# Statewide Provider Directory – “Phase 1.5”

2013 – 2015

Six HIT/HIE foundational and high-priority initial elements to support Oregon’s health system transformation

# Why create a Statewide Provider Directory?

Create efficiencies for HIE, operations, analytics, oversight and quality reporting

- ✓ Support analytics that rely on attributing providers to clinics and patient outcomes to provider team; foundational for state-level clinical quality data registry and local/CCO/health plan analytics
- ✓ Support development of new models of care and payment that rely on attributing patient outcomes to provider team
- ✓ Be leveraged by providers for referrals, notifications and care management
- ✓ Enable local or state-level Direct and query-based health information exchange
- ✓ OHA's common credentialing efforts may leverage some of the statewide provider directory's technology infrastructure, and common credentialing efforts can provide an excellent data source for the provider directory

# Provider Directory Vision, Goal, and Scope

## Vision

- Serve as the integrated, accurate, and trusted source of Oregon provider and affiliated data

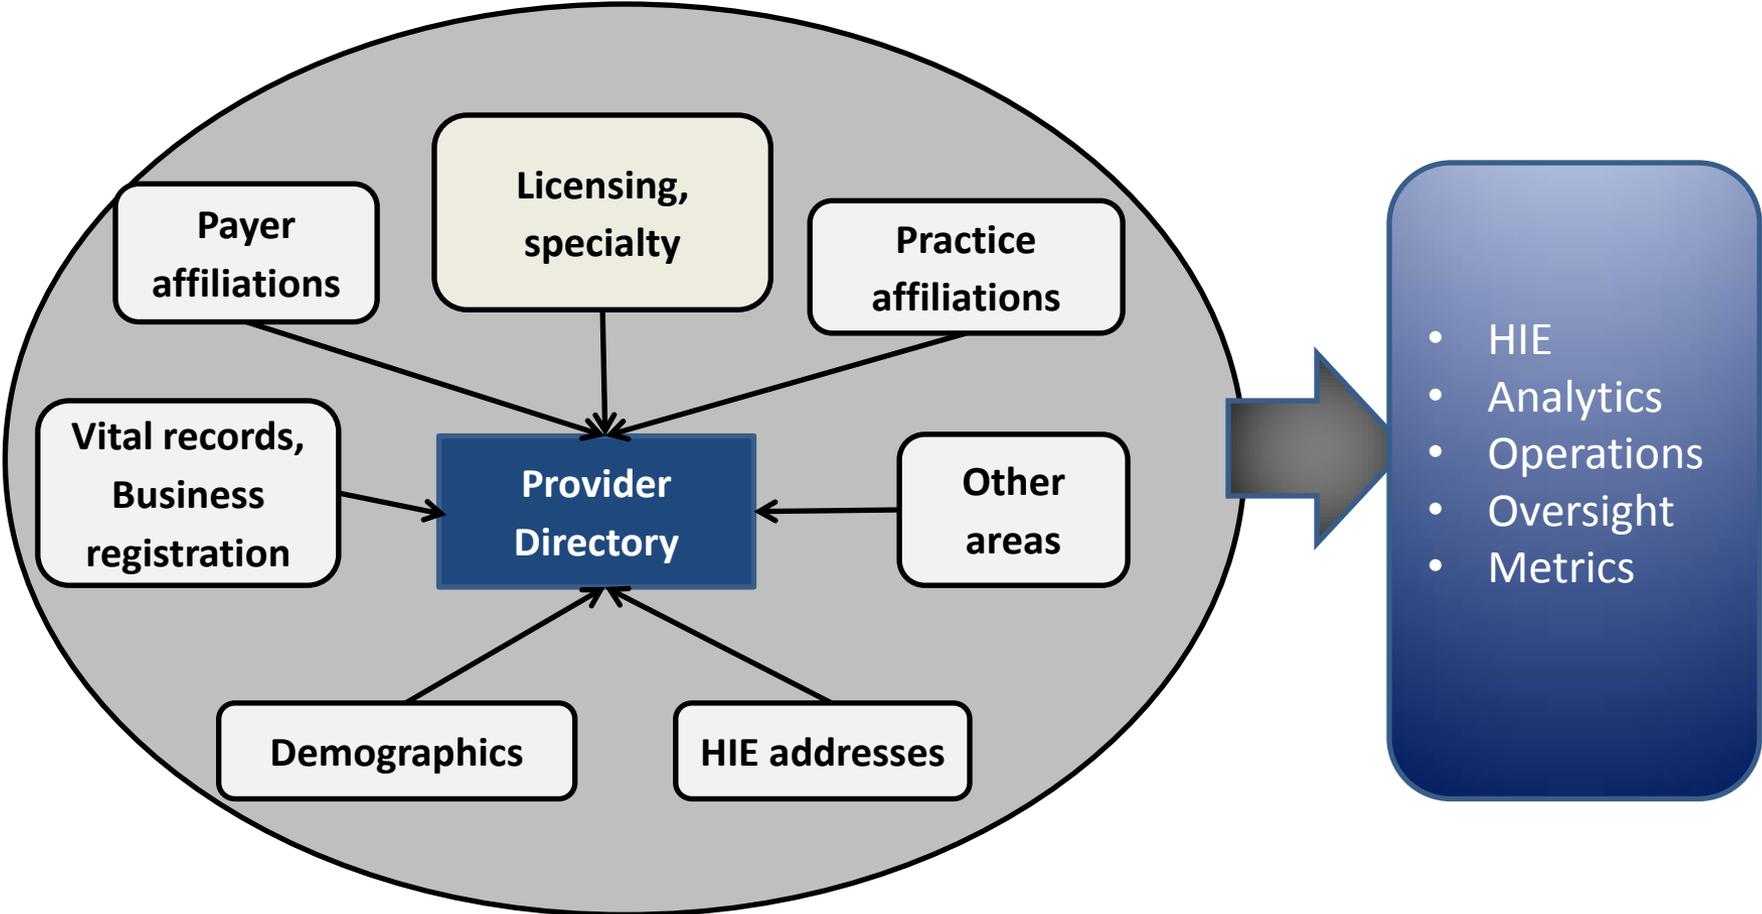

## Goal

- Create a statewide expandable provider directory, initially targeting critical HIE, analytics, and operations needs in Spring 2015

## Scope under Consideration

- Be the primary source of provider's "static" data such as name, address, phone, NPI, specialty, etc.
- Identify relationships between individual practitioners and their affiliated clinics, hospitals and health systems, health plans, etc.
- Identify information needed to facilitate exchange (e.g., HIE "addresses")
- Link to other important information such as vital records, business registration, licensing boards, common credentialing, etc.
- Design with expansion in mind

# Provider Directory Scope Under Consideration

# Provider Directory Timeline

## Oct 2013 - Feb 2014: Requirements and Analysis

- OHA and HITAG: OHA establishes a CCO technical advisory workgroup for Phase 1.5 implementation
- Assemble Provider Directory Subject Matter Expert workgroup
- Major technology requirements for RFP and contracts

## 1<sup>st</sup> part of 2014: Procurement and funding

- RFI, RFP, and procurement process
  - Consider RFI partnership with common credentialing
- Request/approval of federal 90/10 funding
- Seek financing partners and morph HITAG into steering committee

## Mid 2014 –2015: Development and Implementation

- System design/development
- Program operations design/development
- Integration, testing, and deployment

## 2015: Services Operational

- Management of ongoing operations
