

KD SCOTT CONSULTING, LLC

Helping clients build strong, healthy, and resilient communities

www.kdscott.com

Kathryn Scott, DrPH has provided program planning, evaluation, and project management services to clients since 2009. She is a public health professional with an area of focus on immunizations, and has been approved to work in the following areas with Coordinated Care Organizations:

- Community health improvement plans
- Childhood immunization rates
- Health program evaluation
- Project management

An example of Kathryn's skills in these areas can be seen in Oregon's 2012-2013 Adult Immunization Special Project. For this project, she:

- Developed the project charter and action plan with milestones and deliverables
- Conducted local site visits
- Led project meetings (i.e., kick-off, monthly check-ins, meetings with funder)
- Developed reporting tools and oversaw the monthly reporting process
- Monitored local and state project expenditures
- Served as a liaison between project stakeholders, such as local health departments and corporate pharmacy chains
- Developed the evaluation plan
- Compiled, analyzed, and interpreted the evaluation data with the assistance of state staff
- Wrote the mid-term and final evaluation reports

The Adult Immunization Special Project was associated with increases in adult Tdap and influenza vaccination rates among participating counties. Project reports can be found at <https://public.health.oregon.gov/PreventionWellness/VaccinesImmunization/Pages/SpecProj.aspx>.

Kathryn works hard to understand the needs of her clients, and she is dedicated to helping them use their limited resources effectively.
