If a live birth occurs, a birth certificate must be filed with the State regardless of length of life, birth weight, or gestational age prior to birth.

Induced termination means the purposeful interruption of an intrauterine pregnancy with the intention other than to produce a live-born infant and that does not result in a live birth.

Signs of life: breathe, beating of the heart, pulsation of the umbilical cord or definite movement of the voluntary muscles.

For procedure to manage products of conception following fetal death see flowchart called “Reporting Pregnancy Outcomes in a Hospital or Licensed Birthing Facility” at http://public.health.oregon.gov/BirthDeathCertificates/RegisterVitalRecords/Pages/InstructionsFetalDeath.aspx
