# Executive summary

The Health Evidence Review Commission (HERC) is charged by state statute to maintain the Prioritized List of Health Services. The Legislature uses this list to determine the Oregon Health Plan benefit package. HERC uses clinical effectiveness, cost-effectiveness and public input to rank combinations of conditions and treatments on the list by importance. The 2022–23 Prioritized List of Health Services (aka Prioritized List) in Appendix C shows the final rankings approved by HERC during its March 11, 2021 biennial review.

The commission made the following biennial changes:

- Developed new coverage indications for inguinal and femoral hernias. Previously, the surgeries for these hernias appeared on line 168 only with severe complications. The commission added coverage for inguinal and femoral hernias causing significant pain or functional limitations to line 168. All ventral hernias remain on line 524.
- Combined two lines containing medical and surgical treatments for chronic pancreatitis. Previously, evidence did not support surgery for this condition. Newer evidence finds surgery can be effective in certain situations. These procedures were added to line 250.
- Moved treatments for foreign bodies in nose and ear to a higher line. These services were below the 2020–21 funding line. They now appear on line 429. Conditions on this line are easily treated and prevent complications.
- Moved Meniere’s disease to a lower priority line (line 527) given the lack of effective therapies.
- Created a new line to encompass treatments for uterine polyps (line 421). Uterine polyps and uterine leiomyomas were previously listed together on line 404. However, the combined line contained procedures not appropriate for uterine polyps, such as a total hysterectomy. The creation of the separate line clarifies which procedures pair with which conditions.

The commission also considered reprioritizing panniculectomy (a surgery to remove excess skin after significant weight loss) to a higher line. Ultimately, the commission did not make this change. Instead, it developed a new guideline for the existing line specifying coverage indications. This service remains on line 521.

HERC appreciates the opportunity to continue its work on health care prioritization to provide the most beneficial, cost-effective services to Oregon’s Medicaid population.

# Charge to the Health Evidence Review Commission

HB 2100 (2011) established the Health Evidence Review Commission (HERC) in part to:

“[D]evelop and maintain a list of health services ranked by priority, from the most important to the least important, representing the comparative benefits of each service to the population to be served.”\*

As it performs this work, HERC must also:

“[C]onsider both the clinical effectiveness and cost-effectiveness of health services, including drug therapies, in determining their relative importance using peer-reviewed medical literature...”†

HERC is composed of 13 members appointed by the Governor and confirmed by the Senate:

- Five physicians (including one doctor of osteopathy and one hospital-based physician)
- Two consumer representatives
- A public health nurse
- A behavioral health representative
- A dentist
- A complementary and alternative medicine provider
- A pharmacy representative, and
- A health insurance representative.

HERC relies heavily on input from its subcommittees and ad hoc advisory panels. HERC’s Value-based Benefits Subcommittee (VbBS) reviews all potential changes to the Prioritized List. VbBS includes both commission members and other provider and stakeholder representatives.‡ An Oral Health Advisory Panel, Behavioral Health Advisory Panel and Genetics Advisory Panel provide recommendations on the placement of new codes and issues specific to their areas of expertise.

\* Oregon Revised Statutes (ORS) 414.690(3).

† Oregon Revised Statutes 414.690(4)(c).

‡ See Appendix A for a list of the commission and VbBS members

HERC's Prioritized List consists of lines, each of which contains diagnosis and treatment codes representing the services on that line. The conditions on the list are represented by the International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM). Medical treatments are listed using codes from the American Medical Association's Current Procedural Terminology (CPT), the American Dental Association's Current Dental Terminology (CDT) and the Healthcare Common Procedure Coding System (HCPCS).

Appropriate diagnostic services are covered under the Oregon Health Plan (OHP) whether or not the final diagnosis appears in the funded region of the Prioritized List. After a diagnosis is made, the list is used to determine whether further treatments are covered. Therefore, the list does not include diagnosis codes for signs and symptoms or procedure codes for diagnostic procedures.

Palliative care is covered regardless of the underlying condition. The first of six statements of intent associated with the Prioritized List defines the palliative care benefit.

Appropriate ancillary services are covered if the condition or the treatment is in the funded region. This includes items and services such as prescription drugs, durable medical equipment or removal of sutures. Ancillary service codes do not appear on the list due to the number of codes that would appear on most lines. In some cases, HERC has created guidelines for specific ancillary and diagnostic services to clarify its evidence-informed intent for coverage of these services.

Some procedure codes represent services excluded from the list because they are not appropriate for coverage. These include codes for experimental treatments, travel vaccines, cosmetic services and other services not included in the Oregon Health Plan. Diagnosis codes that are non-specific or which do not identify a health condition or disease process are also often not included on the Prioritized List.

The Oregon Health Authority's Health Systems Division maintains electronic files to keep track of codes that are not on the list and to ensure appropriate fee-for-service reimbursement. OHP providers and contracted coordinated care organizations (CCOs) have web-based access to this information through the Medicaid Management Information System (MMIS). This ensures service coverage is as uniform as possible.

HERC staff regularly consult with CCO medical directors and staff from the OHA's Health Systems Division and Office of Actuarial and Financial Analytics to determine what effect prioritization changes might have on program cost and administrative burden. These entities share these findings with HERC during its decision-making process as appropriate. This information can also help plan the implementation of a list change, including any necessary changes to the CCO global budgets.

# The prioritization methodology

HERC continues to use the prioritization methodology in place since 2008.

- Each line item on the Prioritized List is assigned to one of eight broad health care categories. These categories establish a basic framework for the list (see Figure 1).
- Once the line items have been assigned to one of the categories, HERC uses a list of criteria to sort them within the categories (shown as Figure 2, with the range of scores shown in parentheses).

These measures capture the individual and population health effects that HERC believes are essential in determining the importance of a condition-treatment pair.

Because not every service in category 1 is more important than every service in category 2, and so on, a weight is applied to each category. The category weights are shown in parentheses after the title for each category in Figure 1. This weight is multiplied by the total criteria score for each condition-treatment pair. A total score is then calculated for each line using the formula shown in Figure 3. This score is used to sort all the line items. The lowest net cost breaks any ties.

HERC then adjusts items by hand for cases where the ranking given by this methodology did not reflect the importance of the service. This is the case for 3% of the line items.

Services near the top of the list as a result of this methodology include the following:

- Maternity care and newborn services
- Preventive services found to be effective by the U.S. Preventive Services Task Force, and
- Treatments for chronic diseases where ongoing maintenance therapy can prevent exacerbations that lead to avoidable, high-intensity service utilization, morbidity and death. Examples of these diseases include diabetes, major depression, asthma and hypertension.

1. Maternity and newborn care (100)
2. Primary prevention and secondary prevention (95)
3. Chronic disease management (75)
4. Reproductive services (70)

# Biennial review of the Prioritized List

HERC conducted the 15th biennial review of the Prioritized List of Health Services in 2020–21.

The most substantial change related to coverage of inguinal and femoral hernias. An OHA Ombuds Program request prompted review of this condition. After review, HERC determined uncomplicated inguinal hernias causing pain, impeding function or impairing an individual's ability to work should be prioritized higher on the list. The commission also revised the guideline for complicated hernias to ensure appropriate use of available treatments. Previously, repair of hernias was covered only if the hernia was strangulated (the intestines had their blood supply cut off) or obstructed.

In addition, the commission made several other important changes to the list. The commission:

- Combined the surgical and medical lines for chronic pancreatitis. Previously, the commission found that surgical therapy for this condition was not effective. However, new evidence shows that surgery can be effective in severe cases.
- Reprioritized the line regarding foreign bodies in the ear and nose. These are easily removed in the office or emergency department and removal prevents complications such as infection, loss of hearing and eardrum perforation.
- Separated uterine polyps and uterine leiomyoma (fibroids) onto separate lines, as polyps do not require extensive treatments such as hysterectomy.
- Reprioritized Meniere's disease (a disease of the inner ear) to a lower line due to evidence that available treatments are not effective.

The commission also considered reprioritizing panniculectomy (a surgery to remove excess skin after significant weight loss) to a higher line. After review, the commission found concerning evidence of harms and made no change. The surgery remains on line 521. Because it might be considered for coverage by exception, the commission developed a guideline specifying the appropriate indications for this surgery.

Tables 1 through 3 show the structural changes made to lines during this biennial review.

## Other biennial review changes

This biennial review did not change the number of lines on the list. The Prioritized List in Appendix C is 662 lines long. However, changes in line structure occurred both in the list’s funded and unfunded regions. Therefore, line 472 on the new list equates to the funding level of line 471 on the 2020–21 list. This funding level also equates to that of the 2016–17 list in accord with the current Oregon Health Plan Medicaid 1115(c) demonstration waiver.

# Interim modifications to the Prioritized List

In addition to the biennial review of the Prioritized List, HERC maintains the list as necessary between reviews. The 2022–23 Prioritized List includes interim modifications previously reported to legislative leadership with the lists published on Oct. 1, 2019, Jan. 1, 2020, Mar. 13, 2020, Aug. 14, 2020, Oct. 1, 2020, Jan. 1, 2021 and Feb. 1, 2021.

Notices for these lists are located on HERC’s website. They include a detailed description of the thousands of changes made due to:

- Incorporating new medical codes
- Advancements in technology
- New data regarding existing technologies, and
- Error or omission corrections.

HERC continues to use a transparent process which allows any stakeholder to request review of a prioritization topic. Interim modifications to the 2020–2021 Prioritized List will be published Oct. 1, 2021. These changes will be incorporated into the Jan. 1, 2022 Prioritized List when it is published in December 2021.

# Recommendations

The Health Evidence Review Commission is pleased to offer these recommendations to the Governor and 81st Oregon Legislature:

1. Adopt the Prioritized List of Health Services for calendar years 2022–23 appearing in Appendix C. Once interim modifications to the list are completed in October 2021, the complete 2022–23 Prioritized List of Health Services will be published on HERC’s website.
2. Adopt the new and revised statements of intent and practice guidelines incorporated into the Prioritized List (Appendix B).
3. Use the Prioritized List to delineate less important services to determine the benefit package under the Oregon Health Plan. A funding level covering lines 1–472 equates to the level required under the terms and conditions of the 1115 (c) waiver extension the Department of Health and Human Services granted in January 2017.

HERC thanks the Governor and Legislature for the opportunity to serve the citizens of Oregon.

# Appendix B: Practice guideline changes

## Changes related to inguinal hernias

Revised existing guideline note as follows:

### Guideline note 24, Complicated Hernias

Line 168, 524

Complicated inguinal and femoral hernias in men are included on Line 168 if the hernia:

1. Causes symptoms of intestinal obstruction and/or strangulation; OR
2. Is incarcerated (defined as non-reducible by physical manipulation); OR
3. Causes pain and functional limitations as assessed and documented by a medical professional; OR
4. Affects the patient's ability to obtain or maintain gainful employment.

Repair of inguinal and femoral hernias in women are included on Line 168 due to the different natural history of disease in this population.

Ventral hernias are included on line 524. Incarcerated ventral hernias (including incarcerated abdominal incisional and umbilical hernias) are included on line 524, because the chronic incarceration of large ventral hernias does not place the patient at risk for impending strangulation. Ventral hernias are defined as anterior abdominal wall hernias and include primary ventral hernias (epigastric, umbilical, Spigelian), parastomal hernias and most incisional hernias (ventral incisional hernias). K42.0, K43.0, K43.3, K43.6 and K46.0 are included on line 524 when used to designate incarcerated abdominal incisional and umbilical hernias without intestinal obstruction or gangrene.

# Changes related to panniculectomy

New guideline note (effective Oct. 1, 2021):

## Guideline note 206, Panniculectomy

Line 625

Panniculectomy (CPT 15830) is included on this line when ALL of the following conditions are met:

1. The pannus hangs at or below the level of the symphysis pubis as evidence by photographs; AND
2. The pannus is causing persistent intertriginous dermatitis, cellulitis, or skin ulceration, which is refractory to at least three months of medical management, including topical antifungals, topical and/or systemic corticosteroids, and/or local or systemic antibiotics; AND
3. There is documented difficulty with ambulation and/or interference with the activities of daily living due to the pannus.

If the procedure is being performed following significant weight loss, in addition to meeting the criteria noted above, there should be evidence that the individual has maintained a stable weight for at least six months. If the weight loss is the result of bariatric surgery, panniculectomy should not be performed until at least 18 months after bariatric surgery and only when weight has been stable for at least the most recent six months.

Panniculectomy is not included on this line for any other indication, including but not limited to when performed primarily for ANY of the following:

1. Treatment of neck or back pain; OR
2. Improving appearance (i.e., cosmesis); OR
3. Treating psychological symptomatology or psychosocial concerns; OR
4. When performed in conjunction with abdominal or gynecological procedures (e.g., abdominal hernia repair, hysterectomy, obesity surgery) unless criteria for panniculectomy are met separately.

## Frequently asked questions: A user's guide to the Prioritized List

This summary of frequently asked questions and their answers will:

- Help readers understand the format of the Prioritized List
- Define important terms, and
- Provide educational examples.

### 1. Does the line descriptor contain every diagnosis?

No. Some lines have only one diagnosis code, but others may have many. The line descriptor describes the most frequent condition or a cluster of conditions represented by the ICD-10-CM codes. For example, cystic fibrosis is listed by itself on line 20, but the codes listed on line 206 — described broadly as “Zoonotic bacterial diseases” — include plague, tularemia, anthrax, brucellosis, cat scratch disease and other specific diseases.

### 2. What do the line numbers represent?

The line numbers represent the ranking of the condition-treatment pairs assigned by the Health Evidence Review Commission. The lines are ranked according to how important the commission determines the services are to the population being served. The services on line 1 are most important to provide and those on line 662 are least important.

### 3. How is the funding line established?

The Oregon Legislature will review the Prioritized List included in this report. Per an agreement with the Centers for Medicare and Medicaid Services (CMS), Oregon will not move the funding line from its current relative position during the current Medicaid waiver demonstration period.

If the Legislature accepts this report, it will establish the list's funding line at line 472 as part of the state budget. This will occur unless the Legislature seeks a waiver amendment to move the funding line. Upon CMS approval, the benefit package represented by the services in the funded region will be reimbursed under the Oregon Health Plan beginning no earlier than Jan. 1, 2022.

## 4. Why do many diagnoses appear more than once?

A diagnosis or condition may have a range of treatments including medical, surgical or transplant services. These treatments may vary in their clinical effectiveness and/or cost-effectiveness. Therefore, the Health Evidence Review Commission gives them separate rankings. For example, all bone marrow or solid organ transplants are listed separately from the medical or surgical treatments for the same conditions.

## 5. What are statements of intent?

Statements of intent allow HERC to indicate its intent for coverage of services that cannot be easily identified by medical codes. The titles of these statements appear in Appendix C after the Prioritized List.

## 6. What are practice guidelines?

Guidelines (also referred to as “guideline notes”) are used to:

- Further delineate conditions when the coding system does not adequately distinguish between subgroups that are treated differently, or
- Indicate the most effective use of a particular treatment.

This report provides a list of the guideline titles. This includes guidelines associated with diagnostic and ancillary services. Some of these services appear on the Prioritized List, while others do not. A full list of the practice guidelines is posted on HERC’s website.

## 7. What are diagnostic services and are they covered?

In most instances, diagnostic services are covered and do not appear on the list. If a condition below the funding line is diagnosed, the diagnostic visit and any necessary tests are covered. However, subsequent office visits and ancillary services such as home health services will not be covered.

Certain diagnostic services have either not been shown to be effective or do not affect management of the patient and their health. Therefore, the commission recommends these not be covered under the Oregon Health Plan.

## 8. What about preventive services?

The Oregon Health Plan encourages prevention and early intervention. Effective preventive services for adults and children are ranked on line 3. This includes services recommended by:

- The U.S. Preventive Services Task Force (“A” and “B” Recommendations)
- The American Academy of Pediatrics (Bright Futures Guidelines)
- The Health Resources and Services Administration (Women’s Preventive Services), and
- The Advisory Committee on Immunization Practices.

In addition, preventive dental services are included on line 53.

## 9. What are ancillary services and are they covered?

Ancillary services are goods, services and therapies considered integral to the condition’s successful treatment. They include:

- Prescription drugs
- Durable medical equipment
- Hospital care, and
- Anesthesia.

Ancillary services are usually covered when used for a covered condition. However, they may be subject to practice guidelines, Oregon Administrative Rules or other prior authorization criteria. For some ancillary services, HERC has developed guidelines to ensure appropriate use of these services.

In addition, some ancillary services are listed in guideline notes 172 and 173. HERC found that they met the criteria for these guideline notes, including little or no benefit, lack of cost-effectiveness or harms that outweigh benefits.

## 10. What resources are available to answer other questions?

See HERC’s webpage for questions about the Prioritized List, the methodology used to create and maintain the list, or other information concerning the work of the Health Evidence Review Commission.

See the Health Systems Division’s Oregon Health Plan webpage for questions about plan eligibility or administration, or contact our office at 503-580-9792.

# Statements of intent and guideline note descriptions for the “2022–23 Prioritized List of Health Services”

## Statements of intent

Statement of intent 1: Palliative care

Statement of intent 2: Death with Dignity Act

Statement of intent 3: Lower priority services

Statement of intent 4: Role of the prioritized list in coverage

Statement of intent 5: Treatment of chronic pain

Statement of intent 6: Telephonic services during an outbreak or epidemic

## Guideline notes for ancillary and diagnostic services not appearing on the Prioritized List

Guideline note A1: Nerve blocks

Guideline note A2: Self-monitoring of blood glucose in diabetes

Guideline note A3: IVC filters for trauma

Guideline note A4: Smoking cessation and elective surgical procedures

Guideline note A5: Telehealth, teleconsultations and online/telephonic services

Guideline note D1: Non-prenatal genetic testing guideline

Guideline note D2: Implantable cardiac loop recorders/subcutaneous cardiac rhythm monitors

Guideline note D3: Echocardiograms with contrast for cardiac conditions other than cardiac anomalies

Guideline note D4: Advanced imaging for low back pain

Guideline note D5: Neuroimaging for headache

Guideline note D6: Breast cancer screening in above-average risk women

Guideline note D7: Neuroimaging in dementia

Guideline note D8: Diagnostic testing for obstructive sleep apnea (OSA) in adults

Guideline note D9: MRI for breast cancer diagnosis

Guideline note D10: MRI in multiple sclerosis

- Guideline note D11: MRI of the spine (cervical and thoracic)
- Guideline note D12: Upper endoscopy for GERD or dyspepsia symptoms
- Guideline note D13: Screening for carotid artery stenosis
- Guideline note D14: Lung cancer screening
- Guideline note D15: Computer-aided mammography
- Guideline note D16: Osteoporosis screening and monitoring in adults
- Guideline note D17: Prenatal genetic testing
- Guideline note D18: Advanced imaging for staging of prostate cancer
- Guideline note D19: SPECT
- Guideline note D20: Ophthalmology diagnostic visits
- Guideline note D21: Pharmacogenetics testing for psychiatric medication management
- Guideline note D22: PET scan guidelines
- Guideline note D23: Urine drug testing
- Guideline note D24: Cardiac magnetic resonance imaging
- Guideline note D25: Hereditary cancer genetic testing
- Guideline note D26: Neurobehavioral status exams and neuropsychological testing
- Guideline note D27: SARS-COV-2 (COVID-19) testing

### Guideline notes for health services that appear on the Prioritized List

- Guideline note 1: Routine cervical cancer screening
- Guideline note 2: Fetoscopic surgery
- Guideline note 3: Prophylactic treatment for prevention of breast cancer in high risk women
- Guideline note 4: Tobacco dependence, including during pregnancy
- Guideline note 5: Obesity and overweight
- Guideline note 6: Rehabilitative and habilitative therapies
- Guideline note 7: Erythropoiesis-stimulating agent (ESA) guideline
- Guideline note 8: Bariatric surgery
- Guideline note 9: Wireless capsule endoscopy

- Guideline note 10: Central serous chorioretinopathy and posterior cyclitis
- Guideline note 11: Colony stimulating factor (CSF) guidelines
- Guideline note 12: Patient-centered care of advanced cancer
- Guideline note 13: Hemangiomas, complicated
- Guideline note 14: Second bone marrow transplants
- Guideline note 15: Heterotopic bone formation
- Guideline note 16: Proton beam therapy for cancer
- Guideline note 17: Preventive dental care
- Guideline note 18: Ventricular assist devices
- Guideline note 19: Neuropsychological testing for PTSD
- Guideline note 20: Attention deficit/hyperactivity disorders in children
- Guideline note 21: Severe inflammatory skin disease
- Guideline note 22: Planned cesarean delivery
- Guideline note 23: Colon cancer surveillance
- Guideline note 24: Complicated hernias
- Guideline note 25: Stem cell transplantation for neuroblastoma
- Guideline note 26: Breast cancer surveillance
- Guideline note 27: Sleep apnea
- Guideline note 28: Trochanteric bursitis
- Guideline note 29: Tympanostomy tubes in acute otitis media
- Guideline note 30: Testicular cancer
- Guideline note 31: Cochlear implantation
- Guideline note 32: Cataract
- Guideline note 33: Nitrous oxide for labor pain
- Guideline note 34: Extraction of impacted wisdom teeth
- Guideline note 35: Sinus surgery
- Guideline note 36: Adenotonsillectomy for indications other than obstructive sleep apnea

- Guideline note 37: Surgical interventions for conditions of the back and spine other than scoliosis
- Guideline note 38: Subtalar arthroereisis
- Guideline note 39: Endometriosis and adenomyosis
- Guideline note 40: Uterine leiomyoma
- Guideline note 41: Scoliosis
- Guideline note 42: Pancreas/kidney transplantation
- Guideline note 43: Lymphedema
- Guideline note 44: Menstrual bleeding disorders
- Guideline note 45: Other diseases of the vocal cords
- Guideline note 46: Age-related macular degeneration
- Guideline note 47: Urinary incontinence
- Guideline note 48: Frenulectomy/frenulotomy
- Guideline note 49: Wearable cardiac defibrillators
- Guideline note 50: Pelvic organ prolapse surgery
- Guideline note 51: Chronic otitis media with effusion
- Guideline note 52: Chronic anal fissure
- Guideline note 53: Basic periodontics
- Guideline note 54: Conduct disorder
- Guideline note 55: Pelvic pain syndrome
- Guideline note 56: Non-interventional treatments for conditions of the back and spine
- Guideline note 57: Pelvic physical therapy for interstitial cystitis
- Guideline note 58: Impulse disorders
- Guideline note 59: Dysmenorrhea
- Guideline note 60: Opioids for conditions of the back and spine
- Guideline note 61: Hospitalization for acute viral infections
- Guideline note 62: Negative pressure wound therapy
- Guideline note 63: Hydrocele repair

Guideline note 64:	Bone marrow transplant for sickle cell disease
Guideline note 65:	Severe cystic acne
Guideline note 66:	Cervical dysplasia
Guideline note 67:	Brow ptosis
Guideline note 68:	Treatment of chronic lower extremity venous disease
Guideline note 69:	Electroconvulsive therapy (ECT)

# Appendix D: Evidence-based reports

Coverage guidances are evidence-based reports that include recommendations to payers and providers about health service coverage. The Health Evidence Review Commission (HERC) also develops multisector intervention reports to guide payers considering interventions outside of the clinical setting that can improve individual or population health. Note that multisector interventions are not required Oregon Health Plan benefits. They are appended to the Prioritized List as a resource for coordinated care organizations in making decisions about health-related services offered under Oregon’s approved waiver.

The HERC approved the following evidence-based reports from May 2019 through March 2021 (approval dates noted below). After approval, reports are reviewed when staff become aware of evidence or information that may result in a new recommendation. Reports reaffirmed or updated from a prior review are noted with an asterisk.

Where indicated, the new or updated report resulted in approved changes to the Prioritized List. The “list changes” column in the following table shows whether changes to the Prioritized List were approved between August 2019 and March 2021 in conjunction with these coverage guidance approvals.

## Evidence-based status

Evidence-based report	Approval date	List changes	Report type
Extended Stay Centers: Patient characteristics and appropriate procedures	5/16/2019	No	Statutory Report - <i>HB 4020 (2019)</i>
Community Health Workers for Patients with Chronic Disease	11/14/2019	Yes	Multisector Intervention Report <sup>†</sup>
Temporary Percutaneous Mechanical Circulatory Support with Impella Devices	1/16/2020	Yes	Coverage guidance
Planned Out-of-Hospital Birth*	8/13/2020	Yes	Coverage guidance
Multicomponent Interventions to Improve Screening for Breast, Cervical or Colorectal Cancer	10/1/2020	Yes	Multisector Intervention Report <sup>†</sup>

\* Report has been updated from a prior review or since initial publication.

† Multisector Interventions are listed at the end of the Prioritized List but are not part of the OHP benefit package.
