

PROFICIENCY TEST

03-12 CHEMICAL APPLICATION

I. Multiple Choice

1. Before applying any chemicals, you should:
 - a) Evaluate weather conditions.
 - b) Evaluate site for application problems.
 - c) Read MSDS sheet.
 - d) All of the above.

2. You should always have:
 - a) Emergency phone numbers.
 - b) A support kit.
 - c) Your lunch.
 - d) Both a and b.

3. When finished spraying, you should:
 - a) Put sprayer away without rinsing.
 - b) Wash your clothes with the rest of the laundry.
 - c) Follow cleaning directions on container label.
 - d) Dump excess solution into nearby water to dilute.

II. True/False

4. _____ You should wear the PPE suggested by the chemical label.
5. _____ It could be dangerous to mix chemicals together.
6. _____ It is not necessary to have an emergency spill kit.
7. _____ It is always best to maximize drift.
8. _____ An anti-siphon system is not needed when filling containers with water.
9. _____ If appropriate, you should notify neighbors before spraying.
10. _____ It is ok to eat you lunch while you are spraying.
11. _____ You don't need to worry about reading the label of the chemicals. As long as you have a general idea about the chemical's application method, it is ok to spray.
12. _____ You should never dump the leftover chemical in a ditch or drain.
13. _____ As long as there is a stiff breeze, you don't need any PPE.
14. _____ It is ok to spray while other people are in the area.

III. Discussion Questions

1. How do you perform an assessment prior to spraying?
2. What type of personal safety hazards exists while spraying?
3. What type of chemicals are sprayed in your park area?

Employee Name: _____ Pass _____ No Pass _____ Date _____
