BACKGROUND

Include the following points for OAR changes or informational items:

In April the National Science Foundation announced that Oregon and thirteen other states, in collaboration with researchers from the University of Colorado and the University of Washington, will receive funding to build capacity to implement the vision of the *Framework for K-12 Science Education*. The focal point of this work will be to develop a statewide team to investigate best practices and build equitable foundations to support the 2014 Oregon Science Standards (Next Generation Science Standards).

I would like to invite one member of the State Board to have an honorary seat on this NSF science board to remain engaged in the implementation of the Oregon Science Standards.
