

ADDICTIONS & MENTAL HEALTH SYSTEM CHANGE WORK COLLECTIVE

VISION-MISSION-GOALS

The AMH system change work collective envisions a system designed to support a healthy Oregon where people access quality and affordable health, mental health, and addiction services and supports.

The mission of the AMH system change work collective is to create and implement an addictions and mental health system that supports access to services and supports, and improves health outcomes. We will accomplish this mission by:

- Designing an efficient system that demonstrates that more people are being served and that outcomes for people are improved;
- Readying our workforce to support the new system;
- Building and growing business functions such as payment systems to support the new system;
- Increasing strategic communications to all partners and staff members;
- Readying the division's data system to monitor performance measures and outcomes;
- Creating and administer contracts that focus on performance measures and outcomes; and
- Designing funding strategies that supports Oregon in all geographies and demographics.
