

## Transitions

**Question:** How do we ensure continuity of care?

**Issues:**

Not all case plans look the same or can be found in one data base

Point of entry is referral to the Juvenile Dept

JJIS captures standardized data elements between OYA and Juv. Departments. DOC also has access for DOC youth

Failure of transitions from close-custody to community (revocation rates)

Different level of services from one setting to the other

“Cultures” are different (rules/expectations; least to most restrictive setting; incentives; opportunity for education and vocational development)

**Other documents:**

Identify those counties that are doing case planning in JJIS; other counties are doing case plans that are not in JJIS

Flow chart of entry/exit juvenile justice system (in packet)

List of JJIS data elements

Percentage of revocations of close custody
