are beyond the scope of this survey. These include benefit design, geography, availability of health plan choices, and member self-selection into products that best meet their needs. CSS's analysis of industry data suggests that there is considerable variation in member demographic makeup and utilization patterns across plans. To the extent that various member segments have distinct healthcare needs, utilization patterns, expectations, experiences, as well as attitudes and perceptions, their assessments of the *same* health plan will likely differ.

Certain member characteristics (e.g., health status) appear to be directly related to differences in healthcare needs and utilization levels. For example, some plans have predominantly healthy members, whose interactions with care providers and the plan tend to be limited. By contrast, other plans serve populations with higher rates of illness. These members tend to have more frequent encounters with the healthcare system and as a result may become more experienced users of health plans. The ways in which members use the plan, the frequency of their interactions with providers and staff, and their overall level of familiarity with how the plan works may affect ratings.

In addition to health care needs and utilization patterns, demographic characteristics have been shown to influence survey responses. For example, all else being equal, older respondents and members of certain ethnic groups (e.g., Hispanic or Latino respondents) tend to rate their health care providers and plans more positively. By contrast, more educated members rate more critically, regardless of age or ethnicity.

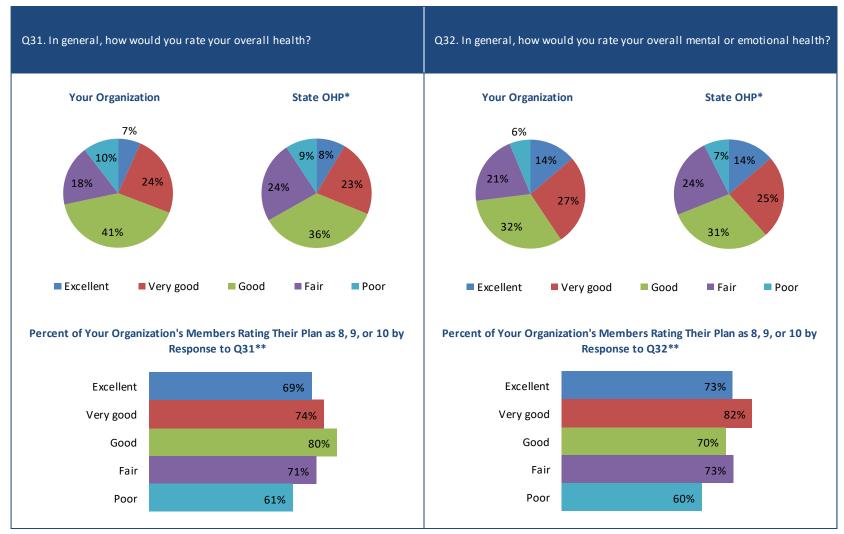

While the interplay between these membership variables (often referred to as the plan's "case mix") and health plan ratings is complex, health plan ratings clearly vary across demographic groups and user segments. Understanding the plan's case mix can help managers to gain insight into possible sources of this variation.

The charts on the following pages compare the PacificSource - Central Oregon membership profile to the relevant state Oregon Health Plan benchmark distribution on demographic characteristics and utilization patterns. The pie chart in the upper half of each panel contrasts the distribution of the PacificSource - Central Oregon membership on a given member attribute (e.g., gender, education level, number of doctor visits, etc.) with the 2021 state Oregon Health Plan distribution on the same attribute. The bar chart in the lower half of each panel shows how the overall rating of the plan varies by member segment.

## **HEALTH STATUS AND DEMOGRAPHICS**

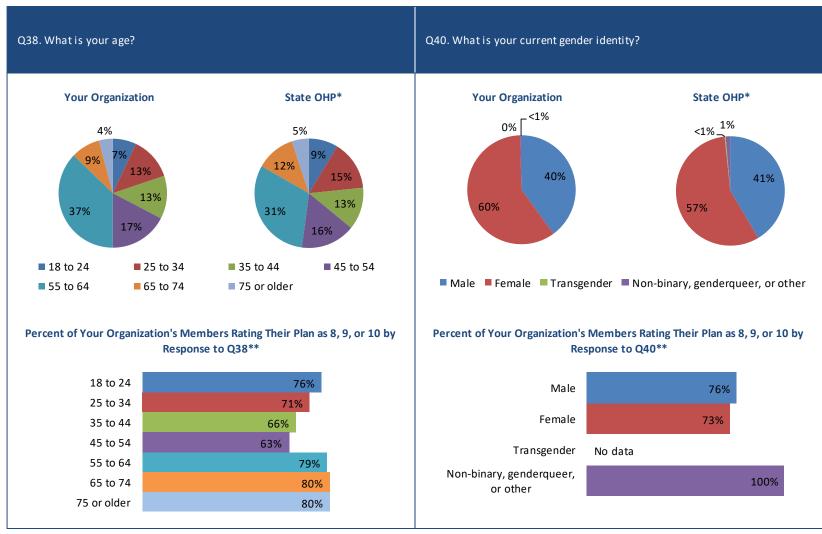

The following characteristics are profiled in this section:

- Respondent's self-reported health status
- Respondent's self-reported mental or emotional health status
- Respondent's age
- Respondent's current gender identity
- Respondent's education level
- Respondent's primary racial or ethnic identity

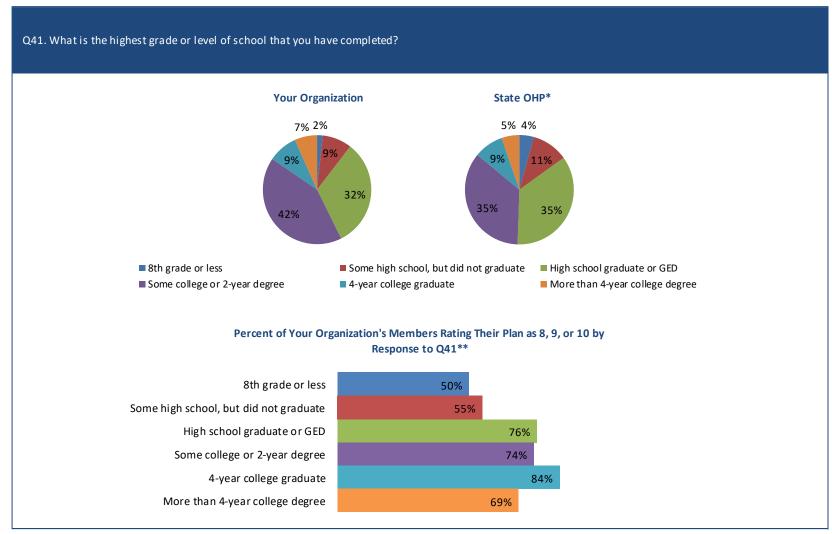

<sup>\*</sup> Represents the combined distribution of responses to this question for all plans included in the 2021 State OHP.

<sup>\*\*</sup> Includes members who answered the question and provided a valid response to Q28 (Rating of Health Plan). "No data" appears in place of the score if none of the group respondents provided a valid response to Q28 or if no one rated the plan as 8, 9, or 10.

<sup>\*</sup> Represents the combined distribution of responses to this question for all plans included in the 2021 State OHP.

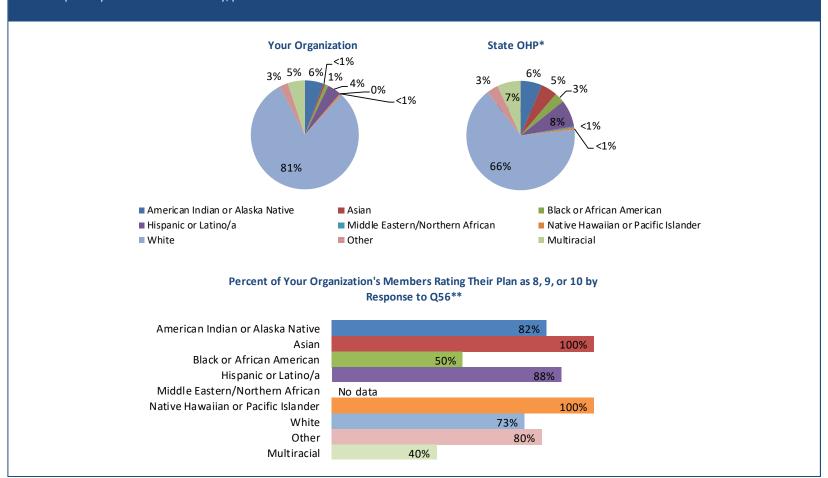

<sup>\*\*</sup> Includes members who answered the question and provided a valid response to Q28 (Rating of Health Plan). "No data" appears in place of the score if none of the group respondents provided a valid response to Q28 or if no one rated the plan as 8, 9, or 10.

<sup>\*</sup> Represents the combined distribution of responses to this question for all plans included in the 2021 State OHP.

<sup>\*\*</sup> Includes members who answered the question and provided a valid response to Q28 (Rating of Health Plan). "No data" appears in place of the score if none of the group respondents provided a valid response to Q28 or if no one rated the plan as 8, 9, or 10.

Q56. If you selected more than one racial or ethnic identity above, please CIRCLE the ONE that best represents your racial or ethnic identity. If you have more than one primary racial or ethnic identity, please check here.

Note: all percentages are rounded for display. Rating of Health Plan score should be interpreted with caution if the size of the group (pie slice) is small.

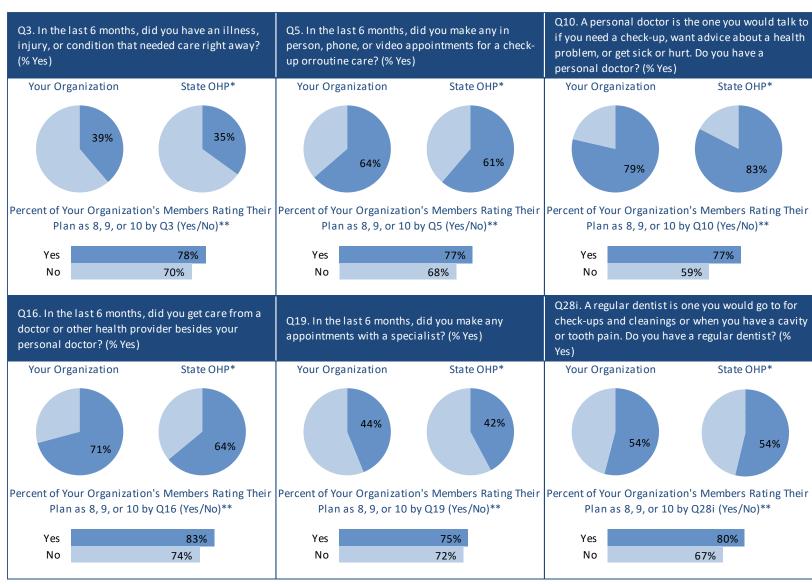

<sup>\*</sup> Represents the combined distribution of responses to this question for all plans included in the 2021 State OHP.

<sup>\*\*</sup> Includes members who answered the question and provided a valid response to Q28 (Rating of Health Plan). "No data" appears in place of the score if none of the group respondents provided a valid response to Q28 or if no one rated the plan as 8, 9, or 10.

## **USE OF SERVICES**

The following utilization measures are included in this section:

- Seeking urgent care
- Making appointments for routine care
- Having a personal doctor
- Receiving care from a provider other than personal doctor
- Making an appointment to see a specialist
- Having a regular dentist
- Number of visits to a doctor's office or clinic
- Number of specialists seen

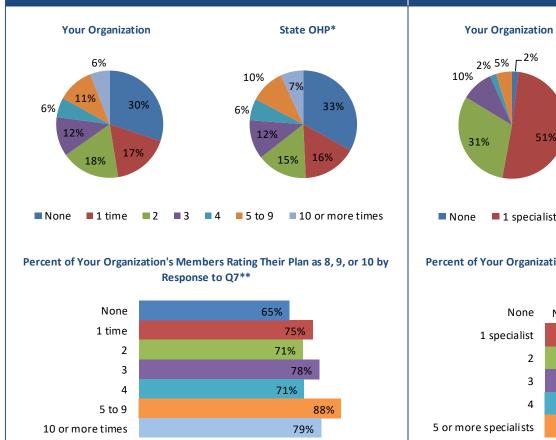

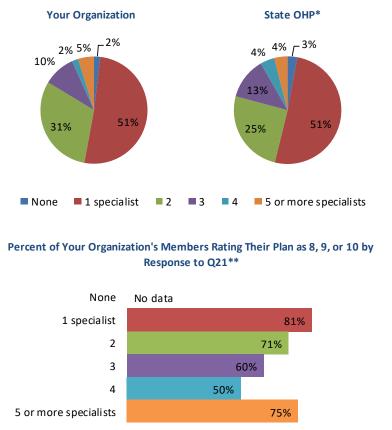

<sup>\*</sup> Represents the combined distribution of responses to this question for all plans included in the 2021 State OHP.

<sup>\*\*</sup> Includes members who answered the question and provided a valid response to Q28 (Rating of Health Plan). "No data" appears in place of the score if none of the group respondents provided a valid response to Q28 or if no one rated the plan as 8, 9, or 10.

Q7. In the last 6 months, not counting the times you went to an emergency room, how many times did you get health care for yourself in person, by phone, or by video

Q21. How many specialists have you talked to in the last 6 months? (Note: the question applies only to those respondents who had appointments with specialists.)

 $Note: all\ percentages\ are\ rounded\ for\ display.\ \textit{Rating\ of\ Health\ Plan}\ \ score\ should\ be\ interpreted\ with\ caution\ if\ the\ size\ of\ the\ group\ (pie\ slice)\ is\ small.$ 

<sup>\*</sup> Represents the combined distribution of responses to this question for all plans included in the 2021 State OHP.

<sup>\*\*</sup> Includes members who answered the question and provided a valid response to Q28 (Rating of Health Plan). "No data" appears in place of the score if none of the group respondents provided a valid response to Q28 or if no one rated the plan as 8, 9, or 10.

#### **KEY DRIVER ANALYSIS**

#### **OBJECTIVES**

CSS's Key Driver Analysis (KDA) highlights some of the key differences between high- and low-rated health plans at the industry level. The principal objectives of the KDA are:

- To isolate a set of plan attributes, or key drivers, that distinguish high-rated plans from low-rated plans
- To highlight industry best practices on the key driver measures
- To compare the current performance of PacificSource Central Oregon to industry best practices in these areas
- To estimate the impact of improving performance on these measures on the Rating of Health Plan measure

#### **TECHNICAL APPROACH**

#### **INDUSTRY VIEW**

Industry-level analysis, which uses health plans as units of analysis, has several important advantages compared to the alternative approach, which focuses on member experiences within a single plan. Certain plan attributes are strongly related to member satisfaction at the industry level. However, these relationships may be missed if we focus on only one plan at a time. For example, it has been shown that plans that are rated highly on measures of access and availability of care tend to have high overall ratings. Conversely, poor access scores are associated with low overall plan scores. This relationship is clear when ratings are compared across plans. However, within a specific plan, member experiences may not be sufficiently varied to reveal the underlying relationship. That is, if all members are equally dissatisfied with access to care, this measure will show a misleadingly low correlation with the overall rating of the plan. As a result, the plan may underestimate the key role of access to care as a driver of member satisfaction and miss a critical opportunity for improvement.

In addition, expressing every CAHPS survey variable as a plan-level rate yields a complete and rich information set on each plan. This effectively eliminates any "gaps" in respondent-level data from a single plan caused by survey skip patterns and allows every response to be used in the analysis.

Finally, in addition to the standard CAHPS performance measures, other sources of differences between health plans can be explored, increasing the explanatory power of the model and allowing for more precise estimation of the individual key driver effects. These include experience rates, which are based on responses to the CAHPS screener questions. Screeners establish whether a member had a particular type of experience or interaction with the plan (e.g.,

contacted customer service, submitted a claim, etc.). CSS's analysis shows that these experience indicators explain a significant portion of the plan's overall satisfaction score. Additional components of the overall score include utilization rates and demographic characteristics of the plan's membership, addressed in more detail in the *Member Profile and Analysis of Plan Ratings by Member Segment* section of this report. Clearly, from the plan's perspective, some of these factors are more actionable than others. However, to yield an accurate model of key drivers of member satisfaction, the analysis must consider all measurable influences on the overall rating of the plan.

#### IMPACT OF COVID-19 ON KEY DRIVER MODEL DEVELOPMENT AND RESULTS

Historically, CSS has relied on publicly available CAHPS survey data for insight into sources of variation in consumer ratings of health plans. Because NCQA did not release CAHPS results on individual health plans last year, CSS used its own Book-of-Business data collected during the past two survey cycles (2020 and 2021) as a substitute for the industry-wide dataset. Since the onset of the COVID-19 pandemic, countless factors have contributed to the evolution of the U.S. healthcare system, drastically influencing member experience and reshaping the performance measurement environment. The past two years have seen wide regional variation in infection rates, stay-at-home orders, mask mandates, and vaccine availably; systemic shifts in consumer and provider behavior; and changes in member interactions and experiences with the healthcare system. Variation in survey vendor practices in response to the pandemic as well as health plan decisions regarding survey protocols have further complicated the task of performance measurement. Importantly, the CAHPS survey instrument itself has been modified between 2020 and 2021 to account for the increased adoption of telemedicine tools during the pandemic. Since we do not have a way of quantifying these factors at the member or health plan level, our analysis of the key drivers of member experience is inherently limited.

The 2021 CSS *Key Driver Model* was developed using our 2020–2021 Book-of-Business plan-level dataset of Medicaid CAHPS survey results. The dataset comprised all Medicaid plans surveyed by CSS in 2020 and 2021, for a total of 277 observations. CSS performed regression analysis of health plan ratings to identify sources of variation in overall scores across the industry spectrum, using individual health plans as units of analysis. Regression analysis expresses mathematically the relationship between plan attributes (predictors) and the global *Rating of Health Plan* score, controlling for interdependencies among the predictors and other factors that may influence ratings (e.g., member demographics, utilization patterns, etc.). Predictors were chosen carefully to yield a model that is both meaningful and actionable from the health plan's point of view.

All of the plan variables, including potential drivers of member experience (i.e., variables that the plan may consider actionable) and control variables (member demographics, health status, utilization rates, product type, and year of data collection) were entered into the regression model, and the independent contribution of each variable was estimated. As in the past, CSS excluded *Rating of All Health Care* from the list of predictors, both because of its high correlation with *Rating of Health Plan* and the presence of other survey items that measure more specific aspects of member experience. If included, *Rating of all Health Care* would account for a large portion of the variance and confound coefficient estimates for the remaining variables in the model.

#### INDUSTRY KEY DRIVER MODEL

The table below lists four key drivers of Medicaid member experience in order of importance, from highest to lowest, based on their relative contribution to the *Rating of Health Plan* score. These variables have statistically significant coefficients in the regression model (*p*-value < 0.05). Performance on these variables, together with the control variables, explains 72 percent of the industry variation in Medicaid health plan ratings. Note that this ordering reflects *only* the strength of the overall relationship between each key driver and the health plan score at the industry level. It does not consider how PacificSource - Central Oregon is <u>currently</u> performing on these measures. Improvement targets identified specifically for PacificSource - Central Oregon, which consider both the strength of the key driver and the current level of performance in the area, are presented graphically in the next section.

Medicaid member ratings of the plan are strongly related to members' ability to get the care they need when they need it (Q9). Being able to obtain needed information from customer service (Q24) and access to highly rated providers (Q18 and Q22) are all significant drivers of member experience.

Key Driver	Interpretation
Q18. Rating of Personal Doctor (percent 9 or 10)	The higher the proportion of members rating their personal doctor as $\it 9$ or $\it 10$ , the higher the overall plan score
Q9. Ease of getting needed care, tests, or treatment (percent <i>Usually or Always</i> )	The higher the proportion of plan members reporting that the necessary care, tests, or treatment were easy to get, the higher the overall plan score
Q22. Rating of Specialist Seen Most Often (percent 9 or 10)	The higher the proportion of members rating their specialist as $\it 9$ or $\it 10$ , the higher the overall plan score
Q24. Health plan customer service provided needed information or help (percent <i>Usually or Always</i> )	The higher the proportion of members who were able to get the information or help they needed from customer service, the higher the overall plan score

#### **OPPORTUNITIES FOR PLAN QUALITY IMPROVEMENT**

Specific improvement opportunities for PacificSource - Central Oregon are presented in Exhibit 5. The ordering reflects both the strength of each key driver in the broad industry context and how PacificSource - Central Oregon is currently performing on the measure.

The middle panel of the chart compares how PacificSource - Central Oregon is performing compared to the *best practice* score on each key driver. CSS defined the best practice score as the highest score among all the Adult CCOs contributing to the 2021 State OHP. Room for improvement, represented by the green arrows on the chart, is the difference between the current level of PacificSource - Central Oregon performance and the best practice score.

The bar chart on the right displays the expected improvement in the overall *Rating of Health Plan* score PacificSource - Central Oregon could achieve if it performed on par with the best practice plan on each of the key driver measures. Each bar represents room for improvement on the key driver weighted by its contribution to the *Rating of Health Plan* score.

EXHIBIT 5. 2021 PACIFICSOURCE - CENTRAL OREGON ADULT MEDICAID OHA CAHPS SURVEY : KEY AREAS AND PRIORITIES FOR IMPROVEMENT

Current Key Driver Performance		Room for Improvement on Key Driver	Overall Improvement Opportunity	
2021 Rate		Percentage Point Difference Between Current Key Driver Score and the Best Practice Score*	Expected Percentage Point Improvement in Rating of Health Plan score (percent 9 or 10) if Key Driver Performs at Best Practice Level	
Q18. Rating of Personal Doctor (percent 9 or 10)	64.48%	+4.72%	+1.96%	
Q9. Ease of getting needed care, tests, or treatment (percent <i>Usually</i> or <i>Always</i> )	83.85%	+7.06% > 90.91%	+1.77%	
Q22. Rating of Specialist Seen Most Often (percent 9 or 10)	67.33%	+7.25%	+0.95%	
Q24. Customer service provided information or help (percent <i>Usually</i> or <i>Always</i> )	88.89%	+2.69% -> 91.58%	+0.32%	

<sup>\*</sup>Best score on the key driver measure among all plans included in the 2021 State OHP.

## **HEALTH PLAN QUALITY IMPROVEMENT RESOURCES FOR KEY DRIVERS**

CSS's Industry *Key Driver Analysis* lists improvement opportunities and priorities for PacificSource - Central Oregon. The following is a list of possible interventions and resources related to each of the key drivers. This section is included as a guide to assist plan managers in their quality improvement efforts. Some of these resources may be more applicable to your organization than others, especially because many of the cited interventions are intended to be implemented at the practice or provider level. For a useful introduction to quality improvement (QI), refer to the Agency for Health Care Research and Quality's (AHRQ) reference guide that includes descriptions of QI strategies in health delivery systems (<a href="https://www.ahrq.gov/sites/default/files/wysiwyg/cahps/quality-improvement/improvement-guide/4-approach-qi-process/cahps-section-4-ways-to-approach-qi-process.pdf">https://www.ahrq.gov/sites/default/files/wysiwyg/cahps/quality-improvement/improvement-guide/4-approach-qi-process/cahps-section-4-ways-to-approach-qi-process.pdf</a>).

#### IMPROVING MEMBER ACCESS TO CARE

Removing barriers to care is central to improving the health care experience of plan members. The following resources suggest ways to improve patient access to care, tests, and treatment.

- Same-Day Appointment Scheduling The Agency for Healthcare Research and Quality (AHRQ) recommends a method of scheduling that leaves part of each physician's day open for same-day appointments, rather than a traditional scheduling model that books appointments weeks or months in advance. Because the method does not differentiate between urgent and routine care, patients with non-urgent concerns are able to schedule appointments sooner than under traditional scheduling methods. For more information, see <a href="https://www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/access/strategy6a-openaccess.html">www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/access/strategy6a-openaccess.html</a>.
- Implement Process Improvements to Streamline Patient Flow Delays experienced by patients while waiting for care, tests, or treatment can be minimized through a variety of mechanisms. For example, reallocating tasks such as physical exams and ordering x-rays to physician's assistants and nurse practitioners frees up physicians' time to attend to more pressing patient concerns. The exact form of these improvements will vary widely by practice. See <a href="https://www.ahrq.gov/research/findings/final-reports/ptflow/index.html">www.ahrq.gov/research/findings/final-reports/ptflow/index.html</a> for AHRQ's guide to plan and implement patient flow improvement strategies.
- Patient-Centered Medical Homes (PCMH) This model increases patient access to physicians, reducing barriers to receiving care (www.ncbi.nlm.nih.gov/pmc/articles/PMC2869425/). There are many valuable sources of information on the medical home model of care and health equity. To start, see this Institute of Medicine report: nam.edu/wp-content/uploads/2015/06/PatientCenteredMedicalHome.pdf. Family Medicine for America's Health is a collaboration of family medicine organizations dedicated to improving health care by expanding and emphasizing primary care, particularly through the use of patient-centered medical homes. For AHRQ's resources detailing transitioning a practice to a patient-centered medical home model, see www.pcmh.ahrq.gov/.

- Alternative Access Centers This brief (<a href="www.rwjf.org/content/dam/farm/reports/issue">www.rwjf.org/content/dam/farm/reports/issue</a> briefs/2015/rwjf419415) from the Robert Wood Johnson Foundation highlights the growing capacity of retail clinics and telemedicine to meet patient medical needs, particularly in rural and underserved communities and for patients with acute but non-serious conditions who need care quickly. Providing patients with alternative venues to access health care, rather than the traditional doctor's office or hospital, lowers barriers to care (<a href="www.ncbi.nlm.nih.gov/pmc/articles/PMC4795318/">www.ncbi.nlm.nih.gov/pmc/articles/PMC4795318/</a>).
- Telehealth Solutions to Pandemic-Related Issues The COVID-19 Pandemic has accelerated the usage and acceptance of telehealth by providers and patients alike. This article (<a href="www.thelancet.com/journals/langlo/article/PIIS2214-109X(20)30362-4/fulltext">www.thelancet.com/journals/langlo/article/PIIS2214-109X(20)30362-4/fulltext</a>) details opportunities to expand telehealth beyond the pandemic. Telehealth can also be implemented to solve deferral of care issues brought about by the pandemic (<a href="publichealth.jmir.org/2020/3/e21607?utm\_source=TrendMD&utm\_medium=cpc&utm\_campaign=JMIR\_TrendMD\_1">www.thelancet.com/journals/langlo/article/PIIS2214-109X(20)30362-4/fulltext</a>) details opportunities to expand telehealth beyond the pandemic. Telehealth can also be implemented to solve deferral of care issues brought about by the pandemic (<a href="publichealth.jmir.org/2020/3/e21607?utm\_source=TrendMD&utm\_medium=cpc&utm\_campaign=JMIR\_TrendMD\_1">www.thelancet.com/journals/langlo/article/PIIS2214-109X(20)30362-4/fulltext</a>) details opportunities to expand telehealth beyond the pandemic.

#### IMPROVING HEALTH PLAN PROVIDER NETWORK

These resources concentrate on improving the physician-patient relationship, with a focus on communication. Implementing the solutions proposed here may result in patients' increased rating of doctors.

- Improve Physician Communication Much of patient dissatisfaction stems from a failure of effective physician communication (www.ncbi.nlm.nih.gov/pmc/articles/PMC3096184/). Seminars and workshops for physicians serve as a resource for physicians to learn and practice patient-centered communication techniques. For example, The California Quality Collaborative has identified nine effective strategies for improving patient experience with health care providers in their Improving the Patient Experience Change Package (see www.calquality.org/storage/Improving Pt Experience Spread Change Pkg UpdatedMay2011.pdf). For general recommendations related to physician communication, see www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for- improving/communication/strategy6gtraining.html.
- Help Patients Communicate Patients who can effectively communicate their needs tend to have higher satisfaction with their care. AHRQ recommends four interventions that prepare patients to better communicate with their providers, including record sharing, writing down talking points prior to visits, and "coached care" programs. See <a href="https://www.ahrq.gov/cahps/quality-improvement-guide/6-strategies-for-improving/communication/strategy6i-shared-decisionmaking.html">https://www.ahrq.gov/cahps/quality-improvement-guide/6-strategies-for-improving/communication/strategy6i-shared-decisionmaking.html</a> and <a href="https://www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/communication/strategy6htools.html">www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/communication/strategy6htools.html</a>. For a sample communication document that providers can distribute to patients before or during visits, see <a href="https://www.rwjf.org/content/dam/farm/toolkits/2013/rwjf404048">www.rwjf.org/content/dam/farm/toolkits/2013/rwjf404048</a>.
- Build Physician-Patient Relationships An article published in the British Journal of General Practice found that patients seeing their preferred doctor rated their satisfaction with visits significantly higher than patients who did not have a doctor preference or those who would have preferred to see a different doctor. A study of English National Health Service data found that confidence and trust in a doctor is an important predictor of overall patient satisfaction (<a href="www.ncbi.nlm.nih.gov/pubmed/18416910/">www.ncbi.nlm.nih.gov/pubmed/18416910/</a>), while a Harvard study found that a positive physician-patient relationship correlates with better healthcare outcomes (<a href="www.ncbi.nlm.nih.gov/pmc/articles/PMC3981763/">www.ncbi.nlm.nih.gov/pmc/articles/PMC3981763/</a>).

• Improve Referral Communication – The coordination of care between primary and specialist providers can be a challenge and may affect patient perceptions of their specialist care. Improving the coordination of care and case management can increase patient satisfaction with their specialist. For examples of interventions that improve care coordination efficiency and quality, see <a href="https://www.ahrq.gov/innovations/index.html">www.ahrq.gov/innovations/index.html</a>.

#### IMPROVING CUSTOMER SERVICE AND HEALTH PLAN-RELATED INFORMATION

It is important that health plan information be provided to members and that the information addresses member concerns. As representatives of the plan, customer service staff must ensure that members have confidence and trust in their ability to address their concerns. The following resources contain recommendations for improving customer service.

- Develop Customer Service Standards To improve customer service, the Agency for Healthcare Research and Quality suggests first articulating which
  aspects of customer service are most important to your organization. After developing these standards, monitor performance and promote accountability
  among staff. For more information, see <a href="https://www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/customer-service/strategy6q-custservice-standards.html">www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/customer-service/strategy6q-custservice-standards.html</a>.
- Iterative Improvement for Member Services This RAND paper details a case study in which a health plan used additional surveys to supplement CAHPS results and thoroughly assess member dissatisfaction with customer service. Throughout the process, plan leadership continually examined and adjusted improvement goals. The intervention resulted in a reduction of wait time for customer service calls and increased member satisfaction with customer service, as measured on the CAHPS survey. See <a href="https://www.rand.org/pubs/working">www.rand.org/pubs/working</a> papers/WR517.html.
- Implement Service Recovery Procedures When customers have a complaint, service recovery programs support customer service personnel in identifying and remedying the problem. While complaints may be inevitable, proper handling of complaints can reassure patients and restore loyalty to the health plan. For more information, see <a href="https://www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/customer-service/strategy6p-service-recovery.html">www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/customer-service/strategy6p-service-recovery.html</a>.
- Make Plan Information Accessible to All Members A Health Research and Educational Trust study found that demographic characteristics, including
  education, age, gender, and income, significantly impacted use of an Internet-based decision tool. The tool provided cost information as well as a health
  and wellness assessment. The study suggests that effort beyond Internet-based tools is necessary to reach certain demographics. For further information,
  see <a href="https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3447236/">www.ncbi.nlm.nih.gov/pmc/articles/PMC3447236/</a>.

- Increase Access to Trusted Health Information Many people look to their health plan for information not only on how the health plan works, but also on resources to help them improve their health, particularly when dealing with chronic illnesses. A recent meta-analysis confirmed that improved access to trusted health information leads to improved outcomes (<a href="www.ncbi.nlm.nih.gov/pmc/articles/PMC5818676/">www.ncbi.nlm.nih.gov/pmc/articles/PMC5818676/</a>). The ONC Patient Engagement (PE) Playbook was created by the Office of the National Coordinator for Health Information Technology (ONC) to help healthcare professionals use health information technology (health IT) to provide better care to patients. The PE Playbook focuses specifically on electronic health record (EHR) patient portals, which allow both patients and healthcare teams, concurrent with patients' privacy preferences, to easily access patient health information which may lead to increased benefits for healthcare, such as improved health outcomes and lower costs (<a href="www.healthit.gov/playbook/pe/">www.healthit.gov/playbook/pe/</a>).
- Evaluate the Organization's Health Literacy Programs The CDC has developed guidance on evaluating an organization's health literacy program, including recommended sources of communication and health literacy measures. See <a href="https://www.cdc.gov/healthliteracy/researchevaluate/program-evaluation.html">www.cdc.gov/healthliteracy/researchevaluate/program-evaluation.html</a>. The CDC's National Prevention Information Network also offers tools to create health materials in plain language to reduce health disparities (npin.cdc.gov/pages/health-communication-language-and-literacy).
- Improve Patient Health Literacy This guide by the Office of Disease Prevention and Health Promotion outlines steps to improve health literacy, which may help patients to better absorb the information they obtain from written materials or the Internet. For detailed steps, see <a href="health.gov/our-work/health-literacy/resources">health.gov/our-work/health-literacy/resources</a>. AHRQ has also developed its own health literacy toolkit to support physicians: <a href="https://www.ahrq.gov/professionals/quality-patient-safety/quality-resources/tools/literacy-toolkit/healthlittoolkit2.html">https://www.ahrq.gov/professionals/quality-patient-safety/quality-resources/tools/literacy-toolkit/healthlittoolkit2.html</a>.

## APPENDIX

#### CALCULATION GUIDELINES FOR RATING AND COMPOSITE GLOBAL PROPORTIONS

NCQA's HEDIS 2021, Volume 3: Specifications for Survey Measures contains detailed guidelines for calculating survey results. These guidelines include:

- Criteria for including a survey in the results calculation. A questionnaire must have the final disposition code of *Complete and Valid Survey* to be included in the calculation of plan-level scores.
- Rules for handling appropriately answered questions (i.e., questions that comply with survey skip-pattern instructions).
- Rules for handling inappropriately answered questions (e.g., unanswered questions, multiple-mark questions, questions that should have been skipped, and questions within a skip pattern of an inappropriately answered or skipped gate item).
- Denominator reporting thresholds. Health plans must achieve a denominator of at least 100 responses to obtain a reportable result. If the denominator for a particular survey result calculation is less than 100, NCQA assigns a measure result of "NA".
- Rules for calculating denominators for questions and composites. The denominator for a question is equal to the total number of responses to that question. The denominator for a composite is the average number of responses across all questions in the composite.
- Rules for handling changes in submission entity (i.e., if a health plan changes how it reports CAHPS results from one year to the next.)

#### COMPOSITE GLOBAL PROPORTIONS

Global Proportions are *average* proportions of respondents who gave the plan a favorable rating on each question in a composite. The steps involved in calculating the composite global proportion are:

#### Step 1

For each question in a composite, determine the proportion of respondents selecting the reported response option(s).

## Step 2

Calculate the average proportion across all the questions in the composite. These are the composite global proportions. Note: all questions in a composite are weighted equally, regardless of how many members respond.

### Example:

Response option	Q4	Q6	Global Proportion
Never or Sometimes	1 / 5 = 0.20	1 / 4 = 0.25	(0.20 + 0.25) / 2 = 0.2250
Usually	2 / 5 = 0.40	1 / 4 = 0.25	(0.40 + 0.25) / 2 = 0.3250
Always	2 / 5 = 0.40	2 / 4 = 0.50	(0.40 + 0.50) / 2 = 0.4500
Usually or Always	4 / 5 = 0.80	3 / 4 = 0.75	(0.80 + 0.75) / 2 = 0.7750

Therefore, 80.00 percent and 75.00 percent of members respectively provided favorable responses to the *Getting Care Quickly* questions Q4 and Q6. Averaging these two proportions yields the global proportion score of 77.50 percent for the *Getting Care Quickly* composite.

#### **GLOSSARY OF TERMS**

**Attributes** 

Areas of health plan performance and member experience assessed with the CAHPS survey

Benchmark

A reference score (e.g., the State Oregon Health Plan, the CSS Average, the highest or lowest performing CCO, or the CCO's own prior-year rate) against which performance on the measure is assessed. See *Comparisons to Benchmarks and Prior-Year Results*.

**CAHPS Surveys** 

Consumer Assessment of Healthcare Providers and Systems (CAHPS) is a series of surveys designed to collect consumer feedback on their health care experiences. The CAHPS 5.1H Health Plan Survey asks members to report on their experiences with access to appointments and care through their health plan, communication with doctors available through the plan, and customer service. The Commercial plan version asks about member experiences in the previous twelve months, whereas the Medicaid version refers to the previous six months. The Medicaid version is available for adults and children; the Commercial version is for adults only. The Adult survey is intended for respondents who are 18 and older; the Child survey asks parents or guardians about the experiences of children 17 and younger. Health plans report survey results as part of HEDIS data collection. NCQA uses survey results to create national benchmarks for care and to report health plan performance to consumers. Health plans might also collect CAHPS survey data for internal quality improvement purposes.

**Composite Measures** 

Composite measures combine results from related survey questions into a single score to summarize health plan performance in a specific area of care or service. The set of applicable composites varies slightly by survey version.

Confidence Level

A confidence level is associated with tests of statistical significance of observed differences in survey scores. It is expressed as a percentage and represents how often the observed difference (e.g., between the plan's current-year rate and the relevant benchmark rate) is real and not simply due to chance. A 95% confidence level associated with a statistical test means that if repeated samples were surveyed, in 95 out of 100 samples the observed measure score would be truly different from the comparison score.

Correlation

A degree of association between two variables, or attributes, typically measured by the *Pearson correlation coefficient*. The coefficient value of 1 indicates a strong positive relationship; -1 indicates a strong negative relationship; zero indicates no relationship at all.

Denominator (*n*, or Usable Responses)

Number of valid (appropriately answered) responses available to calculate a measure result. Examples of inappropriately answered questions include ambiguously marked answers, multiple marks when a single answer choice is expected, and responses that violate survey skip patterns. The denominator for an individual question is the total number of valid responses to that question. The denominator for a composite is the average number of responses across all questions in the composite. If the denominator is less than 30 responses, a measure result of "Low n" was assigned.

Disposition

The final status given to a member record in the survey sample at the end of the study (e.g., completed survey, refusal, non-response, etc.)

#### **Eligible Population**

Members who are eligible to participate in the survey based on the following NCQA criteria:

- Current enrollment (as of the date the sample frame is generated). Some members may no longer be enrolled by the time they complete the survey. They become ineligible and will be excluded from survey results based on their responses to the first two questions on the survey, which confirm membership.
- Continuous enrollment (twelve months for Commercial and six months for Medicaid, with no more than one enrollment break of 45 days or less);
- Member age (18 years old or older for the Adult survey and 17 years old or younger for the Child survey as of December 31 of the measurement year);
- Primary coverage (through Medicaid or a commercial product line for Medicaid and Commercial surveys, respectively).

#### **Global proportions**

Applies to composite measures. The proportion of respondents selecting the favorable response(s) (e.g., *Usually or Always*) averaged across the questions that make up the composite.

#### **HFDIS**

The Healthcare Effectiveness Data and Information Set (HEDIS) is a set of performance measures in the managed care industry, developed and maintained by NCQA. HEDIS was designed to allow consumers to compare health plan performance to other plans and to national or regional benchmarks as well as to track year-to-year performance. HEDIS is one component of NCQA's accreditation process, although some plans submit HEDIS data without seeking accreditation. CAHPS measures are a subset of HEDIS.

#### **Key Drivers**

Key Drivers are plan attributes that have been shown to be closely related to members' overall assessment of the plan. Performance on these attributes predicts how the plan is rated overall and, viewed from the industry perspective, helps to distinguish high-rated plans from poorly performing plans.

#### **NCQA**

The National Committee for Quality Assurance (NCQA) is an independent non-profit organization that works to improve health care quality through the administration of evidence-based standards, measures, programs, and accreditation. NCQA manages voluntary accreditation programs for individual physicians, health plans, and medical groups. Health plans seek accreditation and measure performance through the administration and submission of the Healthcare Effectiveness Data and Information Set (HEDIS) and Consumer Assessment of Healthcare Providers and Systems (CAHPS) survey.

### Question Summary Rate

Question Summary Rates express the proportion of respondents selecting the response option(s) of interest (typically representing the most favorable outcome(s) from a given question on the survey). Many survey items use a *Never*, *Sometimes*, *Usually*, or *Always* response scale, with *Always* being the most favorable outcome. Results are typically reported as the proportion of members selecting *Usually* or *Always*.

Response Rate	Survey response rate is calculated by NCQA using the following formula:	
	Response Rate = Complete and Eligible Surveys  [Complete and Eligible + Incomplete (but Eligible) + Refusal + Nonresponse after maximum attempts	
	+ Added to Do Not Call (DNC) List]	
Sample size	OHA's methodology used a sample size of 1,125 for Adult Medicaid samples, 925 for Child Medicaid samples, and 575 for Child Medicaid with Chronic Conditions samples.	
Statistically Significant Difference	When survey results are calculated based on sample data and compared to a benchmark score (e.g., the NCQA National Average rate, the CSS Book-of-Business average, or the plan's own prior-year rate), the question is whether the observed difference is real or due to chance. A difference is said to be statistically significant at a given confidence level (e.g., 95%) if it has a 95% chance of being true.	
Trending	Comparison of survey results over time	
Usable Responses (n)	See Denominator	
Valid Response	Any acceptable response to a survey question (i.e., falling within a predefined set) that follows the NCQA skip pattern rules and data cleaning guidelines.	

## **SURVEY INSTRUMENT**

# **Survey Instructions**

Answer each question by marking the box to the left of your answer.

You are sometimes told to skip over some questions in this survey. When this happens you will see an arrow with a note that tells you what question to answer next, like this:

 $\square_1$  Yes  $\rightarrow$  *If Yes, Go to Question 1*  $\square_2$  No

Personally identifiable information will not be made public and will only be released in accordance with federal laws and regulations.

You may choose to answer this survey or not. If you choose not to, this will not affect the benefits you get. You may notice a number on the cover of this survey. This number is ONLY used to let us know if you returned your survey so we don't have to send you reminders.

If you want to know more about this study, please call 1-833-257-1377. For the hearing or speech impaired, call 711 to use the Telecommunications Relay Service (TRS).

- 1. Our records show that you are now in Oregon Health Plan. Is that right?
  - $\square_{\scriptscriptstyle 1}$  Yes  $\rightarrow$  If Yes, Go to Question 3
  - □<sub>2</sub> No
- 2. What is the name of your health plan? (Please print)

## **Your Health Care in the Last 6 Months**

These questions ask about your own health care from a clinic, emergency room, or doctor's office. This includes care you got in person, by phone, or by video. Do <u>not</u> include care you got when you stayed overnight in a hospital. Do <u>not</u> include the times you went for dental care visits.

- 3. In the last 6 months, did you have an illness, injury, or condition that needed care right away?
  - ☐
    ₁ Yes
  - $\square$ , No  $\rightarrow$  If No, Go to Question 5

			· · · · · · · · · · · · · · · · · · ·
