

Hair Design

Hair designers shampoo, cut, style, condition and singe (see Barbering) hair and apply chemical treatments such as coloring, dyeing, relaxing and permanent waves.

They also temporarily curl and braid hair as well as shave, trim and cut the beard or mustache.

Hair designers also massage the scalp and neck, but not the face, if in conjunction with the above services.

Cosmetologists work in a variety of settings, including hair and nail salons, barbershops, day spas, health care facilities, health clubs, resorts, and in collaboration with dermatologists and plastic surgeons.
