## Table 3-2. Live Births and Induced AbortionsOccurring in Oregon, 1970-2008

\* The increase in the 1980 figure reflects improved reporting rather than an increase in the number of abortions performed. Approximately 1,000-1,400 of the abortions were performed by providers who did not participate in the voluntary abortion reporting system prior to 1980 even though they were performing abortions in previous years.

\*\*The increase in the 1984 figure is probably a consequence of the implementation of ORS 435.496, which requires that an induced termination of pregnancy report be filed by abortion providers whenever an induced abortion is performed. NOTE: Induced abortion ratio is the number of abortions per 1,000 live births.
