----------------------------------	----------------------------------	--	-------

**OSTF Compliance Summary
As of February 28, 2023**

Notes

- (1) For securities that have been called by the issuer, the effective call date is used as a proxy for the maturity date.
- (2) For securities with a put option, the date upon which the put option is fully exercisable for a value of at least 100% of the investment's par or face amount is used as a proxy for the maturity date.
- (3) For variable rate securities, the period remaining to the next reset date is used as a proxy for the maturity date.
- (4) For Asset Backed Securities (ABS), the weighted average life is used as a proxy for the maturity date, except for variable-rate ABS, which use the period remaining to the next reset date as a proxy for the maturity date.
- (5) By policy, credit ratings are assigned a numeric value to determine weighted average credit quality, as follows: AAA/Govt/Agency = 29, AA+ = 28, AA = 27, AA- = 26, etc. The calculation does not include Time Certificates of Deposit, which are unrated securities.
- (6) Investment in Local Government Intermediate Fund (OLGIF) is excluded from the percent of portfolio to mature over one year calculation.
