I. PURPOSE:

This policy provides general guidelines for use of the polygraph with OYA offenders in close-custody facilities and provides a framework for polygraph examination approval.

II. POLICY DEFINITIONS:

**Informed consent:** The agreement by a patient to treatment, examination or procedure after the patient receives facts regarding the nature, consequences, and risks of the proposed treatment, examination or procedure.

**Maintenance polygraph examination:** A polygraph examination that inquires into the degree to which the examinee has been complying with treatment and supervision requirements.

**Multidisciplinary Team (MDT):** A team of individuals working collaboratively to develop and maintain a comprehensive individualized case plan that is culturally competent and gender-specific for each youth offender committed to the Oregon
Youth Authority (OYA). The MDT is based on a core team membership consisting of the youth offender, OYA primary case manager, placement representative, QMHP (facility)/treatment provider (community), tribal representative (for youth enrolled in one of Oregon’s federally recognized tribes) and the parents/guardians. Additional team members are fluid and are identified by the core team based on the youth offender’s Risk Needs Assessment, identified criminogenic needs and placement.

**Polygraph**: The polygraph is an instrument that records certain physiological changes in a person undergoing questioning in an effort to verify truth or detect deception.

**Polygraph examiner**: A graduate from an accredited course of polygraph instruction with a membership in a recognized polygraph association.

**Relevant question**: A question single in issue, narrow in scope, clear and specific regarding a person’s behavior which determines a successful polygraph examination.

**Sexual history disclosure polygraph examination**: A polygraph examination that inquires whether examinees have fully disclosed their sexual history to their treatment providers.

**Specific issue polygraph examination**: A polygraph examination conducted to examine precise issues of fact such as whether an offender attempted to make unauthorized contact with a victim at a particular time or to clarify discrepancies between the offender’s and the victim’s descriptions of the offense.

**Treatment**: The coordinated provision of services designed to produce a planned outcome in a person's behavior, attitude or general condition. Treatment is based on a thorough assessment of factors contributing to the attitude, condition or behavior.

### III. POLICY:

Polygraph use with OYA offenders is voluntary and will only be conducted after proper informed consent documents have been signed. OYA staff will inform the offender of the polygraph process prior to the examination. Polygraph use with OYA offenders is a way to support an offender’s sexual treatment progress.

The use of polygraph examinations is intended primarily for treatment services and not as an objective instrument of evaluation for placement decisions. The results of a polygraph examination are one of many assessment variables used for placement decisions. Facility transfer, parole placement, or revocation decisions may not be made solely on the basis of the status of completion or results of a polygraph examination.

### IV. GENERAL STANDARDS:

A. Polygraph examiner criteria
When coordinating an offender's polygraph examination, OYA staff must ensure the polygraph examiner -

1. is licensed in Oregon to conduct polygraphs;

2. has completed a 40-hour specialized training approved by a recognized polygraph association on post-conviction/adjudication testing of sexual offenders; and

3. is an OYA-approved provider (contact Central Office, Treatment Services for verification).

B. Offender participants

OYA staff will follow these guidelines when considering an offender for a polygraph examination.

1. Offenders participating in polygraph examinations must be at least 14 years old.

   Staff must follow the process described in section IV.C.2. of this policy when considering a polygraph examination for an offender younger than age 14.

2. Use of the polygraph with offenders whose IQ scores are below 85 is cautioned, and requires approval from the Treatment Services Director.

3. Decisions regarding polygraph examinations with offenders who are exhibiting acute psychological distress (e.g. severe and unexpected acting-out or withdrawn behaviors) that may interfere with a polygraph examination should include review and recommendation from a mental health professional (e.g., Qualified Mental Health Professional (QMHP), psychologist, psychiatrist).

C. Polygraph approval process

1. The MDT may recommend an offender for a polygraph examination. The offender's treatment provider must participate in the MDT process if the offender is participating in treatment.

2. Offenders younger than age 14

   a) The MDT will review the case for appropriateness.

   b) If the MDT recommends a polygraph examination for an offender younger than age 14, the supervisor/manager will request approval for a polygraph examination from the OYA Treatment Services Director.

   c) The Treatment Services Director will approve or deny the
polygraph examination in consultation with the OYA Sex Offender Treatment Coordinator.

D. Prior to an offender’s participation in a polygraph examination, the MDT will consider the potential effects the following may have on the accuracy of the examination results and determine if an examination deferment is appropriate:

1. Lack of sleep;
2. Illness;
3. Recent trauma (e.g. death of a family member, disruption in daily life, placement movement, loss of job);
4. Physical immaturity;
5. New victim disclosures within two weeks prior to the polygraph; or
6. Medication(s).

E. Polygraph examinations will occur in quiet environments where distraction from the examination procedure is minimal.

F. Types of polygraph examinations and use of the information gained

1. Sexual history disclosure polygraph examination: Information from this type of polygraph examination may be used in developing treatment and supervision plans.

2. Monitoring/maintenance polygraph examination: Information from this type of polygraph examination may be used in maintaining treatment compliance.

3. Specific issue polygraph examination: Information from this type of polygraph examination may be used in treatment to clarify an alleged specific behavior.

G. Polygraph examinations will preferably contain no more than three relevant questions. Questions will refer to offender behavior.

Answers to non-relevant questions will have no effect on offender treatment or programming.

H. Offender post-polygraph examination debriefing

When possible, the offender’s Juvenile Parole/Probation Officer (JPPO) or treatment provider will be present or available by telephone prior to the examination to consult with the polygraph examiner regarding relevant issues, and during the offender’s post-polygraph debriefing with the polygraph examiner.
I. Documentation of the polygraph examination

1. Staff must file a copy of the polygraph examination results provided by the polygraph examiner in the offender’s case file.

2. Staff must send a copy of the polygraph examination results to the offender’s assigned JPPO.

3. Staff must document the date and outcome of the polygraph examination in the Juvenile Justice Information System (JJIS) under the offender’s “notes.”

V. LOCAL OPERATING PROCEDURE REQUIRED: NO
