DATA TABLES INTRODUCTION

The 2022 Student Health Survey (SHS) provides important data that can improve our understanding of the challenges students face. The findings from the SHS can be used to bridge the knowledge gap between students and the adults and communities who support them to ensure that Oregon provides a safe, supportive, and equitable environment where all youth can thrive.

A forthcoming report will provide more context.

Instead of providing the traditional public health report with numbers, charts and graphs that display what is in the data tables, OHA is taking time to develop a report that we hope will provide greater value and insight.

In the 2022 SHS, students took the time to share their stories in several open-ended questions. OHA is working with community partners to develop a plan to analyze the responses in order to understand how they may inform policy decisions to truly improve the lives of our youth.

These analyses take time, collaboration and thought, and we want to get it right. It may take a while for the report to be in your hands, but we believe it will be worth the wait.

Results for your DISTRICT / SCHOOL are provided in these data tables

These data tables show your district or school results by grade, compared to the statewide results. A table is included for every question in the survey, as well as for calculated variables (ex: PYD Benchmark) and recoded or collapsed responses (ex: has a disability/does not have a disability).

Based on community partner recommendations, additional response categories were included for every question in 2022:

- I am not sure
- I don't know what this question is asking
- I prefer not to answer

The addition of these responses impacts the denominator and resulting percentages so that 2022 results are not strictly comparable to the 2020 SHS results. Therefore, 2020 results are not presented in comparison to the 2022 data tables but can be found in the 2020 SHS report and on the Oregon Student Health Survey (SHS) Data Portal (<https://www.bach-harrison.com/SHSDataPortal>) (2022 results will be available on the portal by the end of June 2023).

Information required Drug-Free Communities (DFC) Core Measure reporting are also included with these tables.

FORTHCOMING 2022 SHS REPORT

The 2022 SHS included open-ended questions to give students a voice and provide context to some of the responses. It is important to get at the WHY, in addition to the what.

The 2022 SHS asked:

- Thinking about your life at school, at home and in your community, what people, relationships, places or activities help you feel healthier, happier and/or safer?
- What is causing you to miss school? (asked if they had missed school during the past month)
- What made it hard for you to get your physical health care needs met? (asked if they had unmet physical health care needs during the past year)
- What made it hard for you to get your emotional or mental health care needs met (asked if they had unmet emotional or mental health care needs during the past year)

This is the first time we have used open-ended questions to inform policy decisions. The stories students

The stories students have chosen to share with us are thoughtful, honest, and, at times, heartbreaking. The responses provide a glimpse into the joys and challenges youth face, and also reinforce their resiliency.

Currently, responses are being lightly edited to protect confidentiality and privacy, and to remove potentially offensive comments.

The responses will then be analyzed based on a plan developed with community partners that centers equity, with the goal to inform policy decisions to improve the lives of our youth.

BY THE NUMBERS

Over 45,000 students participated in the 2022 SHS:

6th grade: 16,598

8th grade: 16,316

11th grade: 12,685

Total: 45,599

They represent:

- 85 districts
- 327 schools
- 29 counties (exceptions are Benton, Crook, Gilliam, Harney, Jefferson, Wallowa, and Wasco)

The SHS was administered at schools between October 2022 and January 2023.

DATA TABLES

This section features results by grade for each question on the survey. A table is also included for calculated variables/recodes.

These tables show the percentage that marked each possible response for each question. Calculated variables or recodes that show the results for questions in a different way, such as combining responses (e.g., percentage of students who have one or more disabilities vs. those with no disabilities) or basing percentages on a subset of respondents (e.g., percentage who drank 5 or more drinks in row in past 30 days only among those who drank alcohol in past 30 days).

The 6th and 8th grade surveys consisted of a subset of questions on the 11th grade survey. Data for questions that did not appear on the 6th or 8th grade version are shown as “n/a” (not applicable). Response categories for questions with no respondents will show “0.0”.

DRUG-FREE COMMUNITIES CORE MEASURES REPORTING

DRUG-FREE COMMUNITIES

Risk factors are associated with drug use and other problem behaviors (delinquent and antisocial behavior, school drop-out and teenage pregnancy). While exposure to one risk factor does not determine if a child will have problems later in life, research shows that exposure to a greater number of risk factors increases a young person's risk exponentially.

The Drug-Free Communities (DFC) Support Program (<http://www.cdc.gov/drugoverdose/drug-free-communities/about.html>), administered by the Center for Substance Abuse Prevention, is the nation's leading effort to mobilize communities to prevent and reduce substance use among youth.

More than 700 community coalitions across the country receive funding up to \$125,000 per year to strengthen collaboration among local partners to create or strengthen infrastructure that reduces youth substance use. The grant funding for this requires specific data referred to as the Core Measures. We included additional questions about e-cigarette use for added context about substance use among youth.

DFC programs are required to report on four (4) categories:

- Alcohol;
- Tobacco;
- Marijuana; and
- Prescription drugs not prescribed by a doctor.

Required DFC Reporting

The table on the following page includes all of the information required for DFC reporting.

* For Past 30-Day Use, Perception of Risk, and Perception of Parental/Peer Disapproval, the "Sample" column represents the sample size - the number of people who answered the question and whose responses were used to determine the percentage. The "Percent" column represents the percentage of youth in the sample answering the question as specified in the definition.

*(Denominator: Excludes those who say "I am not sure", "I don't know what this question is asking", and "I prefer not to answer" .)

APPENDIX III: METHODOLOGY

The SHS is a comprehensive, school-based, anonymous and voluntary health survey of 6th, 8th and 11th graders that is administered in the fall of even-numbered years. It is a key part of statewide efforts to help local schools and communities ensure that all Oregon youth are healthy and successful learners.

The 2022 SHS was designed to be administered online to 6th, 8th and 11th graders statewide in one classroom period to provide state- and county-level estimates.

The sampling frame is based on the Oregon Department of Education's (ODE) Fall Membership Report for 2020-2021 and consists of public schools in Oregon with 6th, 8th and 11th grade enrollment of at least 10 students within the grade. The following types of schools were excluded from the sampling frame:

- State run schools/Schools with no associated school district, such as:
 - » Juvenile justice facilities
 - » Treatment facilities
 - » Boarding schools

PARTICIPATION IS VOLUNTARY AND HIGHLY ENCOURAGED

The SHS is not mandatory. Because the survey covers a comprehensive range of health-related topics, some of the questions can be considered sensitive. There are opportunities for districts, parents/guardians and students to choose whether or not to participate.

SHS uses an active notification/passive consent model for the survey. Once district approval is received, schools send Parental Notification letters to parents and guardians at least two weeks prior to survey administration to inform them of the upcoming survey and provide an opportunity to opt their student out of the survey. The parent letters were available in English, Spanish, Russian, simplified Chinese, Vietnamese and Somali. Students can also choose to opt themselves out of the survey or to skip over any question they do not want to answer.

OTHER IMPORTANT THINGS TO KNOW

- The online surveys were available in English and Spanish and had a Flesch-Kincaid Grade level of 6 (reader needs a grade 6 level of reading or above to understand it):
 - » 6th grade: 6.0
 - » 8th grade: 5.9
 - » 11th grade: 6.4
- The longer the survey, the higher the drop-off (i.e., non-response) for questions that are towards the end. To minimize this, some question topics were rotated on a random basis:
 - » School Climate, Absenteeism and Bullying
 - » Mental Health
 - » Healthy Body
 - » Access to Care
 - » Sexual Health, Dating Violence and Sexual Violence
 - » Injury Prevention
 - » Gambling, Substance Use and Drug-Free Communities
- A four-question optional Substance Use Module was piloted that superintendents could choose to include at the end of the survey. A total of 33 districts chose to administer this module. Results for this optional module are provided at the end of Appendix I.
- School and district-level data are unweighted.
- The data are weighted by enrollment for state-and county-level estimates. State results are weighted to account for lack of participation from the seven non-participating counties.
- Several large districts (Portland Public Schools, David-Douglas School District, Salem-Keizer School District and Eugene School District 4J) declined to administer the 2022 SHS, and caution should be used when interpreting results for Multnomah, Marion and Lane counties.
