

## Off-site Vaccination Clinic Temperature Log for Refrigerator - Celsius

## Monitor temperatures closely!

1. Write your initials below in "Staff Initials," and note the time in "ExactTime."

 $\label{eq:linear} \textbf{2. Record the min/max temperatures of the vaccine after transport to off-site clinic.}$ 

3. Record vaccine temperatures every hour during the clinic by putting an X in the row that corresponds with the storage unit temperature.

- 4. At the end of the day record the min/max temperatures reached.
- 5. Record min/max temps again after returning vaccine to main clinic.
- 6. If any out-of-range temps, see instructions to the right.
- 7. Keep this documentation with your clinic's temp logs.

Clinic Dates: \_\_\_\_\_ Clinic Hours: \_\_\_\_\_

Facility Name: \_\_\_\_\_

Off-site Clinic Location: \_\_\_\_\_

## Take action if temp is out of range—too warm (above 8°C) or too cold (below 2°C).

1. Relocate the vaccines to proper conditions as quickly as possible. Label the vaccines "Do Not Use". Do not discard vaccines unless directed to by the Manufacturer (COVID-19 vaccine) or Oregon Immunization Program (all other vaccine)

- 2. Record the out-of-range temps in the "Action" area on the bottom of the log.
- 3. For COVID-19 vaccine, call the manufacturer. For other vaccines call the OIP Helpdesk at 971-673-4832 to determine vaccine viabilityand next steps.
- 4. Document the action taken on the "Vaccine Storage Troubleshooting Record"
