¹ Total Value Multiple is calculated net of recallable return of capital ("ROC"). In practice, both total distributions and contributions are reduced by the amount of recallable ROC in the numerator and denominator of the calculation, respectively.

² Investments held less than three years generally have IRRs that are not meaningful, and are therefore labeled NM.

Warning: Due to a number of factors, including most importantly a lack of valuation standards in the private equity industry, differences in the pace of investments across partnerships and the understatement of returns in the early years of a partnership's life, the IRR information in this report DOES NOT accurately reflect the current or expected future returns of the partnership. The IRRs SHOULD NOT be used to assess the investment success of a partnership or to compare returns across partnerships. The IRRs in this report HAVE NOT been approved by the individual general partners of the partnerships.
