

Percent of Oregon adults who were told they have high blood pressure, by
ethnicity/race
Behavioral Risk Factor Surveillance System (BRFSS), Oregon, 2010 - 2011

Ethnicity/Race	N	Unadjusted		Age-Adjusted	
		Est. (%)	SE	Est. (%)	SE
Non-Hispanic White	7,832	32.3	0.6	28.9	0.6
Non-Hispanic Black/African American	368	48.7	4.7	51.6*	4.3
Non-Hispanic Asian/Pacific Islander	457	22.6	3.9	23.6	3.7
Non-Hispanic American Indian/Alaska Native	424	34.1	3.5	35.1	3.5
Hispanic	296	17.5	3.5	21.8	3.8
<i>TOTAL</i>	<i>9,377</i>	<i>30.8</i>	<i>0.7</i>	<i>28.9</i>	<i>0.7</i>

Source: Oregon BRFSS 2010-2011 Race Oversample
Number of respondents (N) is unweighted; percentages are weighted

See technical notes for calculations used to determine total N for each ethnicity/race

Age-Adjusted to standard U.S. 2000 population - 3 groups (18-34, 35-54, 55+)

* = an estimate that significantly differs from non-Hispanic Whites ($p < .05$); calculated for age-adjusted values only

† = an estimate with a relative standard error > 30%, and should be considered unreliable

Question: Have you ever been told by a doctor, nurse or other health professional that you had high blood pressure?

Date: March 17, 2014
