### Background - Application for Oregon's CCBHC Program

### **Important Note:**

Before completing this application for Oregon's Certified Community Behavioral Health Clinic (CCBHC) Program, Oregon Health Authority (OHA) highly recommends your organization reviews and completes the New Integrated CCBHC Certification Criteria Feasibility and Readiness Tool. Depending on your familiarity with the Readiness Tool and your organization's associated responses, this online application may take between 1 hour to 3 hours to complete. The tool and additional requirements for CCBHC certification are located on the Oregon Health Authority CCBHC website

Clinics applying to become CCBHCs in Oregon need to meet the Substance Abuse and Mental Health Services Administration's (SAMHSA's) nation-wide CCBHC requirements (Section A - Program Requirements 1-6) <u>AND</u> nine Oregon-specific CCBHC standards (Section B - Oregon CCBHC Standards 1-9). Please note, a response is required for each section. A comment box is available at the end of each program requirement in Section A, and again at the end of Section B.

### **Background:**

In 2014, Congress passed the Protecting Access to Medicare Act (H.R. 4302), which included a demonstration program based on the Excellence in Mental Health Act. Once again, behavioral health clinics will have a federal definition with defined quality standards and reimbursement that reflects the actual cost of care. The legislation:

- Creates criteria for "Certified Community Behavioral Health Clinics" (CCBHCs) as entities designed to serve individuals with serious mental illnesses and substance use disorders that provide intensive, person-centered, multidisciplinary, evidence-based screening, assessment, diagnostics, treatment, prevention, and wellness services. The Secretary of the Department of Health and Human Services is directed to establish a process for selecting 8 states to participate in a 2-year pilot program.
- Provides \$25 million that will be available to states as planning grants to identify how CCBHCs fit into system redesign efforts and to develop applications to participate as a demonstration state.

  Only states that have received a planning grant will be eligible to apply to participate in the pilot.
- Requires participating states to develop a Prospective Payment System (PPS) for reimbursing CCBHCs for required services provided by these entities.

Participating states will receive an enhanced Medicaid match rate for all of the required services provided by the CCBHCs.Oregon was one of twenty-four states awarded a one-year CCBHC planning grant.

It is important to understand that a CCBHC is a new provider type. Therefore, for an entity or a

| state to assess readiness for a new provider type, there are specific comprehensive requirements that must be understood and incorporated into the responses in the Application for Oregon's CCBHC Program, as outlined below: |
|--|
| 1. CCBHCs have a distinct service delivery model – trauma-informed recovery outside the traditional four walls of a historical community behavioral health center;   |
| 2. CCBHCs have a new Prospective Payment System (PPS) payment methodology (particularly in reference to PPS-2 rate setting states);  |
| 3. CCBHCs have a requirement to have meta-data that is tied to the definition of the provider type (not necessarily tied to the historical "four walls" delivery systems);   |
| 4. In some cases, CCBHCs may contract contract with other organizations such as a DCO.   |
| This application for Oregon's CCBHCs is adapted from a tool developed by the National Council in partnership with MTM Services, COCHS, and McBee Associates. The original tool can be found                                    |

### **Overview of Sections and Scoring**

Overview of Section A - SAMHSA's CCBHC Program Requirements

**Program Requirement 1: Staffing** 

Program Requirement 2: Availability and Accessibility of Services

Program Requirement 3: Care Coordination Program Requirement 4: Scope of Services

**Program Requirement 5: Quality and Other Reporting** 

Program Requirement 6: Organizational Authority, Governance and Accreditation

Overview of Section B - Oregon CCBHC Standards

Standard 1: Telephone and Electronic Acccess

Standard 2: Performance and Clinical Quality

Standard 3: Provision of Services

Standard 4: Coordination and Integration with Primary Care

Standard 5: Organization of CCBHC information

Standard 6: Specialized Care Setting Transition

**Standard 7: Care Coordination** 

Standard 8: End of Life Planning

Standard 9: Language and Cultural Interpretation

#### Scoring for Sections A and B

Each program requirement under Section A has many sub-requirements. For most sub-requirements, the application asks your clinic to first assess if the clinic is <u>currently</u> meeting the requirement (Yes or No), and then has a five-point scale to determine the clinic's level of concern to develop the capacity to meet this requirement.

- 1 = Serious Challenge
- 2 = Quite a bit of Concern
- 3 = Moderate Concern
- 4 = Small Concern
- 5 = Not a Challenge

For example, you might choose to answer "Yes" (we are currently doing this at our clinic) along with a "3" (we have a moderate level of concern about this) or you might choose to answer "No" (we are not currently doing this at our clinic) along with a 4 (we have a small level of concern about our ability to do this). The level of concern that your clinic identifies needs to be supported by the following scoring parameters:

- a. If a particular design, operational and/or certification criterion focuses on the state's ability to perform, please rate your level of concern about your CCBHC providing the state necessary information to support the state performance requirement.
- b. If your clinic is not able to identify the specific response requested to any primary question, the level of challenge score should be documented as a "1".

| c. Most questions contain a "Yes" or "No" identifier prior to the concern rating. The focus for this                              |
|---|
| question is for your clinic to confirm if the identified design, operational requirement and/or                                   |
| criterion is <u>current</u> practice within your clinic - YES or NO. If your team responds "NO", the specific                     |
| criterion concern response should be a 1 – 4 based on the level of concern you have about   |
| developing the capacity to be compliant with the criterion. Also, if your clinic identifies a "Yes" and                           |
| does not feel that a "5" fully identifies the appropriate response, please identify the level of concern                          |
| that your clinic has about being fully compliant.   |
| d. If your clinic identifies a level of practice variance within various programs or locations, the                               |
| score should be a "2" or "3" based on the level of variance identified and the amount of effort it will                           |
| take to reduce the variance to a standardized clinic wide practice.   |
|   |
| For Section B (the nine Oregon CCBHC Standards) the scoring has the same Yes/No assessment with a 1-5 scale for level of concern. |

|   | Section A - Program Requirement 1 - Staffing   |                        |                |                  |               |                 |  |  |  |
|   | Staffing requirements, including criteria that staff have diverse disciplinary backgrounds, have necessary State required license and accreditation, and are culturally and linguistically trained to serve the needs of the clinic's patient population.  |                        |                |                  |               |                 |  |  |  |
| * | * 1.a.1: As part of the process leading to certification, the state will prepare an assessment of the needs of the target consumer population and a staffing plan for prospective CCBHCs. The needs assessment will include cultural, linguistic and treatment needs. The needs assessment is performed prior to certification of the CCBHCs in order to inform staffing and services. After certification, the CCBHC will update the needs assessment and the staffing plan, including both consumer and family/caregiver input. The needs assessment and staffing plan will be updated regularly, but no less frequently than every three years. |                        |                |                  |               |                 |  |  |  |

|   |  |                        |                |                  |               |                 |  |  |  |
|   | * 1.a.2: The staff (both clinical and non-clinical) is appropriate for serving the consumer population in terms of size and composition and providing the types of services the CCBHC is required to and proposes to offer.  Note: See criteria 4.K relating to required staffing of services for veterans.  Quite a bit of  Serious Challenge Concern Moderate Concern Small Concern Not a Challenge  |                        |                |                  |               |                 |  |  |  |
|   | Note: See Chiena 4.K   | Serious Challenge      | Quite a bit of | loderate Concern | Small Concern | Not a Challenge |  |  |  |
|   | Yes  |                        | Quite a bit of |                  | Small Concern | Not a Challenge |  |  |  |
|   |  |                        | Quite a bit of |                  | Small Concern | Not a Challenge |  |  |  |
|   | Yes  |                        | Quite a bit of |                  | Small Concern | Not a Challenge |  |  |  |

|   | * 1.a.3: The Chief Executive Officer (CEO) of the CCBHC maintains a fully staffed management team as appropriate for the size and needs of the clinic as determined by the current needs assessment and staffing plan. The management team will include, at a minimum, a CEO or Executive Director/Project Director, and a psychiatrist as Medical Director. The Medical Director need not be a full-time employee of the CCBHC. Depending on the size of the CCBHC, both positions (CEO/Executive Director/Project Director and the Medical Director) may be held by the same person. The Medical Director will ensure the medical component of care and the integration of behavioral health (including addictions) and primary care are facilitated. Note:  If a CCBHC is unable, after reasonable and consistent efforts, to employ or contract with a psychiatrist as Medical Director because of a documented behavioral health professional shortage in its vicinity (as determined by the Health Resources and Services Administration (HRSA) (Health Resources and Services Administration [2015]), psychiatric consultation will be obtained on the medical component of care and the integration of behavioral health and primary care, and a medically trained behavioral health care provider with appropriate education and licensure with prescriptive authority in psychopharmacology who can prescribe and manage medications independently pursuant to state law will serve as the Medical Director. |                   |                           |                  |               |                 |

|   | No   |                   |                           |                  |               |                 |
| * 1.b.1: All CCBHC providers who furnish services directly, and any Designated Collaborating Organization (DCO) providers that furnish services under arrangement with the CCBHC, are legally authorized in accordance with federal, state and local laws, and act only within the scope of their respective state licenses, certifications, or registrations and in accordance with all applicable laws and regulations, including any applicable state Medicaid billing regulations or policies. Pursuant to the requirements of the statute (PAMA § 223 (a)(2)(A)), CCBHC providers have and maintain all necessary state-required licenses, certifications, or other credentialing, with providers working toward licensure, and appropriate supervision in accordance with applicable state law. |  |                   |                           |                  |               |                 |
|   |  |                   | Quite a bit of            |                  |               |                 |
|   | Yes  | Serious Challenge | Concern                   | Moderate Concern | Small Concern | Not a Challenge |
|   |  |                   |                           |                  |               |                 |
|   | No   |                   | $\bigcirc$                |                  |               |                 |
|   |  |                   |                           |                  |               |                 |
|   |  |                   |                           |                  |               |                 |

\* 1.b.2: The CCBHC staffing plan meets the requirements of the state behavioral health authority and any accreditation standards required by the state, is informed by the state's initial needs assessment, and includes clinical and peer staff. In accordance with the staffing plan, the CCBHC maintains a core staff comprised of employed and, as needed, contracted staff, as appropriate to the needs of CCBHC consumers as stated in consumers' individual treatment plans and as required by program requirements 3 and 4 of these criteria. States specify which staff disciplines they will require as part of certification but must include a medically trained behavioral health care provider, either employed or available through formal arrangement, who can prescribe and manage medications independently under state law, including buprenorphine and other medications used to treat opioid and alcohol use disorders. The CCBHC must have staff, either employed or available through formal arrangements, who are credentialed substance abuse specialists. Providers must include individuals with expertise in addressing trauma and promoting the recovery of children and adolescents with serious emotional disturbance (SED) and adults with serious mental illness (SMI) and those with substance use disorders. Examples of staff the state might require include a combination of the following: (1) psychiatrists (including child, adolescent, and geriatric psychiatrists), (2) nurses trained to work with consumers across the lifespan, (3) licensed independent clinical social workers, (4) licensed mental health counselors, (5) licensed psychologists, (6) licensed marriage and family therapists, (7) licensed occupational therapists, (8) staff trained to provide case management, (9) peer specialist(s)/recovery coaches, (10) licensed addiction counselors, (11) staff trained to provide family support, (12) medical assistants, and (13) community health workers.

The CCBHC supplements its core staff, as necessary given program requirements 3 and 4 and individual treatment plans, through arrangements with and referrals to other providers.

Note:Recognizing professional shortages exist for many behavioral health providers: (1) some sevices may be provided by contract or part-time or as needed; (2) in CCBHC organizations comprised of multiple clinics, providers may be shared among clinics; and (3) CCBHCs may utilize telehealth/ telemedicine and on-line services to alleviate shortages. CCBHCs are not precluded by anything in this criterion from utilizing providers working towards licensure, provided they are working under the requisite supervision.

O.... - 1-14 - 6

| * 1.c.1: The CCBHC has a training plan, for all employed and contract staff, and for providers at DCOs who have contact with CCBHC consumers or their families, which satisfies and includes requirements of the state behavioral health authority and any accreditation standards on training which may be required by the state. Training must address cultural competence; person-centered and family-centered, recovery-oriented, evidence-based and trauma-informed care; and primary care/behavioral health integration. This training, as well as training on the clinic's continuity plan, occurs at orientation and thereafter at reasonable intervals as may be required by the state or accrediting agencies. At orientation and annually thereafter, the CCBHC provides training about: (1) risk assessment, suicide prevention and suicide response; (2) the roles of families and peers; and (3) such other trainings as may be required by the state or accrediting agency on an annual basis. If necessary, trainings may be provided on-line. Cultural competency training addresses diversity within the organization's service population and, to the extent active duty military or veterans are being served, must include information related to military culture. Examples of cultural competency training and materials include, but are not limited to, those available through the website of the US Department of Health & Human Services (DHHS), the SAMHSA website through the website of the DHHS, Office of Minority Health, or through the website of the DHHS, Health Resources and Services Administration.  Note:See criteria 4.K relating to cultural competency requirements in services for veterans. |   |  |  |   |  |                                   |  |

| * 1.d.4: Documents or messages vital to a consumer's ability to access CCBHC services (for example, registration forms, sliding scale fee discount schedule, after-hours coverage, signage) are available for consumers in languages common in the community served, taking account of literacy levels and the need for alternative formats (for consumers with disabilities). Such materials are provided in a timely manner at intake. The requisite languages will be informed by the needs assessment prepared prior to certification, and as updated.  |                   |                           |                  |               |                 |  |  |  |

| * 1.d.5: The CCBHC's policies have explicit provisions for ensuring all employees, affiliated providers, and interpreters understand and adhere to confidentiality and privacy requirements applicable to the service provider, including but not limited to the requirements of Health Insurance Portability and Accountability Act (HIPAA) (Pub. L. No. 104-191, 110 Stat. 1936 (1996)), 42 CFR Part 2, and other federal and state laws, including patient privacy requirements specific to the care of minors. The HIPAA Privacy Rule allows routine – and often critical –communications between health care providers and a consumer's family and friends, so long as the consumer consents or does not object. If a consumer is amenable and has the capacity to make health care decisions, health care providers may communicate with a consumer's family and friends. |                   |                           |                  |               |                 |  |  |  |

| *  | * 2.b.1: All new consumers requesting or being referred for behavioral health services will, at the time of first contact, receive a preliminary screening and risk assessment to determine acuity of needs. That screening may occur telephonically. The preliminary screening will be followed by: (1) an initial evaluation, and (2) a comprehensive person-centered and family-centered diagnostic and treatment planning evaluation, with the components of each specified in program requirement 4. Each evaluation builds upon what came before it. Subject to more stringent state, federal, or applicable accreditation standards:                |                    |                           |                  |               |                      |  |  |
|--|--|--------------------|---------------------------|------------------|---------------|----------------------|--|--|
| $_{\neg \land}$ If the screening identifies an emergency/crisis need, appropriate action is taken immediately, including any necessary subsequent outpatient follow-up.  |  |                    |                           |                  |               |                      |  |  |
| $_{\neg \land}$ If the screening identifies an urgent need, clinical services are provided and the initial evaluation completed within one business day of the time the request is made.   |  |                    |                           |                  |               |                      |  |  |
|  | $_{\neg \lambda}$ If the screening identifies routine needs, services will be provided and the initial evaluation completed within 10 business days.   |                    |                           |                  |               |                      |  |  |
| The formula of the presenting with emergency or urgent needs, the initial evaluation may be conducted telephonically or by telehealth/telemedicine but an in-person evaluation is preferred. If the initial evaluation is conducted telephonically, once the emergency is resolved the consumer must be seen in person at the next subsequent encounter and the initial evaluation reviewed.   |  |                    |                           |                  |               |                      |  |  |
| Subject to more stringent state, federal or applicable accreditation standards, all new consumers will receive a more comprehensive person-centered and family-centered diagnostic and treatment planning evaluation to be completed within 60 calendar days of the first request for services. This requirement that the comprehensive evaluation be completed within 60 calendar days does not preclude either the initiation or completion of the comprehensive evaluation or the provision of treatment during the 60 day period. Note: Requirements for these screenings and evaluations are specified in criteria 4.D. |  |                    |                           |                  |               |                      |  |  |

### Section A - Program Requirement 3 - Care Coordination

Care coordination, including requirements to coordinate care across settings and providers to ensure seamless transitions for patients across the full spectrum of health services, including acute, chronic, and behavioral health needs. Care coordination requirements shall include partnerships or formal contracts with the following:

(i) Federally-qualified health clinics (and as applicable, rural health clinics) to provide Federally-qualified health

clinic services (and as applicable, rural health clinic services) to the extent such services are not provided

directly through the certified community behavioral health clinic.

(ii) Inpatient psychiatric facilities and substance use detoxification, post-detoxification step-down services, and

residential programs.

(iii) Other community or regional services, supports, and providers, including schools, child welfare agencies, and juvenile and criminal justice agencies and facilities, Indian Health Service youth regional treatment clinics,

State licensed and nationally accredited child placing agencies for therapeutic foster care service, and other

social and human services.

(iv) Department of Veterans Affairs medical clinics, independent outpatient clinics, drop-in clinics, and other

facilities of the Department as defined in section 1801 of title 38, United States Code.

- (v) Inpatient acute care hospitals and hospital outpatient clinics."
- \* 3.a.1: Based on a person and family-centered plan of care aligned with the requirements of Section 2402(a) of the ACA and aligned with state regulations and consistent with best practices, the CCBHC coordinates care across the spectrum of health services, including access to high-quality physical health (both acute and chronic) and behavioral health care, as well as social services, housing, educational systems, and employment opportunities as necessary to facilitate wellness and recovery of the whole person.

Note: See criteria 4.K relating to care coordination requirements for veterans.

# Section A - Program Requirement 4 - Scope of Services

Provision (in a manner reflecting person-centered care) of the following services which, if not available directly through the certified community behavioral health clinic, are provided or referred through formal relationships with other providers:

- (i) Crisis mental health services, including 24-hour mobile crisis teams, emergency crisis intervention services,
- and crisis stabilization.
- (ii) Screening, assessment, and diagnosis, including risk assessment.
- (iii) Patient-centered treatment planning or similar processes, including risk assessment and crisis planning.
- (iv) Outpatient mental health and substance use services.
- (v) Outpatient clinic primary care screening and monitoring of key health indicators and health risk.
- (vi) Targeted case management.
- (vii) Psychiatric rehabilitation services.
- (viii) Peer support and counselor services and family supports.
- (ix) Intensive, community-based mental health care for members of the armed forces and veterans, particularly

those members and veterans located in rural areas, provided the care is consistent with minimum clinical mental health guidelines promulgated by the Veterans Health Administration, including clinical guidelines contained in the Uniform Mental Health Services Handbook of such Administration.

| 4.d.3: The initial evaluation (including information gathered as part of the preliminary screening and risk assessment), as required in program requirement 2, includes, at a minimum, (1) preliminary diagnoses; (2) the source of referral; (3) the reason for seeking care, as stated by the consumer or other individuals who are significantly involved; (4) identification of the consumer's immediate clinical care needs related to the diagnosis for mental and substance use disorders; (5) a list of current prescriptions and over-the-counter medications, as well as other substances the consumer may be taking; (6) an assessment of whether the consumer is a risk to self or to others, including suicide risk factors; (7) an assessment of whether the consumer has other concerns for their safety; (8) assessment of need for medical care (with referral and follow-up as required); and (9) a determination of whether the person presently is or ever has been a member of the U.S. Armed Services. As needed, releases of information are obtained. |  |  |  |  |   |  |  |  |

\* 4.d.5: Although a comprehensive diagnostic and treatment planning evaluation is required for all CCBHC consumers, the extent of the evaluation will depend on the individual consumer and on existing state, federal, or applicable accreditation standards. As part of certification, states will establish the requirements for these evaluations; factors states should consider requiring include: (1) reasons for seeking services at the CCBHC, including information regarding onset of symptoms, severity of symptoms, and circumstances leading to the consumer's presentation to the CCBHC; (2) a psychosocial evaluation including housing, vocational and educational status, family/caregiver and social support, legal issues, and insurance status; (3) behavioral health history (including trauma history and previous therapeutic interventions and hospitalizations); (3) a diagnostic assessment, including current mental status, mental health (including depression screening) and substance use disorders (including tobacco, alcohol, and other drugs); (4) assessment of imminent risk (including suicide risk, danger to self or others, urgent or critical medical conditions, other immediate risks including threats from another person); (5) basic competency/cognitive impairment screening (including the consumer's ability to understand and participate in their own care); (6) a drug profile including the consumer's prescriptions, over-the-counter medications, herbal remedies, and other treatments or substances that could affect drug therapy, as well as information on drug allergies; (7) a description of attitudes and behaviors, including cultural and environmental factors, that may affect the consumer's treatment plan; (8) the consumer's strengths, goals, and other factors to be considered in recovery planning; (9) pregnancy and parenting status; (10) assessment of need for other services required by the statute (i.e., peer and family/caregiver support services, targeted case management, psychiatric rehabilitation services, LEP or linguistic services); (11) assessment of the social service needs of the consumer, with necessary referrals made to social services and, for pediatric consumers, to child welfare agencies as appropriate; and (12) depending on whether the CCBHC directly provides primary care screening and monitoring of key health indicators and health risk pursuant to criteria 4.G, either: (a) an assessment of need for a physical exam or further evaluation by appropriate health care professionals. including the consumer's primary care provider (with appropriate referral and follow-up), or (b) a basic physical assessment as required by criteria 4.G. All remaining necessary releases of information are obtained by this point.

| * 4.f.3: Treatments are provided that are appropriate for the consumer's phase of life and development, specifically considering what is appropriate for children, adolescents, transition age youth, and older adults, as distinct groups for whom life stage and functioning may affect treatment. Specifically, when treating children and adolescents, CCHBCs provide evidenced-based services that are developmentally appropriate, youth guided, and family/caregiver driven with respect to children and adolescents. When treating older adults, the individual consumer's desires and functioning are considered and appropriate evidence-based treatments are provided. When treating individuals with developmental or other cognitive disabilities, level of functioning is considered and appropriate evidence-based treatments are provided. These treatments are delivered by staff with specific training in treating the segment of the population being served. |  |  |  |  |   |  |  |  |  |

- \* 4.k.4: Every veteran seen for behavioral health services is assigned a Principal Behavioral Health Provider. When veterans are seeing more than one behavioral health provider and when they are involved in more than one program, the identity of the Principal Behavioral Health Provider is made clear to the veteran and identified in the medical record. The Principal Behavioral Health Provider is identified on a consumer tracking database for those veterans who need case management. The Principal Behavioral Health Provider ensures the following requirements are fulfilled:
  - (1) Regular contact is maintained with the veteran as clinically indicated as long as ongoing care is required.
  - (2) A psychiatrist, or such other independent prescriber as satisfies the current requirements of the VHA Uniform Mental Health Services Handbook, reviews and reconciles each veteran's psychiatric medications on a regular basis.
  - (3) Coordination and development of the veteran's treatment plan incorporates input from the veteran (and, when appropriate, the family with the veteran's consent when the veteran possesses adequate decision-making capacity or with the veteran's surrogate decision-maker's consent when the veteran does not have adequate decision-making capacity).
  - (4) Implementation of the treatment plan is monitored and documented. This must include tracking progress in the care delivered, the outcomes achieved, and the goals attained.
  - (5) The treatment plan is revised, when necessary.
  - (6) The principal therapist or Principal Behavioral Health Provider communicates with the veteran (and the veteran's authorized surrogate or family or friends when appropriate and when veterans with adequate decision-making capacity consent) about the treatment plan, and for addressing any of the veteran's problems or concerns about their care. For veterans who are at high risk of losing decision-making capacity, such as those with a diagnosis of schizophrenia or schizoaffective disorder, such communications need to include discussions regarding future behavioral health care treatment (see information regarding Advance Care Planning Documents in VHA Handbook 1004.2).
  - (7) The treatment plan reflects the veteran's goals and preferences for care and that the veteran verbally consents to the treatment plan in accordance with VHA Handbook 1004.1, Informed Consent for Clinical Treatments and Procedures. If the Principal Behavioral Health Provider suspects the veteran lacks the capacity to make a decision about the mental health treatment plan, the provider must ensure the veteran's decision-making capacity is formally assessed and documented. For veterans who are determined to lack capacity, the provider must identify the authorized surrogate and document the surrogate's verbal consent to the treatment plan

## Section A - Program Requirement 5 - Quality and Other Reporting

| * 5.a.1: The CCBHC has the capacity to collect, report, and track encounter, outcome, and quality data, including but not limited to data capturing: (1) consumer characteristics; (2) staffing; (3) access to services; (4) use of services; (5) screening, prevention, and treatment; (6) care coordination; (7) other processes of care; (8) costs; and (9) consumer outcomes. Data collection and reporting requirements are elaborated below and in Appendix A. (NOTE: Appendix A is located on page 28 at the end of the I-CCFRT Assessment and Definitions sections)  http://www.thenationalcouncil.org/wp-content/uploads/2015/11/I-CCBHC-Feasibility-and-Readiness-Assessment-FINAL-REVISED-E-FORM12-8-15.pdf |   |                                    |                                      |                                   |                          |  |  |  |

Section A - Program Requirement 6 - Organizational Authority, Governance and Accreditation

Criteria that a clinic be a nonprofit or part of a local government behavioral health authority or operated under the authority of the Indian Health Service, an Indian Tribe, or Tribal organization pursuant to a contract, grant, cooperative agreement, or compact with the Indian Health Service pursuant to the Indian Self-Determination Act [25 U.S.C. 450 et seq.], or an urban Indian organization pursuant to a grant or contract with the Indian Health Service under title V of the Indian Health Care Improvement Act [25 U.S.C. 1601 et seq]."

- \* 6.a.1: The CCBHC maintains documentation establishing the CCBHC conforms to at least one of the following statutorily established criteria:
  - Is a non-profit organization, exempt from tax under Section 501(c)(3) of the United States Internal Revenue Code;
  - Is part of a local government behavioral health authority;
  - <sub>¬¬¬</sub> Is operated under the authority of the Indian Health Service, an Indian tribe, or tribal organization pursuant to a contract, grant, cooperative agreement, or compact with the Indian Health Service pursuant to the Indian Self-Determination Act (25 U.S.C. 450 et seq.);
  - Is an urban Indian organization pursuant to a grant or contract with the Indian Health Service under Title V of the Indian Health Care Improvement Act (25 U.S.C. 1601 et seq.).

Note: A CCBHC is considered part of a local government behavioral health authority when a locality, county, region or state maintains authority to oversee behavioral health services at the local level and utilizes the clinic to provide those services.

|     | Serious Challenge | Concern | Moderate Concern | Small Concern | Not a Challenge |
|-----|-------------------|---------|------------------|---------------|-----------------|
| Yes |                   |         |                  |               |                 |

### Section B - Oregon CCBHC Standards

Clinics applying to become CCBHCs in Oregon need to meet SAMHSA's nation-wide CCBHC requirements

(Section A - Program Requirements 1-6) AND nine Oregon-specific CCBHC standards (Section B - Oregon CCBHC Standards 1-9).

| A | aa | lica | tion | for ( | Orec | ion's | CCBH | IC F | Program |
|---|----|------|------|-------|------|-------|------|------|---------|
|   |    |      |      |       |      |       |      |      |         |

### Section B - Oregon CCBHC Standards

### 1. Telephone and Electronic Access

\* 1. CCBHC provides continuous access to behavioral health advice by telephone.

|     |                   | Quite a bit of |                  |               |                 |
|-----|-------------------|----------------|------------------|---------------|-----------------|
|     | Serious Challenge | Concern        | Moderate Concern | Small Concern | Not a Challenge |
| Yes |                   |                |                  |               |                 |
| No  |                   |                |                  |               |                 |

#### Intent

Access to behavioral health advice outside of in-person office visits is an important function associated with decreased emergency and urgent care utilization. The intent of this standard is to ensure that CCBHC consumers, caregivers and families can obtain behavioral health advice via telephone from a live person at all times.

#### Specifications

To meet this standard the CCBHC must have 24 hour a day, 7 days a week access to a live person via telephone for behavioral advice for all consumers of the clinic. Clinic must have documented policy and procedures, including provider expectations for workflow and EHR access (if applicable) to ensure all after hours telephone encounters are documented in the EHR or paper chart within 24 hours of the call. It is not required that the person receiving the call or giving clinical advice has real-time access to the consumer's medical record, although this would be ideal.

### Examples

Practice strategies meeting the intent of this standard:

- Business and after-hours phone calls answered by a live person and referred to a behavioral health clinician for clinical advice as appropriate.
- Business and after-hours phone calls answered by an on-call provider
- Business and after-hours phone calls answered by a live answering service with triage of appropriate call to an on-call clinician

Practice strategies NOT meeting the intent of this standard:

- Routine use of an answering machine to answer phone calls during or after business hours with no options for patients to access behavioral health advice from a live person.
- Use of an automated message referring patients to the emergency room or an urgent care practice during or after business hours.
- Use of non-clinical staff (e.g. receptionist) to answer phone calls if staff do not have real time access to a clinician as dictated by appropriate protocols.

| Section B - Oregon CCBHC Standards 4. Coordination and Integration with Primary Care                    |  |  |  |  |  |  |  |  |  |
| * 4. BHH has primary care services onsite at least 20 hours a week and has a process to ensure patients |  |  |  |  |  |  |  |  |  |
| can access primary care services during the hours onsite primary care is not available.                 |  |  |  |  |  |  |  |  |  |
| Quite a bit of Serious Challenge Concern Moderate Concern Small Concern Not a Challenge                 |  |  |  |  |  |  |  |  |  |
| Yes   |  |  |  |  |  |  |  |  |  |
| No  |  |  |  |  |  |  |  |  |  |

Intent – Many Oregonians with a behavioral health condition are not accessing primary care services. Integrating behavioral health with primary care opens the door to both physical and behavioral health care in a setting that is familiar to a person with a behavioral health condition. A consumer that chooses a behavioral health home as their "home" should have all their healthcare needs provided at that home.

To meet this standard, there needs to a high level of collaboration and integration between behavioral health and primary care providers. The behavioral health and physical health providers function as a team with frequent personal communication. The team actively seeks system solutions as it recognizes the barriers to care integration for a broader range of consumers. Providers understand the different roles team members need to play and have started to change their practice and structure of care to achieve consumer goals. Consumers view the operation as a single health system treating the whole person. (From Center for Integrated Health Solutions)

Collaboration and integration is defined in the AHRQ lexicon for behavioral health and primary care as the integration as a practice team of primary care and behavioral health clinicians working together with patients and families, using a systematic and cost-effective approach to provide patient-centered care for a defined population. This care may address mental health and substance abuse conditions, health behaviors (including their contribution to chronic medical illnesses), life stressors and crises, stress-related physical symptoms, and ineffective patterns of health care utilization.

Specifications – CCBHC has primary care providers (PCP) onsite at least 20 hours a week offering services for physical health, disease prevention and treatment. Categories of service should include:

- Acute care for minor illnesses and injuries
- Ongoing management of chronic diseases including coordination of care
- Office based procedures and diagnostic tests
- Patient education, prevention and wellness support services
- Care management, understood as individualized, person-centered planning and coordination to increase consumer participation and follow-up with all PC screening, assessment and treatment services

CCBHC must demonstrate evidence of collaborative provider relationships and care coordination for patients receiving primary care services off-site during hours that primary care providers are not available at the CCBHC.

CCBHC has a registry/tracking system for physical health needs/outcomes.

### Examples:

Practice strategies meeting the intent of this standard:

- Primary Care Physician (MD, DO, ND) Physician Assistant (PA), or Medical Nurse Practitioners (NP) are available at least 20 hours a week to provide primary care services.
- CCBHC provides names of primary care providers commonly used by the BHH and documentation in the medical record detailing collaboration with these providers such as telephone encounters, discussing particular patients, shared protocols for medication management, or regular meeting times.
- Examples of regular two-way communication with these providers in patient charts demonstrating active coordination of patient care.

Practice strategies NOT meeting the intent of this standard:

- BH and PC providers work at separate facilities and have separate communication systems.
- Providers view each other as resources and communicate periodically about shared consumers and it is driven by specific issues or provider's need for specific information about a mutual consumer. (e.g. PCP requests a copy of a psychiatric evaluation to know if there is a confirmed psychiatric diagnosis).
- BH and PC are co-located in the same facility and providers still use separate systems or are starting to use some shared systems. Communication is more regular due to proximity of providers with an occasional meeting to discuss shared consumers. Movement of consumers between practices is most often through a referral process. There is some attempt for BH and PC providers to work as a team but how the team operates is not clearly defined leaving most decisions about consumer care to be made independently by individual providers.

| Application for Oregon's CCBHC Program                                |
|---|
| Section B - Oregon CCBHC Standards 5. Organization of BHH Information |
|   |

\* 5. CCBHC maintains a health record for each consumer that contains at least the following elements: problem list, medication list, allergies, basic demographic information, preferred language, and updates this record as needed at each visit.

|     |                   | Quite a bit of |                  |               |                 |
|-----|-------------------|----------------|------------------|---------------|-----------------|
|     | Serious Challenge | Concern        | Moderate Concern | Small Concern | Not a Challenge |
| Yes |                   |                |                  |               |                 |
| No  |                   |                |                  |               |                 |

#### Intent

CCBHCs must maintain comprehensive and up-to-date patient records that are easily transmissible to other clinicians and facilities as consumers move throughout the health care system. Maintaining a health record with up-to-date information is an essential perquisite to managing safe transitions of care between providers. This measure does require standardized collection of the above elements, but is not intended to require an electronic health record. Federal CCBHC standards do require clinics to have an electronic health record.

### **Specifications**

Clinics must be able to provide examples of all of the required elements and be able to demonstrate a process for how these elements are regularly assessed and updated by practice staff. Documentation of each element must be standardized across all consumer records. Clinics are not expected to calculate the percentage of complete consumer records or demonstrate that every element is complete in each record.

### Examples

Examples of strategies meeting the intent of this standard include:

- Required elements are located in a consistent place in paper charts or in discrete fields in an EMR.
- Practice has a clear process and demonstrates the above data elements are reviewed and updated regularly (e.g. provider reviews medications at each visit, front desk staff verifies demographic information at check-in)

### Section B - Oregon CCBHC Standards 6. Specialized Care Setting Transitions

\* 6. BHH has a written agreement with its usual hospital providers or directly provides routine hospital care.

|     |                   | Quite a bit of |                  |               |                 |
|-----|-------------------|----------------|------------------|---------------|-----------------|
|     | Serious Challenge | Concern        | Moderate Concern | Small Concern | Not a Challenge |
| Yes |                   |                |                  |               |                 |
| No  |                   |                |                  |               |                 |

#### Intent

Care coordination and communication during care transitions is an important aspect of patient safety, especially between inpatient and outpatient care settings. CCBHCs should take responsibility for facilitating appropriate transitions of care by developing working relationships with their usual providers of hospital care.

#### Specifications

Definition of Usual Hospital Providers -The hospital(s) or hospitalist group(s) that most frequently cares for the behavioral health home's consumer population when admitted to a hospital or visiting the Emergency Room.

Clinics meeting the intent of this standard must be able to identify the usual providers of hospital care for their consumers (e.g. a specific hospital(s) or hospitalist group(s)) and have a written agreement in place with the usual hospital providers so that the behavioral health home is notified when consumers are admitted and discharged. Written agreements with usual providers of hospital care should contain the following types of information:

- Process for requesting hospital admission
- Process and performance expectations for communication at the time of hospital admission
- Process for sharing of patient medical records at the time of hospital admission
- Process and performance expectations for communication at the time of hospital discharge
- Process and performance expectations for scheduling after-hospital follow up appointments

Note: CCBHCs that have clinicians providing their own hospital care routinely for clinic patients do not need to have a written agreement in place. However, if a clinic is part of a system that includes a hospital, the clinic must still have a written agreement unless clinicians at the CCBHC clinic provide hospital care routinely for their consumer population.

# Section B - Oregon CCBHC Standards 7. Care Coordination

\* 7. BHH demonstrates that members of the health care team have defined roles in care coordination for consumers and tell each consumer or family the name(s) of the team member(s) responsible for coordinating his or her care.

|     |                   | Quite a bit of |                  |               |                 |
|-----|-------------------|----------------|------------------|---------------|-----------------|
|     | Serious Challenge | Concern        | Moderate Concern | Small Concern | Not a Challenge |
| Yes |                   |                |                  |               |                 |
| No  |                   |                |                  |               |                 |

#### Intent

Care coordination is an essential feature of a CCBHC. The intent of this standard is to ensure CCBHCs deliberately consider care coordination functions, explicitly assign these functions to specific staff members, take extra steps to coordinate the care of consumers with complex care needs and communicate clearly to consumers who they can contact at the clinic to help coordinate their care.

CCBHCs must be able to identify person(s) responsible for care coordination, provide a written description of their role/functions and a method for notifying patients of who is responsible for coordinating their behavioral health and primary health care.

### Specifications

This standard requires both clear assignment of care coordination responsibilities to practice staff and clear communication to consumers about how to obtain these services. All care coordination functions within the practice do not need to be assigned to a single person. Some care coordination activities may be performed by clinical staff (e.g. motivational interviewing, support of behavior change, patient education) while others may be performed by non-clinical staff (follow up on referral and test results). However, consumers should be informed of who is responsible for their coordination needs.

### Examples

A CCBHC could demonstrate meeting this standard through the following kinds of activities:

- Written job descriptions assigning certain care coordination functions to particular staff
- Demonstration that certain staff members perform care coordination (e.g staff member X maintains a log tracking test results)
- Clear verbal or written instructions are provided to consumers on who to contract to follow-up or obtain needed services.

# Section B - Oregon CCBHC Standards 8. End of Life Planning

\* 8. BHH has a process to offer or coordinate hospice and palliative care and counseling for consumers and families who may benefit from them.

|     | Serious Challenge | Quite a bit of<br>Concern | Moderate Concern | Small Concern | Not a Challenge |
|-----|-------------------|---------------------------|------------------|---------------|-----------------|
| Yes |                   |                           |                  |               |                 |
| No  |                   |                           |                  |               |                 |

#### Intent

Arranging for culturally appropriate end-of-life and palliative care is an important aspect of care coordination for consumers, caregivers, and families. This standard is intended to ensure CCBHCs engage their consumers, caregivers, and families in end of life discussions, routinely assess consumers' need and eligibility for hospice or palliative care when appropriate, and refer consumers for these services or coordinate services within the clinic. It is also important for clinics to ensure consumers wishes are documented in advance directive forms available in the consumer's medical record or through provider orders recorded in the medical record (i.e. POLST) which reflect the consumer's wishes for their end-of-life care

### Specifications

POLST - Physician Orders for Life-Sustaining Treatment

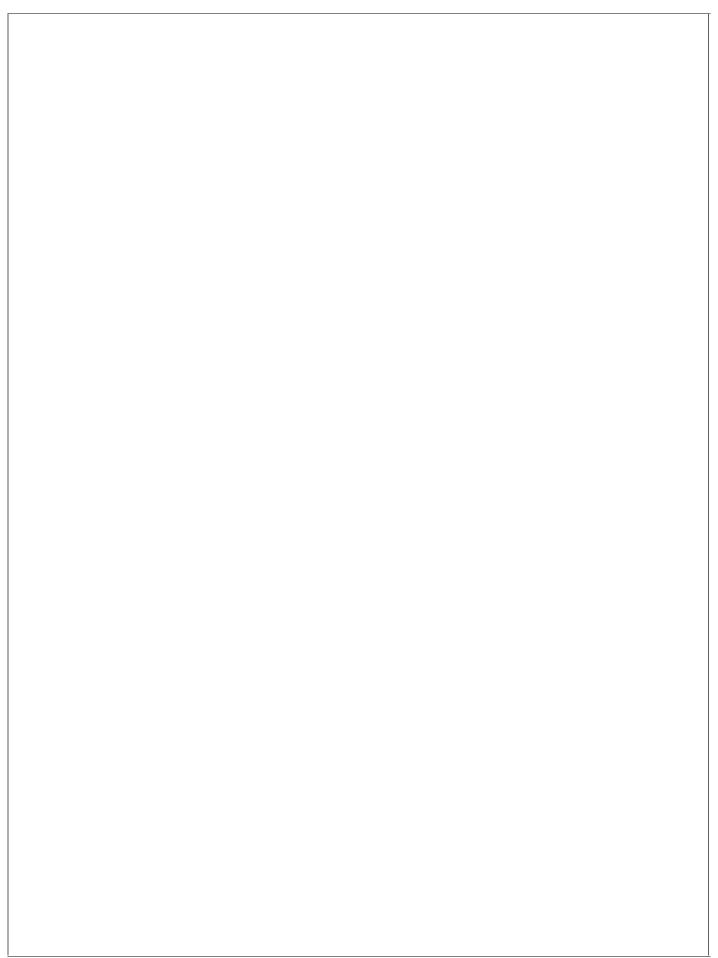

CCBHCs are not required to directly provide hospice or palliative care, but must have a process in place to refer and coordinate those service when consumers and families need them.

### Examples

Activities meeting the intent of this standard could include:

- List of usual referral provider for hospice or palliative care (including admission criteria for these providers) and examples of consumers referred to hospice or palliative care
- Examples of encounters for consumers regarding hospice or palliative care referral
- Examples of hospice or palliative care plans developed or approved by CCBHC providers

|   | Application for Oregon's CCBHC Program   |                   |                |                  |               |                 |  |

|   |  | Serious Challenge | Concern        | Moderate Concern | Small Concern | Not a Challenge |  |
|   | Yes  |                   |                |                  |               |                 |  |
|   | No   |                   |                |                  |               |                 |  |
| Further, there is a strong evidence base supporting the benefits of translating written materials.  Specifications Clinics must be able to produce a list of interpreter services used at the clinic and written guidelines for providing services to consumers in the language of their choice.  Interpretation services should be offered either on-site or telephonically for all consumers at the clinic that speak languages other than English and must be provided free of charge to consumers. Interpretation services should be offered and available during the consumers' entire office visit and for telephone encounters. Consumers may decline the use of interpreters, but should be informed that interpreters are available free of charge and have distinct advantages. Some clinics ask consumers who refuse interpretation services to sign a waiver. |  |                   |                |                  |               |                 |  |
| Examples  The following kinds of activities would meet the intent the standard:  - Use of bilingual staff to communicate with consumers or family members in their language(s) of choice throughout their entire office visit and during telephone encounters.  - Use of a real-time telephonic interpreter (e.g., Passport to Languages, Pacific Interpreters, Language Line Solutions, etc.) to communicate with consumers in their language of choice throughout their entire office visit and/or during telephone encounters.  - Use of an in-person interpreter to communicate with consumers in their language of choice throughout their entire office visit and/or during telephone encounters.   |  |                   |                |                  |               |                 |  |
|   | The following kinds of activities would NOT meet the intent the standard:  - Routine use of consumer family members to act as interpreters for non-English speaking patients.  - Interpreter services, providers, or other employees acting as translators, available at some times during clinic business hours, but not available at other times and the clinic does not have a strategy to provide alternative options for interpreter services the times when the employee(s) or services are unavailable and for consumers languages for which the providers or employee(s) cannot offer proficient interpretation. |                   |                |                  |               |                 |  |
|   | Comments Regarding Oregon CCBHC Standards  |                   |                |                  |               |                 |  |

### Congratulations!

Important Note: You have completed all required sections of Oregon's CCBHC application. If you click "Submit", you will not be able to return to this application and make any changes. If you still need to make changes, do not click "Submit" below, and you will be able to return to this application to make any needed changes.

All applicants who complete this online application will be contacted by the state regarding next steps in the CCBHC certification process. The online application will be available until 5 PM on May 25, 2016. The online application period may be extended at the state's discretion. Certification and application materials are available on <a href="Oregon's CCBHC website">Oregon's CCBHC website</a>. Please contact ccbhc.grant@state.or.us with additional questions or comments.
