SHIP 2020-2024 PRIORITY: ECONOMIC DRIVERS OF HEALTH

COMMUNITY FEEDBACK

“Our vulnerable LGBTQ youth are very vulnerable to being kicked out, homeless, stuck in sex trafficking, drug use and face other hardships. Outreach to homeless QUEER youth is incredibly important. Immigrant community queer youth are particularly at risk”

- Community Engagement Survey Respondent

“Take a look at why housing and food are skyrocketing but wages are not”

- Community Engagement Survey Respondent

“More creative program support for elders and caregivers. State investment in developing much more affordable housing for low and middle income residents that is SUSTAINABLY affordable.”

- Community Engagement Survey Respondent

“Housing first-prioritize getting houseless/housing-insecure people into housing. So much will be improved (and money will be saved) if we get people housed.”

- Community Engagement Survey Respondent

Defining the drivers

The PartnerSHIP named 4 specific drivers for this priority area:

- Housing
- Food insecurity
- Transportation
- Living wage

Discussion: Looking at the data, are these the 4 drivers you want to address? Are there any others that would be equally or more important?

Getting organized

Proposal: Subcommittee will form work groups for each identified driver. Work groups will work together between subcommittee meetings via Basecamp & ad hoc phone calls.

Discussion: Which work group(s) would you like to join?

Defining the goal

Goals are broad statements of what we're hoping to accomplish. Goals are aspirational, often stated without limits.

- What do we want to achieve by addressing this issue together?
- What communities are most impacted by institutional bias?

For example: *The goal is to (effect, e.g. improve, decrease, etc.) the (problem/need/opportunity) of (target population) by/through (x mechanism).*

Defining the goal

Examples (not population specific):

- Improve health by increasing access to nutrition support programs
- Improve health by increasing access to reliable transit
- Improve health by increasing housing supports and services
- Improve health by creating more jobs at living wages

- Improve health by increasing economic and social supports for those furthest from opportunity
