

HRSA Summary Progress Report / Impact Statement

1.1 EHDI data will be communicated to the medical home through linking with Immunization.	• 100% of documented primary care providers imported into EHDI-IS receive a follow-up letter • At last analysis, 16% of letters for infants missing screening yielded results • 38% of letters for infants without documented follow-up yielded results
1.2 All EHDI EI referrals with confirmed categorical loss as identified in the OARS are triaged and automated.	• 2012 – 87% referrals have documented eligibility and enrollment outcomes • 77% of referrals are automated • 67% of outcome data received through data exchange process • 6 of 9 Service Areas participating • 62% of eligibility and enrollment data received within 45 days of referral
1.3 Nurse home visiting programs are educated about EHDI follow-up protocols and EHDI-IS is expanded to house nurse follow-up information.	• Presentations at MCH Nurse orientations at least annually • EHDI-IS has dedicated tab for PHN follow-up
1.4 Oregon EHDI will participate in the NECAP project by utilizing parent guides and integrating outcome data from GBYS and NECAP into EHDI-IS system.	On Hold
1.5 Parents will have increased support and information related to EHDI process and will access culturally appropriate materials.	• Improved parent screening and diagnostic letters • Updated screening pass and refer forms • Re-visioning of Family Resource Guide • Updates to website • Contract with parent mentors for family support, one bilingual guide (Spanish)
2.1 EHDI-IS will have an automated follow-up calendar.	• Fully operational automated follow-up calendar/task list in EHDI-IS • Automated reports in EHDI-IS for monitoring
2.2
