

Reforestation Project Planning

NAME(S): _____

STEP ONE: LOCATION

- What area of land needs replanted?
- What is the current condition of the land? Does anything need done before planting?

STEP TWO: TREES

- What trees are native to the selected location?
- Challenge: How many trees can the selected location hold?

STEP THREE: ORDERING

- Will the order include seeds, seedlings, or saplings?

STEP FOUR: PLANTING

- What is the growing season for the trees you have chosen to plant?
- Is the soil healthy enough to plant?

STEP FIVE: MAINTAINING

- What tasks will need to be completed to monitor and maintain the area?

Review & Reflection Questions:

1. Do you believe reforestation is the best option for your assigned location? Why or why not?

2. What are some of the benefits of reforestation to this area?
