## Covered Fuel Suppliers

This document identifies fuel suppliers covered by the Climate Protection Program (CPP) beginning in 2022. Covered fuel suppliers are subject to the cap provisions of CPP. The first compliance period is 2022-2024 and the first demonstration of compliance is in 2025.

These lists are informed by data reported to DEQ's Greenhouse Gas Reporting Program and information regarding related entities, such as subsidiaries. All persons should consult the [Climate Protection Program rules](#) in Oregon Administrative Rules (OAR) chapter 340, division 271, to determine whether their interests may be affected by the Climate Protection Program. Applicability provisions are in OAR 340-271-0110.

### Covered fuel suppliers

The below table shows covered fuel suppliers beginning in 2022. Liquid fuel(s) and propane suppliers are covered if their covered emissions are 200,000 metric tons of carbon dioxide equivalent (MT CO<sub>2</sub>e) or more in any year since 2018. Emissions are grouped for related entities, such as subsidiaries, when evaluating this threshold. This list is based on emissions from 2018 to 2022.

The applicability threshold for liquid fuels and propane supplies declines over time from 200,000 MT CO<sub>2</sub>e to 25,000 MT CO<sub>2</sub>e. The following list does not include liquid and propane suppliers that would be covered entities as the threshold declines, for example at the 100,000 MT CO<sub>2</sub>e beginning in 2025.
