Poll: About you!

- Please respond to this quick poll so everyone can see a snapshot of National DPP partners here today. Choose from the following options.
 - Coordination Care Organization staff
 - Community-based Organization interested in becoming CDC-recognized for National DPP
 - Current CDC-recognized National DPP organization
 - Clinical provider
 - OHP Member/advocate
 - Other Community Member

TA opportunities

Webinar 1: National DPP 101

Audience: CCOs, CBOs and clinical providers

- ✓ Learn about key program elements necessary for payment including member/patient eligibility, program modalities, current program providers and their credentials, and CDC-recognition.

Webinar 2: Medicaid Billing for National DPP in Oregon

Audience: CCOs, CBOs, & clinical providers

- ✓ Understand important parameters around billing for the National DPP program. These include billing cadence and rates, diagnosis codes, rendering and supervising providers, and the two provider types to bill under.

Individualized Technical Assistance & FAQ

- One-on-one technical assistance is available to CCO staff involved in delivering National DPP programming in their service regions
- TA will help to troubleshoot and resolve barriers to billing and payment
- Questions that come up via TA that are not in the Companion Guide will be addressed ongoing in a FAQ document.

Contact **Marissa McCartney** (mccartnm@ohsu.edu) for more information and to request individualized TA.

Webinar agenda

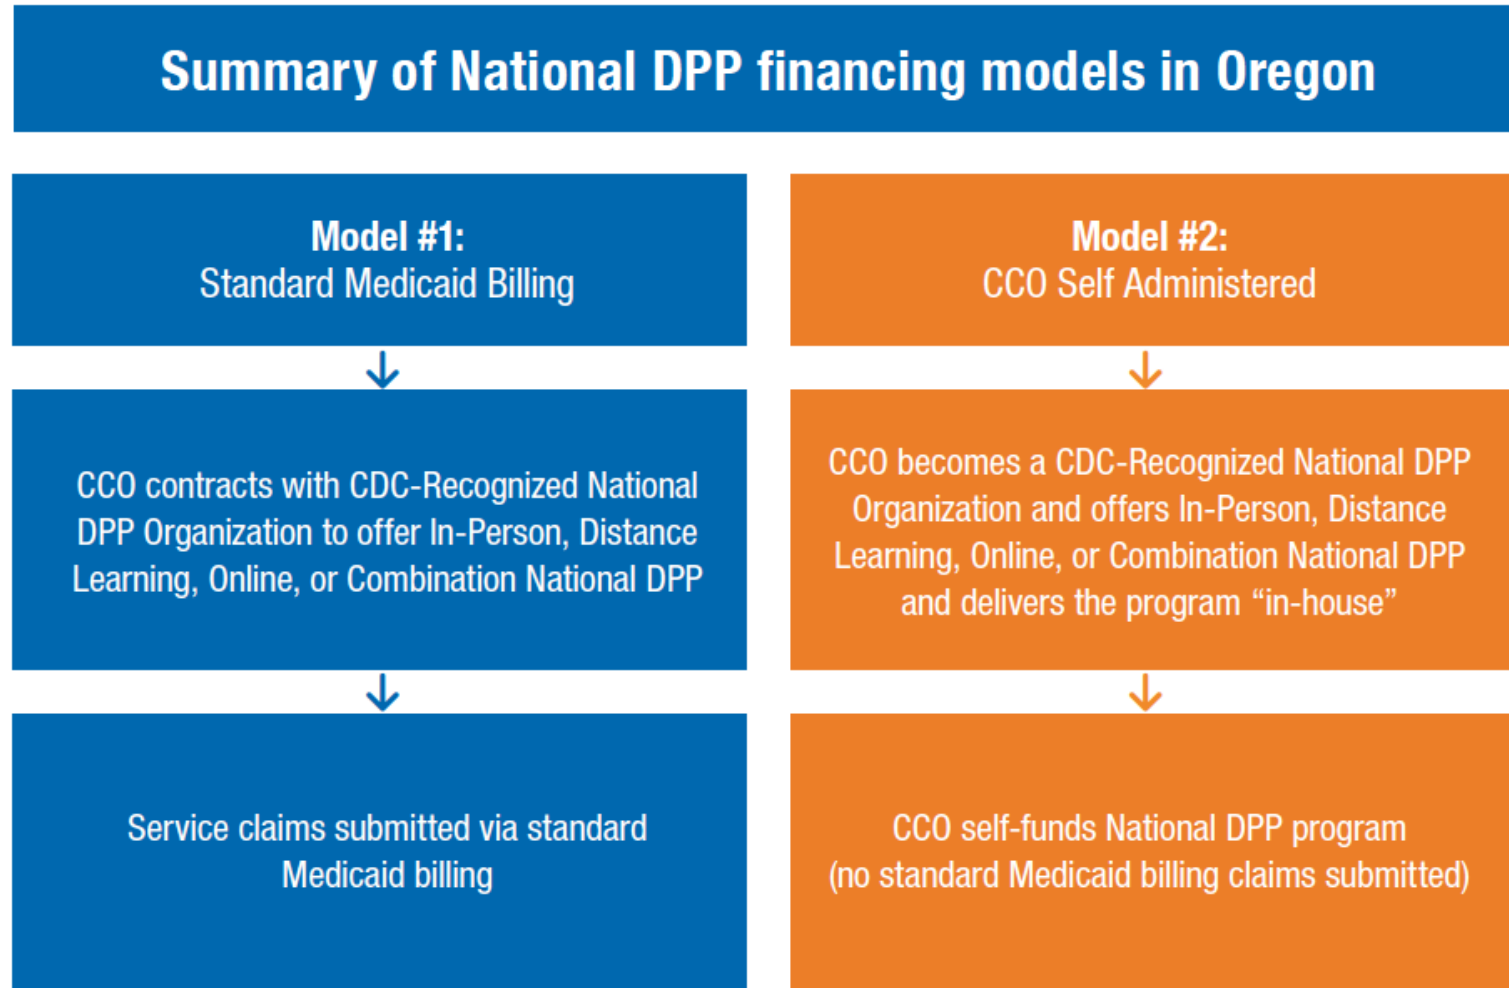

- Overview of National DPP financing models
- Medicaid billing parameters
- Billing cadence, coding and documentation requirements
- Resources

Ways to finance National DPP as a covered benefit

Summary of National DPP financing models

Model #1: CCO contracts with CDC-recognized National DPP organization to provide services

What modalities would best serve our members?

- In-person, Distance, Online or Combination

Who will we partner and contract with to provide services?

- Reference [CDC National DPP Registry](#); or contract with a known provider

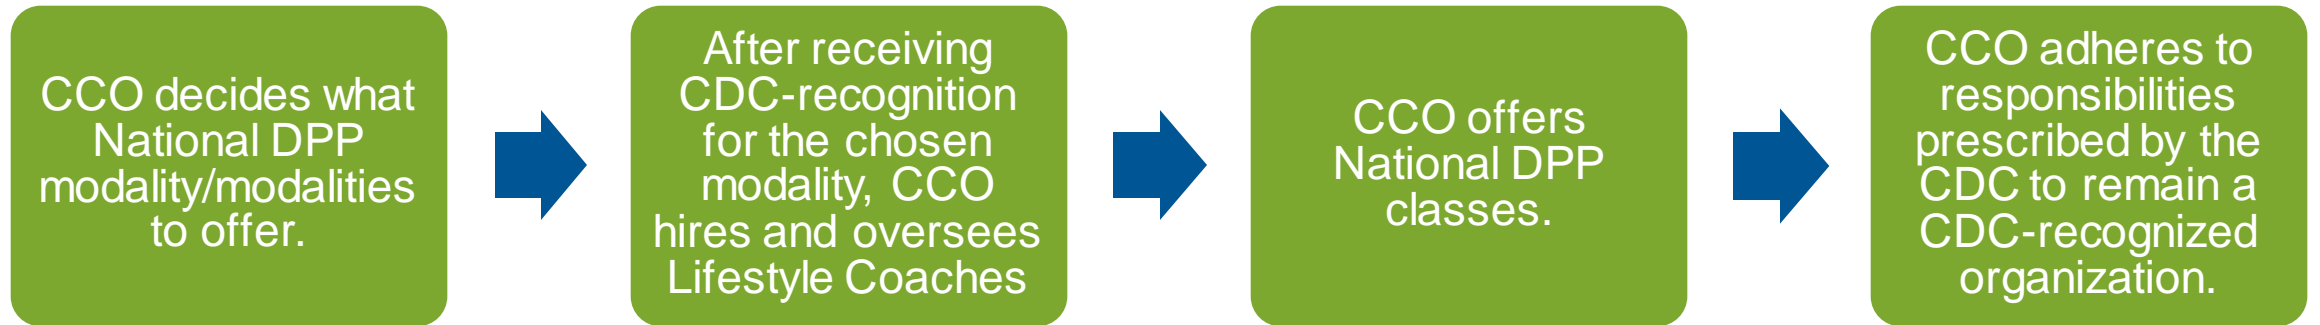

Does the provider have billing capabilities?

- Services rendered can be submitted via Medicaid claims for reimbursement.

What provider type will services be billed under?

- **Provider Type 09:** If provider has Medicaid enrollment number , **Provider Type 63:** CCO can enroll provider and bill under encounter only.

Model #2: CCO Self-administers National DPP

See Appendix A in the Companion Guide for more information on becoming a CDC-recognized National DPP organization

Alternative models

- CCOs can support those not eligible for OHP by utilizing a community benefit initiative (CBI) through Health-Related Services (HRS).
- In Lieu of Services (ILOS) claims submissions are appropriate in some cases for the National DPP.
 - Please note: guidance is still being developed for these models and will be released in the future.

 Visit the [ILOS](#) and [HRS](#) webpages for more information about these reimbursement pathways. Questions can be directed to: medicaid.programs@odhsoha.oregon.gov.

Check in poll

- Please share which of these models and reimbursement pathways you are currently using or planning to use?
 1. CCO and National DPP organization partnering to bring services to members (will bill standard Medicaid)
 2. My CCO self-administers this benefit and provides services in house
 3. Our CCO (or CCO partner) is interested in finding out more about using HRS to support National DPP programs
 4. Our CCO (or CCO partner) is interested in finding out about when it is appropriate to use ILOS to support National DPP programs

Key provider-related terms to know

Provider roles to know for billing purposes

- **Rendering provider:** responsible for providing or overseeing the health care services. The rendering provider's role is focused on delivering the care.
- **Billing provider:** responsible for submitting the claims and invoices for reimbursement. the billing provider ensures accurate and timely submission of claims to insurance companies or third-party payers.
- **Referring provider:** identifies the need for specialized care and initiates the referral process. Referring providers rely on the expertise and services provided by rendering providers to address the patient's specific healthcare needs.

Provider types to bill under for National DPP

- Provider types include individuals, facilities, and vendors. The provider's specialty is typically represented as a code indicating what field of health care a provider has additional education in to make them a specialist in a certain field.
 - Not listed on the claim form, higher level assignment when the provider (or organization) enrolls or credentials with OHP.
- National DPP Provider Types to bill under
 - Provider Type 09: Medicaid enrolled
 - Provider Type 63: Encounter only

Provider Type 09

- **Provider Type 09 (Medicaid enrolled)** : the rendering (or supervising) provider on the claims form must be credentialed and have a Medicaid enrollment number.
 - Both OHA and CCOs accept
 - To bill OHP FFS, the CDC-recognized National DPP organization will need to list three types of Medicaid enrolled providers on claims: 1) referring provider, 2) rendering provider, and 3) billing provider.
 - All rendering providers listed on OHP claims must be current Medicaid enrolled providers.

Supervising providers (Provider Type 09)

- Documented as rendering provider on claims form
- Enrolled and credentialed, but not necessarily directly delivering services
- Overall responsibility for program quality and fidelity
- Are not required to be in the same office where auxiliary community health education and outreach are being performed.
- Programs within clinical providers that have OHP enrollment can bill through the existing clinic or provider for other services.

Provider Type 63

- CCOs submit form 3108 for National DPP at the organization level. Two specialty codes:
 - 497 for In-person and Distance Learning programs
 - 498 for Online programs
- Ensuring NPIs
- Each CCO is then responsible for credentialing and ensuring National DPP supplier providers.
- Only billing provider needs to be on claim form (rendering provider not required)

In-state vs out-of-state National DPP providers

In-state

In-person or combination that includes in-person component

Strongly encouraged for all modalities

Out-of-state

Distance or online (when necessary)

Must adhere to provider enrollment requirements

Oregon Administrative Rules (OARs) 410-120-1260 and Chapter 943-120. Out-of-state providers should also contact Oregon licensing boards to learn about any requirements to provide services in Oregon.

National DPP reimbursement methodology and rates

Let's Review!

National DPP modalities

- In-person
- Distance learning
- Online
- Combination

Reimbursement methodology & rates

OHP Fee-for-Service (FFS)	CCOs
Rates of reimbursement are detailed in the new National DPP Companion Guide	Reimbursement methodologies are determined by each individual CCO
Different reimbursement rates by modality	
Different reimbursement cadence by modality	

In-person National DPP Oregon FFS payments

	Total Number of covered in-person sessions	Maximum allowable payment
Year One		
Months 1-6	16 core sessions (per CDC curriculum)	\$368
Months 6-12	12 maintenance sessions (up to two per month)	\$276
Year Two		
Months 1-12	24 maintenance sessions (up to two per month)	\$552
Program Total	52 sessions	\$1,196

- o CPT® code: 0403T; consult OHP telehealth rules and guidance for billing synchronous two-way delivery.
- o Rate: \$23 per unit (limit 1 unit per day)
- o Telehealth delivery use modifier GT or 95

Coding and billing procedures

Coding and billing information in the National DPP Companion Guide

- CPT and ICD-10 diagnosis coding (including primary and secondary diagnosis)
- Billing requirements for National DPP Providers billing OHP FFS
- Difference in coding between
 - Synchronous programs (In-person and Distance learning)
 - Asynchronous programs (Online)

Coding

This coding section applies to National DPP providers.

What are the coding requirements for National DPP services?

CCOs have the option to use or allow either:

- CPT® codes 0403T (for In-Person and Distance) and 0488T (for Online), or
- Medicare Healthcare Common Procedural Coding System (HCPCS) coding. Helpful links to this are as follows:
 - » [MDPP CMS page](#)
 - » [General link about HCPCS codes](#)
 - » [2023 HCPCS codes that are used for the Medicare Diabetes Prevention \(MDPP\) Program](#)
- CCOs who choose to use CPT® coding for National DPP medical billing will use a specific combination of a CPT® code with an ICD-10 diagnosis code:
 - » Primary diagnosis code of R73.03 (prediabetes) or Z86.32 (gestational diabetes history), and
 - » The appropriate E66.01 – E66.9 code (obesity) as Primary and appropriate Z68.23-Z68.45 codes (Body mass index) as Secondary. The secondary body mass index code is required on the first claim only. On subsequent claims only Primary is needed.

National DPP Providers billing OHP FFS are required to use CPT® codes 0403T and 0488T. National DPP providers can review the coding addendum later in this document or the HERC prioritized list for pairing of CPT® and ICD-10 diagnosis code.

What's the difference between CPT® codes 0403T and 0488T?

- CPT® codes 0403T and 0488T are specific to National DPP.
- Code 0403T signifies a program that is In-person or Distance Learning and is offered synchronously.
- Code 0488T indicates a program that is online or via electronic technology and offered asynchronously. However, it can include in-person components.

National DPP Lifestyle Program (limit 1 unit per day)	CPT® code
In-person program [synchronous]	0403T
Distance learning [synchronous telehealth or video conferencing for sessions]	0403T with a GT or 95 modifier
Online program* [asynchronous]	0488T

Billing CCOs

- Billing procedures determined by individual CCOs
- Traditional Medicaid enrollable providers must be contracted and credentialed with each CCO they partner with
- CCOs may want to use HCPCS codes to create billing alignment in certain circumstances

Check in Poll

Of the content presented in this section, where do you still have questions?

- Provider roles and billing types (Type 09, 63)
- Rendering vs supervising provider for claims
- Contracting in-state and out-of-state
- Reimbursement methodologies of either OHP FFS or CCOs
- Payment and fee schedules
- Coding and billing procedures!
- Other

National Diabetes Prevention Program

Effective January 1, 2019, the National Diabetes Prevention Program (DPP) is a Medicaid and Medicare covered benefit in Oregon. Resources are available for CCOs and primary care teams to support work to prevent diabetes at both the system and clinic levels.

[See program information and benefit coverage in Oregon](#), including billing guidance, training opportunities, implementation resources, and more.
