He said the bill was not passed but resulted in a budget note which was put in the agency’s budget requiring the department to engage with AOC in a facilitated process to address the issue of RV funding. Director Wood explained that Oregon Solutions will facilitate the process. He said it is anticipated there will be a series of meetings involving Oregon Parks and Recreation Department Commissioners, department staff as well as representatives from the counties. The budget note requires a report back to legislature by January 2014.

b) State Fair Update (Information)
MG Devereux, Project Manager

Mr. Devereux provided a brief update on the 2013 Oregon State Fair. He shared that the preliminary attendance figures indicate a slight drop in attendance of 5.6 percent; much of this drop can be attributed to a lower concert attendance, and a couple days of rain and unsettled forecasts. He said that moving forward there is a lot of positive momentum from the event as we approach the transition to form a public corporation that will take on the ownership and operations of the Oregon State Fair and Exposition Center (OSFEC). He also shared several news clippings that highlighted improvements to this year’s event.

Mr. Devereux gave an update on Senate Bill 7. He shared that the process outlined in the bill indicates that the council will be formed by January 2014. He explained that once the council is formed it will work directly with the Department of Administrative Services (DAS) to negotiate a lease arrangement giving the council operating authority over the OSFEC. He shared that BLM will open a public process in late 2013 to review the application and solicit public comment. In the interim, OPRD and BLM have a Cooperative Management Agreement that will help guide management decisions. Mr. Devereux said that updates will be provided to the Commission as the public meetings are scheduled and additional information becomes available.

As a result of that meeting staff were instructed to provide more opportunities for public input. Mr. Morgan discussed a proposed exchange of land with PGE of lands inside and adjacent to Milo McIver State Park. He shared that PGE had proposed a fish habitat restoration project adjacent to the park, in researching the deed for allowing access to the restoration site staff found that due to movement of the river some of the land under consideration for restoration was located inside the park boundary. Mr. Morgan said that the research also discovered land that the park had been using as public access was actually owned by PGE. He said that a possible solution in the best interest of the agency was to realign boundaries to allow continued public access at the same time benefiting the fish habitat by allowing PGE to conduct their enhancement project. Mr. Morgan stated that staff were requesting approval to proceed with this land exchange conditioned upon an appraisal confirming the land received by OPRD is equal to or greater in value than the land being conveyed to PGE.

In turn, ODOT may remain at the site until OPRD acquires the property and then for a hold over period if they have not yet located a replacement site by the time OPRD takes title to the property.
