
Q. Why is everyone talking about water?

A. Local, state, and national news media are filled with stories about water, from drought and scarcity to flooding and pollution.

Oregon's east side receives very little rain, and in the summer months, the whole state is hot and dry. Groundwater levels are declining in many places; many of our water bodies have impaired water quality; and fish and their habitat are not as healthy as they used to be. Demands for all types of water use continue to change.

These challenges, along with those posed by climate change, population growth, and land-use change, highlight the urgency for a state-wide strategy that meets Oregon's water needs.

Oregon's natural resource and economic development agencies are now developing Oregon's first Integrated Water Resources Strategy and invite you to an open house in Salem to share your concerns and priorities for Oregon's water future.

Salem Open House

Tuesday, June 8, 2010

4 p.m. to 7 p.m.

Oregon Department of Fish and Wildlife Office
3406 Cherry Avenue N.E., Salem, OR 97303

- **Project Overview, followed by Discussions**
  Program begins at 4:00 and again at 5:30
- **Map Gallery**
  Challenges & opportunities for our water resources
- **Project Showcase**
  Local water resource partnerships and projects
- **Kids' Center**
  Water-related word find, coloring, and more

Thank you to our local open house partners!
