

Oregon Solar + Storage Rebate Program

About Solar Rebate Payments

The Department of Energy works with another state agency, the Department of Administrative Services, to send out contractor rebates. This payment process typically takes two weeks.

The State of Oregon requires a W-9 on file prior to issuing a payment. To ensure rebates can be issued in a timely manner, ODOE will begin collecting W-9 forms from contractors.

Please ensure your mailing address and business name are current.

We encourage all contractors to sign up for electric payments. Doing so will allow you to receive your payments faster and is less expense for the state. You can sign up for electronic payments here: [State of Oregon: Accounting system - ACH - vendor/direct deposit.](#)

Please be aware that the Oregon Department of Revenue monitors payments made by state agencies and can place holds on payments if the payee owes certain types of obligations to the State of Oregon.
