This document reflects the decisions made at the August 2013 Metrics & Scoring Committee to finalize the approach for the CCO incentive measure. The document has been updated to reflect 2015 measurement.

**Name and date of specifications used:** OHA-developed.

**URL of Specifications:** N/A

**Measure Type:**
- HEDIS □
- PQI □
- Survey □
- Other ■

**Measure Utility:**
- CCO Incentive ■
- Core Performance ■
- CMS Adult Set □
- CHIP Set □
- State Performance ■
- Other □

Note: The measurement period tied to the quality pool is cumulative, and looks for all providers ever receiving an EHR Incentive Payment; it is not limited to just those providers who received an EHR Incentive Payment in CY 2015. In other words, all providers who have received an EHR Incentive Payment since 2011 will “count” towards the 2015 measurement.

Note: the measure will capture any payments made for 2015 participation in the federal EHR Incentive Program through March 31, 2015.

**2013 Benchmark:** 49.2%, from the Federal assumed rates for non-hospital based EHR adoption and meaningful use by 2014.¹

**2014 Benchmark:** 72%, from Metrics & Scoring Committee consensus, based on the highest performing CCO as of July 2013.

**2015 Benchmark:** 72%, from Metrics & Scoring Committee consensus, based on the highest performing CCO as of July 2013.

**Incentive Measure changes in specifications from 2014 to 2015:** N/A

**Denied claims:** Included: N/A       Not included: N/A

Population Group: Providers included in the incentive measure are those providers who are identified as being part of the CCO in the contractually required provider network tables submitted to OHA. CCOs are responsible for the accuracy of these provider network tables.

The set of providers is further limited to only include the providers whose zip code in Medicaid Management Information Systems (MMIS) data is located within the CCOs’ service area, and to providers that are eligible provider types for the Medicaid, Medicare, or Medicare Advantage EHR Incentive Programs.

<table>
<thead>
<tr>
<th>Medicaid Eligible Professionals (EP) types include:</th>
<th>Medicare Eligible Professional types include:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Physicians (must be DO or MD);</td>
<td>• Physicians (must be DO or MD);</td>
</tr>
<tr>
<td>• Nurse Practitioners, including Certified Nurse</td>
<td>• Podiatrists;</td>
</tr>
<tr>
<td>Midwives; and</td>
<td>• Chiropractors.</td>
</tr>
<tr>
<td>• Physician Assistants in certain settings.⁴</td>
<td></td>
</tr>
</tbody>
</table>

Note: Mental health professionals were only included if they were classified as a physician (i.e. psychiatrist or nurse practitioner).

Population Group Calculation Steps
1. Start with all providers in a CCO’s network using the contractually required provider network table provided by CCOs.
2. Identify those providers in a CCO’s network that are eligible provider types for the EHR Incentive Program.
3. Refine to only include those providers with zip codes in the CCOs assigned service area.

Numerator: The numerator is the total number of individual providers in the population group that qualified for an incentive payment during the measurement year through the Medicaid, Medicare, or Medicare Advantage EHR Incentive Programs.

Although EHR incentive payments can be made to a clinic or provider group, the payment is still tied to the individual provider, using their National Provider Identifier (NPI). CCOs will receive credit in the numerator for individual providers who qualify for the payment under the federal programs, even if they are listed at the clinic or provider group level in the provider network tables submitted to OHA.

---

⁴ Physician assistant who furnishes services in a Federally Qualified Health Center or Rural Health Clinic that is led by a physician assistant
Numerator Calculation Steps:

Count those providers in the population group that have qualified for a Medicaid EHR Incentive Payment.

+ Count those providers in the population group that have qualified for a Medicare or Medicare Advantage EHR Incentive Payment.

Denominator: The denominator is an estimate of those providers in the population group who were eligible to receive an EHR Incentive Payment. The denominator is calculated by taking the CCO’s total population group and multiplying by an adjustment factor that represents the portion of Medicaid or Medicare/Advantage providers who are eligible to participate in the EHR Incentive Programs.

The adjustment factor was developed from estimates in the Stage 2 Federal Register, MMIS data, and EHR Incentive Program payment data. See Appendix for additional details on the adjustment factor. The same adjustment factor was used for all CCOs.

Denominator Calculation Steps:

<table>
<thead>
<tr>
<th>Population Group</th>
<th>X</th>
<th>Adjustment Factor</th>
<th>= Estimate of local eligible providers within CCO who could have received a federal incentive payment for EHR adoption.</th>
</tr>
</thead>
</table>

Exclusions: Providers are excluded from the measure calculation if:

- They are not an eligible provider type;
- They are not located within a CCO’s service area, as determined by zip codes.

<sup>4</sup> Oregon Medicaid EHR Incentive Program data are not published, but can be provided to CCOs upon request. Contact Medicaid.ehrincentives@state.or.us to request CCO specific data.
OHA used the CCOs provider network tables submitted in November 2012 for the 2011 baseline data and the 2013 calculations. OHA used the CCO provider network tables submitted in June 2014 to recalculate 2013 for better comparisons to 2014, and for the 2014 measure calculation.

OHA will use any updated network tables submitted to OHA before March 31, 2016 to calculate the measure for CY 2015.

For More Information: For additional details about the measure, as well as the adjustment factor methodology, see the EHR Adoption FAQ document posted online at http://www.oregon.gov/oha/Pages/CCO-Baseline-Data.aspx

For questions or additional information about this measure, please contact Metrics.Questions@state.or.us.
