MEDICAL MARIJUANA INFORMATION BULLETIN 2017-07

Subject: SB 1057 Decision and Tracking Requirement

During the 2017 Legislative Session, the Legislature passed [SB 1057](#) which requires OMMP registered grow sites (except as exempted below), processors and dispensaries to decide to stay registered with OMMP or become licensed by OLCC. Registrants which remain registered with OMMP will be required to track the production, processing, and transfer of all marijuana items using the OLCC Cannabis Tracking System (CTS) and pay a new fee for using CTS.

Exemption: If you are a patient growing for yourself and there are no more than 12 mature plants and 24 immature plants at your grow site you are not required to track in CTS.

A notice of this new requirement and a form will be mailed August 30, 2017.

Each registrant will be required to, **no later than December 1, 2017**, provide notice on a form prescribed by OMMP of their decision to:

- Remain registered with OMMP, use the CTS and pay an additional fee of approximately \$480 (additional info on CTS will be available in early 2018); **or**
- Apply for a license with the OLCC. A complete application must be submitted to OLCC before January 1, 2018; **or**
- Indicate they are a patient growing for themselves and there are no more than 12 mature plants and 24 immature plants at the grow site. A grow site where a patient is growing for themselves and where there are not more than 12 mature and 24 immature plants is exempt from CTS tracking.

If a registrant does not notify OMMP of their decision by December 1, 2017, the registration will not be renewed.

If the registrant notifies OMMP with the decision to get licensed with OLCC but do not apply with OLCC by January 1, 2018, the registration will not be renewed.

Additional Grower Info

All growers at a grow site must collectively make the decision to remain registered with OMMP or move to OLCC and submit only one form to OMMP. Submitting more than one form for a grow site may result in registration not being renewed.
