

Appendix C: Available laboratories for cyanobacteria testing

When processing water samples for toxins as part of a toxin-based monitoring program, OHA recommends sampling data be available within 3 business days after receipt of a sample. This helps OHA and the waterbody managers to meet the need for timely communication with the public and demonstrates that action is being taken to protect public health. For OHA purposes, electronic versions with official results will suffice.

Aquatic Analysts

(Identification and enumeration)
43 Telegraph Lane
Friday Harbor, WA 98250

Attn: Jim Sweet
Phone: (503) 869-5032
