(2) The list of aerosol sprays stated in section (1) of this rule is subject to amendment upon the Board's finding that any listed aerosol spray no longer meets requirements for exemption under ORS 468.605, as amended. This includes a finding that an alternative non-prohibited propellant has been developed and approved for the product or a similar product. Sections (1), (2), and (3) of this rule expire by operation of ORS 468.605, as amended, on July 1, 1983.

(3)(a) A determination by the Board under ORS 468.605, as amended, that the use of an aerosol spray is essential to its intended use for a legitimate medical purpose, includes, but is not limited to, the following considerations:

(A) Whether the aerosol spray is necessary in terms of providing an important medical advantage not achieved by other forms of treatment or delivery;

(B) Whether the use of the prohibited propellant is necessary to achieve the aerosol spray in question, i.e.:

(i) Whether a pump or bulb spray would achieve the result for which the medical benefit is claimed;

(ii) If chemical aerosolization is necessitated over other forms of aerosolization, whether other non-prohibited chemical propellants would achieve the desired result, and if so, whether such chemical propellants are available and approved either for the product in question or for a similar product.

(b) With respect to dermatological preparations, the following conditions are examples where the Board has found aerosol sprays to provide an important medical advantage over other forms of treatment or delivery:

(A) Painful (touch-sensitive) skin conditions;

(B) Vesicular (blistered) skin conditions;

(C) Weeping, infected skin conditions;

(D) Ulcerated skin conditions;

(E) Disease in hairy areas;
(F) Disease in anatomically occluded areas (axillae, groin, etc.);

(G) Disease about surgical stomas.
