

# New Integrated CCBHC Certification Criteria Feasibility and Readiness Tool (I-CCFRT)

On March 31, 2014, Congress passed the Protecting Access to Medicare Act (H.R. 4302), which included a demonstration program based on the Excellence in Mental Health Act. Once again, behavioral health clinics will have a federal definition with defined quality standards and reimbursement that reflects the actual cost of care. The legislation:

- Creates criteria for "Certified Community Behavioral Health Clinics" (CCBHCs) as
  entities designed to serve individuals with serious mental illnesses and substance use
  disorders that provide intensive, person-centered, multidisciplinary, evidence-based screening,
  assessment, diagnostics, treatment, prevention, and wellness services. The Secretary of the
  Department of Health and Human Services is directed to establish a process for selecting eight
  states to participate in a 2-year pilot program.
- Provides \$25,000,000 that will be available to states as planning grants to identify how CCBHCs fit into system redesign efforts and to develop applications to participate as a demonstration state. Only states that have received a planning grant will be eligible to apply to participate in the pilot.
- Requires participating states to develop a Prospective Payment System (PPS) for reimbursing Certified Behavioral Health Clinics for required services provided by these entities. Participating states will receive an enhanced Medicaid match rate for all of the required services provided by the Certified Community Behavioral Health Clinics.

On October 19<sup>th</sup> SAMHSA confirmed the following states have received the one year CCBHC planning grant:

•	Alaska	• lowa		•	Missouri	•	Oklahoma
•	California	<ul> <li>Kentue</li> </ul>	cky	•	Nevada	•	Oregon
•	Colorado	<ul> <li>Maryla</li> </ul>	and	•	New Mexico	•	Pennsylvania
•	Connecticut	<ul> <li>Massa</li> </ul>	achusetts	•	New York	•	Rhode Island
•	Illinois	Michig	jan •	•	New Jersey	•	Texas
•	Indiana	<ul> <li>Minne</li> </ul>	sota	•	North Carolina	•	Virginia

The National Council for Behavioral Health requested that MTM Services (MTM), Community Oriented Correctional Health Services (COCHS) and McBee Associates, Inc., (McBee) collaborate to develop a more integrated CCBHC readiness assessment tool to be used by Community Behavioral Health Clinics (CBHCs) that will be participating in one of the 24 CCBH state planning grants. Below is a summary of all three organizations and the expertise and experience they bring to this new readiness assessment tool:

- MTM Services (MTM), Raleigh, NC: MTM is the premiere firm for organizations who want to accomplish substantial
  changes in their service delivery systems to enhance access to treatment, the quality of care being delivered and
  the quality of life for those delivering it. Since 1995, MTM has provided to over 800 CBHCs project management for
  local, regional and statewide transformational change processes along with its SPQM Data Measurement system
  that provides performance measurement and data driven management.
- Community Oriented Correctional Health Services (COCHS), Oakland, CA: COCHS is a philanthropically funded non-profit corporation that is the national leader in promoting health care connectivity in communities through the development of financially viable and sustainable health care delivery systems. COCHS has been focused on designing non-four walls, trauma-informed service delivery systems to serve the most vulnerable populations.
- McBee Associates, Inc. (McBee), Philadelphia, PA: McBee is a recognized national leader in providing
  managerial and financial consulting services to the health care industry. Established in 1973, the firm has developed
  into one of the nation's largest, independent health care financial consulting practices by delivering quality service
  throughout the industry.

Before starting the I-CCFRT assessment, it is important to understand that a CCBHC is a new provider type. Therefore, for an entity or a state to assess readiness for a new provider type, there

are specific comprehensive requirements that must be understood and incorporated into the responses to the I-CCFRT assessment as outlined below:

- 1. CCBHCs have a distinct service delivery model trauma-informed recovery outside the traditional four walls of a historical community behavioral health center;
- 2. CCBHCs have a new Prospective Payment System (PPS) payment methodology (particularly in reference to PPS-2 rate setting states);
- 3. CCBHCs have a requirement to have meta-data that is tied to the definition of the provider type (not necessarily tied to the historical "four walls" delivery systems); and
- 4. CCBHCs have a requirement to contract with other organizations or with a Designated Collaborating Organization (DCO) and the CCBHC has specific compliance responsibility for the other organizations and DCOs. (I.e., the CCBHC's compliance responsibility is juxtaposed with whether the contractual organization is "related" or "unrelated" as defined under Medicaid rules. Therefore, the entity may need to be a DCO for a CCBHC rather than being a CCBHC.) To address these important new provider type requirements, the I-CCFRT contains specific sections as follows:

**Assessment of Feasibility to become a CCBHC**: Below is an outline of the section number topic areas in the I-CCFRT:

- Feasibility Sections: The purpose of Sections A E is for your clinic to consider whether or not it is feasible for the clinic to move forward to become a CCBHC or whether your clinic should consider becoming a DCO for a CCBHC:
  - A. Non Four Walls Design Model and how you can objectively measure if the service delivery culture will work in the new system
  - B. Trauma-Informed Care Model and objective indicators of the ability to deliver this type of care
  - c. PPS Rate Setting Support Requirements
  - D. Other Considerations Related to CCBHC Feasibility and Readiness:
    - 1. Know the State Medicaid Rules
    - 2. Understand How Your Relationships Translate into Costs
    - 3. Getting Technology Right
    - 4. Telemedicine
    - 5. Clinical Quality Assurance
    - 6. Corporate Practice of Medicine
    - 7. PPS-2--Another Level of Complication
  - E. CCBHC Service Delivery Operational Requirements
- 2. Readiness Sections: If your clinic has determined that it is feasible to move forward as a CCBHC, Sections E and F support a readiness assessment of your clinic's ability to meet the CCBHC certification standards and assess the ability of your management team to support timely and effective transformational systems change:
  - E. Compliance with CCBHC Certification Requirements
  - F. Decision-Making and Change Management Support Assessment

The I-CCFRT provides a system for gauging the level of concern among your staff that will support awareness of the level of change management that may be needed to support enhanced service delivery processes, staffing, scope of services, quality outcomes, reporting and governance areas. The readiness tool also provides a sub-total section and overall concern level score which can support more objective identification of change management needs for the clinic to meet all criteria.

Important Definitions: Before completing the I-CCFRT, it is important to review and understand "Definitions" of important terms used in the criteria. The SAMHSA provided CCBHC criteria terms and identified definitions as well as a summary of the quality measures and other reporting requirements are listed beginning on page 34 which follows at the end of I-CCFRT Assessment Scoring Sheet.

#### Use of I-CCFRT

The I-CCFRT is a self-assessment tool that will require your management team to schedule joint time to meet and work through the six programs. The typical time frame to complete the assessment will vary from team to team **based on the service delivery process measurement and support awareness that your team processes**.

Below is important context for your management team as preparation for your use of the I-CCFRT:

- 1. It is important for your team to move away from anecdotal responses to the certification criteria questions such as "We should be able to provide this support and/or meet the criteria...." to understand the reality of the actual capacity of the clinic and/or individual locations/programs to actually implement the design plan, operational requirements and meet the criteria.
- 2. If there are significant variances in response levels or service process data among the management team members, it is important to identify if an I-CCFRT needs to be completed for specific programs (i.e., children/adolescent vs. adult, etc.) or locations in order to fully identify process variances within the clinic. If it is determined best to use multiple I-CCFRT forms to assess programs/locations within the clinic, please add together and average the question and section scores to generate an overall score for the clinic.
- 3. If the question and section scores have more than a one point variance, the key issue to identify is to determine if your clinic is operating as a "group practice" or a "loosely held federation of individual practices".
  - **NOTE**: If your clinic finds that there are significant practice variances within specific programs and/or locations, then overall clinic compliance with the required certification criteria can be significantly more difficult. Therefore, an important outcome of the I-CCFRT might be to identify specific internal practice variances and how to reduce/eliminate these variances.
- 4. The self assessment scoring model for each question and section of the I-CCFRT is based on a five point scale as outlined below:

1	2	3	4	5
Serious Challenge	Quite a bit of Concern	Moderate Concern	Small Concern	Not A Challenge

The level of concern that your team identifies needs to be supported by the following scoring parameters:

- a. If a particular design, operational and/or certification criterion focuses on the state's ability to perform, please rate your level of concern about your CCBHC providing the state necessary information to support the state performance requirement.
- b. If your team is not able to identify the specific response requested to any primary question, the level of challenge score should be documented as a "1".

- c. Most assessment questions contain a "Yes" or "No" identifier prior to the concern rating. The focus for this question is for your team to confirm if the identified design, operational requirement and/or criterion is current practice within your clinic YES or NO. If your team responds "NO", the specific criterion concern response should be a 1 4 based on the level of concern you have about developing the capacity to be compliant with the criterion. Also, if your team identifies a "Yes" and does not feel that a "5" fully identifies the appropriate response, please identify the level of concern that your teams has about being fully compliant.
- d. If your team identifies a level of practice variance within various programs or locations, the score should be a "2" or "3" based on the level of variance identified and the amount of effort it will take to reduce the variance to a standardized clinic wide practice.

At end of each section of the I-CCFRT, there is a "Total Cumulative Score" indicator that will allow your team to total all individual question scores in that section. Also, at the end of the I-CCFRT, there is a scoring sheet that provides for transferring the section cumulative scores to an overall score summary with recommendations for next steps.

**E-Form Instructions:** The I-CCFRT assessment is provided as an e-form. On the following pages, please tab through the assessment sections or click on a specific response area and enter the text or click on a checked item. Using the tab key will advance the pages.

## **Section B: Trauma-Informed Care Readiness Assessment:**

**Overview of Trauma-informed care:** A trauma-informed approach to care "*realizes* the widespread impact of trauma and understands potential paths for recovery; *recognizes* the signs and symptoms of trauma in clients, families, staff,

and others involved in the system; and *responds* by fully integrating knowledge about trauma into policies, procedures, and practices, and seeks to actively *resist re-traumatization*." The six key principles of a trauma-informed approach include: safety; trustworthiness and transparency; peer support; collaboration and mutuality; empowerment, voice and choice; and cultural, historical and gender issues (Substance Abuse and Mental Health Services Administration [2014])

#### Trauma-Informed Care is Community-Based Care (Non-Four Walls):

In most parts of the country the predominant model of care delivery is predicated on consumers accessing care at a clinic with occasional visits in the community. The CCBHC criteria state clearly that all services are available without "4-wall" constraints – meaning that they can be delivered anywhere in the community or via tele-health and still be considered a valid encounter. Further, the care coordination requirements in the statute and subsequent criteria require the CCBHC to have care coordination relationships with a broad range of entities, including community and psychiatric hospitals, juvenile and criminal justice facilities, child welfare, as well as specialty substance use treatment, primary care and other social service agencies.

CCBHCs are paid an all-inclusive rate that is based on costs. This payment flexibility coupled with the care coordination requirements and the emphasis on community-based care provides the CCBHC with a tremendous amount of flexibility in terms of where and how they deliver care. Consider the following opportunities to improve care:

- Emergency room diversion
- Jail Booking diversion
- Post-release "warm hand-off"
- Foster care placement support

CCBHCs have an obligation and the payment flexibility to intervene in each of these settings, facilitating access to care, supporting healthy transitions, and avoiding more expensive levels of care. 1. Based on the above definition, does your clinic currently have the service delivery culture and capacity to ☐ Yes deliver non-four walls community-based trauma informed care? ☐ No □ 2 □ 5 □ 4 Serious Challenge Not A Challenge Quite a bit of Concern Moderate Concern Small Concern An important indicator of a trauma-informed service delivery culture is to shift from a primary reliance on ☐ Yes "scheduling clients" as a solution to meeting their service delivery needs, to a clinical culture of actually "seeing clients" by using all of the then currently available clinical service capacity available at that time. Does ☐ No your clinic have a clinical approach that is primarily focused on "seeing clients "? □ 1 □ 2 □ 3 □ 4 □ 5 Serious Challenge Quite a bit of Concern Moderate Concern Small Concern Not A Challenge Within the bounds of state licensure and certification regulations, CCBHC staffing will include Medicaidenrolled providers who adequately address the needs of the consumer population served. Credentialed, □ Yes certified, and licensed professionals with adequate training in person-centered, family-centered, traumainformed, culturally competent and recovery-oriented care will help ensure this objective is attained. Care ☐ No meeting these standards will further help the CCBHCs achieve integrated and high quality care. Is your clinic currently able to meet this service delivery model requirement?  $\Box 1$ **□ 4** □ 5 □ 2 □ 3 Serious Challenge Quite a bit of Concern Moderate Concern Small Concern Not A Challenge Organizations that are trauma informed are inherently recovery oriented and vice versa. ## Section D: Other Considerations Related to CCBHC Feasibility and Readiness:

Readiness to become a CCBHC will require more than simply asking whether or not you are ready to be a CCBHC provider; instead, you will need to ask whether or not you are prepared to become a brand-new provider type with the responsibilities associated with this new role.

CCBHCs as a provider type have two unique elements that have not been seen in other provider types: 1) the requirements to include structured meta-data into both your organization and your relationship with your partners,

and 2) the ability to provide services outside of your CCBHC through relationships with DCOs. These two requirements create novel complications that must be considered to create successful relationships and protect you from liability that can come from the CCBHC's unique provider type structure.

The following issues will help you to begin thinking about what it means to become a new provider type with structured-data requirements and novel relationships that allow you to move your services outside the walls of your facility.

#### **Know the State Medicaid Rules**

First, it is important to understand your state's Medicaid rules in order to ensure that both you and your partners are complying with Medicaid rules. Since the CCBHC will be responsible for billing for services provided by the DCO, the CCBHC must ensure that the medical records are conformant with the Medicaid rules that are established to prevent provider fraud and abuse. Because each of your DCOs will have its own unique data systems, translating their patient data into Medicaid-conformant, structured data will be the CCBHC's ultimate responsibility.

#### **Understand How Your Relationships Translate into Costs**

The requirement to create relationships with DCOs, and to include the DCOs costs in the CCBHC cost report, can cause complications when accounting for the DCO's costs. You may have overlapping board members with many of your DCO partners, which may make you and your DCO a "related entity." Whether your partners are deemed to be "related" or "unrelated" according to Medicaid regulations will have a direct affect on how you construct your cost reports. Carefully understanding how your corporations and relationships are structured is essential to ensuring that you are complying with Medicaid rules and appropriately setting your rate.

#### **Getting Technology Right**

Collecting structured data and forming DCO relationships means that you must have a technology system that can collect handle the task before it. Since this is a new provider type, many technology systems cannot meet these requirements yet. It is also essential for a CCBHC to store and transmit medical records in compliance with Medicaid billing requirements.

#### **Telemedicine**

Telemedicine will be central to the services provided by a CCBHC. There are many ways in which billing and record keeping for telemedicine can become complicated. Thinking through these intricacies is essential for both preventing fraud and abuse and appropriately billing for services.

#### **Clinical Quality Assurance**

The CCBHC is clinically responsibly for the services provided to a CCBHC patient, even if it is provided by a DCO. A CCBHC must be able to ensure that their DCOs are providing appropriate care for its clients.

#### **Corporate Practice of Medicine**

Are you in a "Corporate Practice of Medicine" State? If so, it is important to make sure that the CCBHC and DCOs conform to these rules in your state.

#### **PPS-2--Another Level of Complication**

If you are a PPS-2 state and PPS-2 involves a cost-to-charge ratio, there are complicated issues surrounding how your charges are established that you will need to investigate as part of your readiness assessment.

The issues above are complex, but do not be discouraged! The National Council has assembled a consulting team that is primed to help you understand these issues as you blaze a trail forward into the new world of CCBHCs.

triat is primed to nei	p you understand these	e issues as you blaze a	i trali lorward into the ne	ew world or CCBH	JS.

#### **SUMMARY:**

- 1. Total number of questions in the feasibility sections A E included in the I-CCFRT is 61

- Total Maximum Score at "5" level rating each is 305
   Total Minimum Score at "1" level rating each is 61
   Total Average Score at an average "3" level rating is 183
- 5. A cumulative clinic-wide score of less than 160 will require significant change management and system changes to a non-four-walls, trauma-informed-care, new provider-type model which can be instructive on whether or not your clinic needs to pursue becoming a CCBHC.

#### Readiness Assessment Sections F - G

## **Section F: CCBHC Program Certification Requirements Readiness Assessment:**

The six program certification requirements outlined below include specific citations in quotes from Section 223 of the Protecting Access to Medicare Act (H.R. 4302), which included a demonstration program based on the Excellence in Mental Health Act:

**Program Requirement 1: Staffing** ("Staffing requirements, including criteria that staff have diverse disciplinary backgrounds, have necessary State required license and accreditation, and are culturally and linguistically trained to serve the needs of the clinic's patient population.")

**Program Requirement 2: Availability and Accessibility of Services** ("Availability and accessibility of services, including: crisis management services that are available and accessible 24 hours a day, the use of a sliding scale for payment, and no rejection for services or limiting of services on the basis of a patient's ability to pay or a place of residence.")

**Program Requirement 3: Care Coordination** ("Care coordination, including requirements to coordinate care across settings and providers to ensure seamless transitions for patients across the full spectrum of health services, including acute, chronic, and behavioral health needs. Care coordination requirements shall include partnerships or formal contracts with the following:

- (i) Federally-qualified health clinics (and as applicable, rural health clinics) to provide Federally-qualified health clinic services (and as applicable, rural health clinic services) to the extent such services are not provided directly through the certified community behavioral health clinic.
- (ii) Inpatient psychiatric facilities and substance use detoxification, post-detoxification step-down services, and residential programs.
- (iii) Other community or regional services, supports, and providers, including schools, child welfare agencies, and juvenile and criminal justice agencies and facilities, Indian Health Service youth regional treatment clinics, State licensed and nationally accredited child placing agencies for therapeutic foster care service, and other social and human services.
- (iv) Department of Veterans Affairs medical clinics, independent outpatient clinics, drop-in clinics, and other facilities of the Department as defined in section 1801 of title 38, United States Code.
- (v) Inpatient acute care hospitals and hospital outpatient clinics.")

**Program Requirement 4: Scope of Services** ("Provision (in a manner reflecting person-centered care) of the following services which, if not available directly through the certified community behavioral health clinic, are provided or referred through formal relationships with other providers:

- (i) Crisis mental health services, including 24-hour mobile crisis teams, emergency crisis intervention services, and crisis stabilization.
- (ii) Screening, assessment, and diagnosis, including risk assessment.
- (iii) Patient-centered treatment planning or similar processes, including risk assessment and crisis planning.
- (iv) Outpatient mental health and substance use services.
- (v) Outpatient clinic primary care screening and monitoring of key health indicators and health risk.
- (vi) Targeted case management.
- (vii) Psychiatric rehabilitation services.
- (viii) Peer support and counselor services and family supports.
- (ix) Intensive, community-based mental health care for members of the armed forces and veterans, particularly those members and veterans located in rural areas, provided the care is consistent with minimum clinical mental health guidelines promulgated by the Veterans Health Administration, including clinical guidelines contained in the Uniform Mental Health Services Handbook of such Administration.")

**Program Requirement 5: Quality and Other Reporting** ("Reporting of encounter data, clinical outcomes data, quality data, and such other data as the Secretary requires.")

Program Requirement 6: Organizational Authority, Governance and Accreditation ("Criteria that a clinic be a nonprofit or part of a local government behavioral health authority or operated under the authority of the Indian Health Service, an Indian Tribe, or Tribal organization pursuant to a contract, grant, cooperative agreement, or compact with the Indian Health Service pursuant to the Indian Self-Determination Act [25 U.S.C. 450 et seq.], or an

urban Indian organization pursuant to a grant or contract with the Indian Health Service under title V of the Indian Health Care Improvement Act [25 U.S.C. 1601 et seq].")

**NOTE**: MTM Services has provided the following assessment related to the clinic's change management and decision-making processes that can be helpful to determine the level of change leadership that will be required.

Section G - Change Management and Decision Making						
As a CCBHC, it is essential to include your DCO in any of your change management and decision-making processes. Since the						
CCBHC is clinically responsible for the services provided by the DCO, a CCBHC will need to recognize service deficiencies and be						
able to nimbly adapt to counter these deficiencies. This means that your CCBHC must create close working relationships based on						
mutual trust and understanding of delivering trauma-informed, non-four-walls care to the individuals within your service area.

## I-CCFRT Score and Change Management Priority Rating Sheet

#### Instructions:

- A. Average I-CCFRT Section Score: Below is a list of all Program Requirements 1- 6 and Practice Management Sections A D of the I-CCFRT which includes a formula under each section to create and enter an average score per section in Column "B".
- B. **Importance Rating Determination:** Enter a score of 1, 3 or 5 in Column "C" to identify the importance rating the management team gives to the each Provider Requirement and Practice Management section that the readiness score indicates that a change is required based on the following rating values:
  - 1 = **High Importance:** This item is very important to our clinic and potential healthcare partners and is a top priority
  - **3 = Moderate Importance:** This item is important but would never be a top priority for our clinic and potential healthcare partners
  - 5 = Low Importance: This item is of little importance to our clinic or potential healthcare partners
- C. Change Need Score Column "D": To render the total change need score, multiply the average I-CCFRT Section score in column "B" by the change importance rating in column "C". The three Program Requirements in the I-CCFRT with the lowest change need score(s) and ties in lowest score in column "D" need to be the focus of change goals in a Rapid Cycle Change Plan for your clinic. Additionally, if the Change Management and Decision-Making score is less than 30, it is recommended that all supervisors, managers and senior leaders complete leadership skills training to support transformational change.

demplote loader only okine training to support transformational change.

Requirement 5: Quality and Other Reporting	
Total Program Requirement 5 Score = divided by 7 = Average Score enter in column "B" to the right	
Program Requirement 6: Organizational Authority, Governance and Accreditation Total Program Requirement 6 Score = divided by 11 = Average Score enter in column "B" to the right	
Section G: Change Management and Decision-Making: Change management capacity including the use of Rapid Cycle Change models Total Section Score = divided by 10 = Average Score enter in column "B" to the right NOTE: If the Change Management and Decision-Making score is less than 30, it is recommended that all supervisors, managers and senior leaders complete leadership skills training to more effectively support transformational change.	

**NOTE:** This I-CCFRT has been developed based on final certification criteria for CCBHCs. After completion of the I-CCFRT, MTM Services through the National Council can provide:

- 1. A written summary of findings and recommendations for individual clinic organizational change consultation support to effectively address areas of concern identified in the I-CCFRT; and/or
- 2. Provide an aggregate summary of findings and written recommendations for a statewide group of clinics that will help direct adequate consultation and technical assistance for specific clinics and for specific certification program requirements.
- 3. Leadership Skills to support transformational change needs

For more information about these additional support services, please contact: Brianna Williams at the National Council at <a href="mailto:BriannaW@thenationalcouncil.org">BriannaW@thenationalcouncil.org</a> or Marian Bradley at MTM Services at <a href="mailto:marian.bradley@mtmservices.org">marian.bradley@mtmservices.org</a>

#### **CCBHC Criteria Definitions**

Important terms used in the CCBHC criteria are defined below. SAMHSA recognizes states may have existing definitions of the terms included here and these definitions are not intended to supplant state definitions to the extent a state definition is more specific or encompasses more than the definition used here.

**Agreement:** As used in the context of care coordination, an agreement is an arrangement between the CCBHC and external entities with which care is coordinated. Such an agreement is evidenced by a contract, Memorandum of Agreement (MOA), or Memorandum of Understanding (MOU) with the other entity, or by a letter of support, letter of agreement, or letter of commitment from the other entity. The agreement describes the parties' mutual expectations and responsibilities related to care coordination.

**Behavioral health:** Behavioral health is a general term "used to refer to both mental health and substance use" (SAMHSA-HRSA [2015]).

Care coordination: The Agency for Healthcare Research and Quality (2014) defines care coordination as "deliberately organizing consumer care activities and sharing information among all of the participants concerned with a consumer's care to achieve safer and more effective care. This means the patient's needs and preferences are known ahead of time and communicated at the right time to the right people, and that this information is used to provide safe, appropriate, and effective care to the patient." As used here, the term applies to activities by CCBHCs that have the purpose of coordinating and managing the care and services furnished to each consumer as required by PAMA (including both behavioral and physical health care), regardless of whether the care and services are provided directly by the CCBHC or through referral or other affiliation with care providers and facilities outside the CCBHC. Care coordination is regarded as an activity rather than a service.

Case management: Case management may be defined in many ways and can encompass services ranging from basic to intensive. The National Association of State Mental Health Program Directors (NASMHPD) defines case management as "a range of services provided to assist and support individuals in developing their skills to gain access to needed medical, behavioral health, housing, employment, social, educational and other services essential to meeting basic human services; linkages and training for patient served in the use of basic community resources; and monitoring of overall service delivery" (NASMHPD [2014]). See also the definition of "targeted case management."

**CCBHC or Clinic:** CCBHC and Clinic are used interchangeably to refer to Certified Community Behavioral Health Clinics as certified by states in accordance with these criteria and with the requirements of PAMA. A CCBHC may offer services in different locations. For multi-site organizations, however, only clinics eligible pursuant to these criteria and PAMA may be certified as CCBHCs.

**CCBHC directly provides:** When the term, "CCBHC directly provides" is used within these criteria it means employees or contract employees within the management structure and under the direct supervision of the CCBHC deliver the service.

**Consumer:** Within this document, the term "consumer" refers to clients, persons being treated for or in recovery from mental and/or substance use disorders, persons with lived experience, service recipients and patients, all used interchangeably to refer to persons of all ages (i.e., children, adolescents, transition aged youth, adults, and geriatric populations)

for whom health care services, including behavioral health services, are provided by CCBHCs. Use of the term "patient" is restricted to areas where the statutory or other language is being quoted. Elsewhere, the word "consumer" is used.

**Cultural and linguistic competence:** Culturally and linguistically appropriate services are respectful of and responsive to the health beliefs, practices and needs of diverse consumers (Office of Minority Health [2014]).

Designated Collaborating Organization (DCO): A DCO is an entity that is not under the direct supervision of the CCBHC but is engaged in a formal relationship with the CCBHC and delivers services under the same requirements as the CCBHC. Payment for DCO services is included within the scope of the CCBHC PPS, and DCO encounters will be treated as CCBHC encounters for purposes of the PPS. The CCBHC maintains clinical responsibility for the services provided for CCBHC consumers by the DCO. To the extent that services are required that cannot be provided by either the CCBHC directly or by a DCO, referrals may be made to other providers or entities. The CCBHC retains responsibility for care coordination including services to which it refers consumers. Payment for those referred services is not through the PPS but is made through traditional mechanisms within Medicaid.

**Engagement:** Engagement includes a set of activities connecting consumers with needed services. This involves the process of making sure consumers and families are informed about and initiate access with available services and, once services are offered or received, individuals and families make active decisions to continue receipt of the services provided. Activities such as outreach and education can serve the objective of engagement. Conditions such as accessibility, provider responsiveness, availability of culturally and linguistically competent care, and the provision of quality care, also promote consumer engagement.

**Family:** Families of both adult and child consumers are important components of treatment planning, treatment and recovery. Families come in different forms and, to the extent possible, the CCBHC should respect the individual consumer's view of what constitutes their family. Families can be organized in a wide variety of configurations regardless of social or economic status. Families can include biological parents and their partners, adoptive parents and their partners, foster parents and their partners, grandparents and their partners, siblings and their partners, care givers, friends, and others as defined by the family.

Family-centered: The Health Resources and Services Administration defines family-centered care, sometimes referred to as "family-focused care," as "an approach to the planning, delivery, and evaluation of health care whose cornerstone is active participation between families and professionals. Family-centered care recognizes families are the ultimate decision-makers for their children, with children gradually taking on more and more of this decision-making themselves. When care is family-centered, services not only meet the physical, emotional, developmental, and social needs of children, but also support the family's relationship with the child's health care providers and recognize the family's customs and values" (Health Resources and Services Administration [2004]). More recently, this concept was broadened to explicitly recognize family-centered services are both developmentally appropriate and youth guided (American Academy of Child & Adolescent Psychiatry [2009]). Family-centered care is family-driven and youth-driven.

**Formal relationships:** As used in the context of scope of services and the relationships between the CCBHC and DCOs, a formal relationship is evidenced by a contract, Memorandum of Agreement (MOA), Memorandum of Understanding (MOU), or such other formal arrangements describing the parties' mutual expectations and establishing accountability for services to be provided and funding to be sought and utilized. This formal relationship does not extend to referrals for services outside either the CCBHC or DCO, which are not encompassed within the reimbursement provided by the PPS.

**Limited English Proficiency (LEP):** LEP includes individuals who do not speak English as their primary language or who have a limited ability to read, write, speak, or understand English and who may be eligible to receive language assistance with respect to the particular service, benefit, or encounter.

**Peer Support Services:** Peer support services are services designed and delivered by individuals who have experienced a mental or substance use disorder and are in recovery. This also includes services designed and delivered by family members of those in recovery.

**Peer Support Specialist:** A peer provider (e.g., peer support specialist, recovery coach) is a person who uses their lived experience of recovery from mental or substance use disorders or as a family member of such a person, plus skills learned in formal training, to deliver services in behavioral health settings to promote recovery and resiliency. In states where Peer Support Services are covered through the state Medicaid Plans, the title of "certified peer specialist" often is used. SAMHSA recognizes states use different terminology for these providers.

Person-centered care: Person-centered care is aligned with the requirements of Section 2402(a) of the Patient Protection and Affordable Care Act, as implemented by the Department of Health & Human Services Guidance to HHS Agencies for Implementing Principles of Section 2403(a) of the Affordable Care Act: Standards for Person-Centered Planning and Self-Direction in Home and Community-Based Services Programs (Department of Health & Human Services [June 6, 2014]). That guidance defines "person-centered planning" as a process directed by the person with service needs which identifies recovery goals, objectives and strategies. If the consumer wishes, this process may include a representative whom the person has freely chosen, or who is otherwise authorized to make personal or health decisions for the person. Person-centered planning also includes family members, legal guardians, friends, caregivers, and others whom the person wishes to include. Person-centered planning involves the consumer to the maximum extent possible. Person-centered planning also involves self- direction, which means the consumer has control over selecting and using services and supports, including control over the amount, duration, and scope of services and supports, as well as choice of providers (Department of Health & Human Services [June 6, 2014]).

**Practitioner or Provider:** Any individual (practitioner) or entity (provider) engaged in the delivery of health care services and who is legally authorized to do so by the state in which the individual or entity delivers the services (42 CFR § 400.203).

**Recovery:** Recovery is defined as "a process of change through which individuals improve their health and wellness, live a self-directed life, and strive to reach their full potential." The 10 guiding principles of recovery are: hope; person-driven; many pathways; holistic; peer support; relational; culture; addresses trauma; strengths/responsibility; and respect. Recovery includes: Health (abstinence,"making informed healthy choices that support physical and emotional wellbeing"); Home (safe, stable housing); Purpose ("meaningful").

daily activities ... and the independence, income and resources to participate in society"); and Community ("relationships and social networks that provide support, friendship, love, and hope") (Substance Abuse and Mental Health Services Administration [2012]).

**Recovery-oriented care:** Recovery-oriented care is oriented toward promoting and sustaining a person's recovery from a behavioral health condition. Care providers identify and build upon each individual's assets, strengths, and areas of health and competence to support the person in managing their condition while regaining a meaningful, constructive sense of membership in the broader community (Substance Abuse and Mental Health Services Administration [2015]).

**Shared Decision-Making (SDM):** SDM is an approach to care through which providers and consumers of health care come together as collaborators in determining the course of care. Key characteristics include having the health care provider, consumer, and sometimes family members and friends acting together, including taking steps in sharing a treatment decision, sharing information about treatment options, and arriving at consensus regarding preferred treatment options (Schauer, Everett, delVecchio, & Anderson [2007]).

Targeted case management: Targeted case management is case management, as defined above, directed at specific groups, which may vary by state. CMS defines targeted case management as case management furnished without regard to requirements of statewide provision of service or comparability that typically apply for Medicaid reimbursement. 42 CFR § 440.169(b). Examples of groups that might be targeted for case management are children with serious emotional disturbance, adults with serious mental and/or substance use disorders, pregnant women who meet risk criteria, individuals with HIV, and such other groups as a state might identify as in need of targeted case management. See also the definition of "case management."

**Trauma-informed:** A trauma-informed approach to care "realizes the widespread impact of trauma and understands potential paths for recovery; recognizes the signs and symptoms of trauma in clients, families, staff, and others involved in the system; and responds by fully integrating knowledge about trauma into policies, procedures, and practices, and seeks to actively resist re-traumatization." The six key principles of a trauma-informed approach include: safety; trustworthiness and transparency; peer support; collaboration and mutuality; empowerment, voice and choice; and cultural, historical and gender issues (Substance Abuse and Mental Health Services Administration [2014]).

## Appendix A:

## **Quality Measures and Other Reporting Requirements**

Appendix A contains the data and quality measures required to be reported as part of these criteria. The requirements are based on the measurement landscape as of the time the CCBHC criteria were drafted (March 2015) and, given the rapid change occurring in the measurement field, might change, particularly if altering these quality measures enables better alignment with other reporting requirements. For the same reason, Quality Bonus Measures (QBMs) are not specified in these criteria or Appendix, rather they are established by CMS as part of the PPS. Appendix A is divided into data/measures required to be reported by the CCBHCs (Table 1) and those required to be reported by the states (Table 2). Reporting is annual and data are required to be reported for all CCBHC consumers, or where data constraints exist, for all Medicaid enrollees in the CCBHCs.

In addition to these reporting requirements, the demonstration program evaluator will require the reporting of additional data to be used as part of the project evaluation. Those additional data are not specified in these criteria. All data collected and reported by the state must be flagged to distinguish the individual CCBHCs and consumers served by CCBHCs, as well as a comparison group of clinics and consumers. In addition, the consumer's unique Medicaid identifier must be attached.

Table 1: CCBHC Required Reporting = 17

Potential Source of Data	Measure or Other Reporting Requirement	National Quality Forum Measure (# if endorsed)
EHR, Patient records, Electronic scheduler	Number/Percent of clients requesting services who were determined to need routine care	N/A
EHR, Patient records, Electronic scheduler	Number/percent of new clients with initial evaluation provided within 10 business days, and mean number of days until initial evaluation for new clients	N/A
EHR, Patient records, Electronic scheduler	Mean number of days before the comprehensive person-centered and family centered diagnostic and treatment planning evaluation is performed for new clients	N/A
EHR, Patient records	Number of Suicide Deaths by Patients Engaged in Behavioral Health (CCBHC) Treatment	N/A
EHR, Patient records	Documentation of Current Medications in the Medical Records	0419
MHSIP Consumer survey	Patient experience of care survey	No
MHSIP Family survey	Family experience of care survey	No
EHR, Patient records	Preventive Care and Screening: Adult Body Mass Index (BMI) Screening and Follow-Up	0421

Potential Source of Data	Measure or Other Reporting Requirement	National Quality Forum Measure (# if endorsed)
EHR, Encounter data	Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents (WCC) (see Medicaid Child Core Set)9	0024
EHR, Encounter data	Controlling High Blood Pressure (see Medicaid Adult Core Set) <sub>10</sub>	0018
Encounter data	Preventive Care & Screening: Tobacco Use: Screening & Cessation Intervention	0028
EHR, Patient records	Preventive Care and Screening: Unhealthy Alcohol Use: Screening and Brief Counseling	2152
EHR, Patient records	Initiation and engagement of alcohol and other drug dependence treatment (see Medicaid Adult Core Set)	0004
EHR, Patient records	Child and adolescent major depressive disorder (MDD): Suicide Risk Assessment (see Medicaid Child Core Set)	1365
EHR, Patient records	Adult major depressive disorder (MDD): Suicide risk assessment (use EHR Incentive Program version of measure)	0104
EHR, Patient records	Screening for Clinical Depression and Follow-Up Plan (see Medicaid Adult Core Set)	0418
EHR, Patient records; Consumer follow-up with standardized measure (PHQ-9)	Depression Remission at 12 months	0710

# Table 2. State Required Reporting = 15

Potential Source of Data	Measure or Other Reporting Requirement	National Quality Forum Measure (# if endorsed)
URS	Housing Status (Residential Status at Admission or Start of the Reporting Period Compared to Residential Status at Discharge or End of the Reporting Period)	N/A
Claims data/encounter data	Number of Suicide Attempts Requiring Medical Services by Patients Engaged in Behavioral Health (CCBHC) Treatment	N/A
Claims data/encounter data	Follow-Up After Discharge from the Emergency Department for Mental Health or Alcohol or Other Dependence	2605
Claims data/encounter data	Plan All-Cause Readmission Rate (PCR-AD) (see Medicaid Adult Core Set)	1768
Claims data/encounter data	Diabetes Screening for People with Schizophrenia or Bipolar Disorder who Are Using Antipsychotic Medications	1932

Potential Source of Data	Measure or Other Reporting Requirement	National Quality Forum Measure (# if endorsed)
Claims data/encounter data	Diabetes Care for People with Serious Mental Illness: Hemoglobin A1c (HbA1c) Poor Control (>9.0%)	2607
Claims data/encounter data	Metabolic Monitoring for Children and Adolescents on Antipsychotics	No
Claims data/encounter data	Cardiovascular health screening for people with schizophrenia or bipolar disorder who are prescribed antipsychotic medications	1927
Claims data/encounter data	Cardiovascular health monitoring for people with cardiovascular disease and schizophrenia	1933
Claims data/encounter data	Adherence to Mood Stabilizers for Individuals with Bipolar I Disorder	1880
Claims data/encounter data	Adherence to Antipsychotic Medications for Individuals with Schizophrenia (see Medicaid Adult Core Set)	No
Claims data/encounter data	Follow-Up After Hospitalization for Mental Illness, ages 21+ (adult) (see Medicaid Adult Core Set)	0576
Claims data/encounter data	Follow-Up After Hospitalization for Mental Illness, ages 6 to 21 (child/adolescent) (see Medicaid Child Core Set)	0576
Claims data/encounter data	Follow-up care for children prescribed ADHD medication (see Medicaid Child Core Set)	0108
Claims data/encounter data	Antidepressant Medication Management (see Medicaid Adult Core Set)	0105

## **Table 3. Quality Bonus Payment Medicaid Adult and Core Set Measures**

For the state to make QBP, the CCBHC must demonstrate that it has achieved all of the required quality measures shown in Table 3. The state can make QBP using the additional measures provided in this guidance, but only after the certified clinic has met performance goals for the required set of measures. States may propose quality measures for QBP; however, CMS approval is required. The QBP measures included in this guidance are derived primarily from the Medicaid adult and child core set measures. In applying to participate in this demonstration the state must demonstrate how it plans to implement QBP if it plans to make such payments.

Acronym <sup>1</sup>	Measure	Measure Steward <sup>2</sup>	QBP Eligible Measures	Required QBP Measures	Included in Table 1 or 2 above
FUH-AD	Follow-Up After Hospitalization for Mental Illness (adult age groups)	NCQA/HEDIS	Yes	Yes	Yes
FUH-CH	Follow-Up After Hospitalization for Mental Illness (child/adolescents)	NCQA/HEDIS	Yes	Yes	Yes

Acronym <sup>1</sup>	Measure	Measure Steward <sup>2</sup>	QBP Eligible Measures	Required QBP Measures	Included in Table 1 or 2 above
SAA-AD	Adherence to Antipsychotics for Individuals with Schizophrenia	NCQA/HEDIS	Yes	Yes	Yes
IET-AD	Initiation and Engagement of Alcohol and Other Drug Dependence Treatment	NCQA/HEDIS	Yes	Yes	Yes
NQF-0104	Adult Major Depressive Disorder (MDD): Suicide Risk Assessment	AMA-PCPI	Yes	Yes	Yes
SRA-CH	Child and Adolescent Major Depressive Disorder (MDD): Suicide Risk Assessment	AMA-PCPI	Yes	Yes	Yes
ADD-CH	Follow-Up Care for Children Prescribed Attention Deficit Hyperactivity Disorder (ADHD) Medication	NCQA/HEDIS	Yes	No	Yes
CDF-AD	Screening for Clinical Depression and Follow-Up Plan	CMS	Yes	No	Yes
AMM-AD	Antidepressant Medication Management	NCQA/HEDIS	Yes	No	Yes
PCR-AD	Plan All-Cause Readmission Rate	NCQA/HEDIS	Yes	No	Yes
NQF-0710	Depression Remission at Twelve Months-Adults	MPC	Yes	No	Yes

<sup>1</sup>CMS-developed acronyms, except NQF-0104 and NQF-0710. CH refers to measures in the 2015 Medicaid Child Core Set, AD refers to measures in the 2015 Medicaid Adult Core Set.
