Do you use Schoolmaster?

Every time you run an immunization report in Schoolmaster, go through these steps to make sure your students' records are assessed correctly:

1. Make sure you have the most current version of Schoolmaster. From the menu, choose Help > About and look for "Version".

2. In Schoolmaster, select: Module > Health > Update Vaccination Status.

3. Select a sequence that includes all of your students.

4. Set the appropriate control date (either today or the January date the report is due).

5. Click begin.

6. Review the exception report and make corrections to the data as needed.

7. Now you can run your reports as usual.

If you need to review how to run the reports, please go to www.schoolmaster.com/support/index.php to log in. Go to My State, Selection Oregon, and click the "Oregon Vaccination" link.
