

Meeting 3: July 8, 2015

Follow up Discussion on Production Limits and Tracking (from July 2, 2015 meeting)

Testing and Pesticides Review/Discussion

- Pesticide usage in cannabis production
- What is or isn't a pesticide, what should or shouldn't be allowed
- Batch testing
- Concept of prior compliance with pesticide usage = less frequent compliance testing required
- What disclosures regarding pesticide usage should be required

Waste Disposal, Transportation, Compliance and Licensing

- Define chain of custody and transport manifest requirements
- Provision for producers to transport their own product and possession limits
- Inspection practices, requirements and jurisdiction
- Inspection practices at production sites that also serve as a residence
- Concept of prior performance on compliance reviews = less future compliance checks
- Licensing: from application through local government approval, land use requirements, etc.

Vertically Integrated Businesses and Relationships/Transactions with other License Types

- Banking and Intellectual property issues (formulate concepts for consideration by business committee)
- Packaging/labeling
- Samples

Homework: Security, Natural Resources and Intersection with Local Government
