

# Inside the Vault

**Local Government Edition** 

# **Strong Passwords**

Establishing strong passwords is an important safeguard for your data, especially when many data breaches

result from weak or stolen passwords. Below are some best practices that can help increase the strength of your login credentials.

- ▲ **The longer, the better.** Longer passwords make it more difficult for hackers to guess login credentials. Make your passwords between eight and 64 characters but not so long that you cannot remember it.
- ▲ **Do not repeat.** Establish a unique password for each of your accounts. If your login credentials ever become compromised, having a unique password for the affected account can help to limit the impact.
- ▶ Do not use personal information. High school, street name, pet's name, birthday, etc., are all examples of commonly found information that should be avoided in passwords.
- ▲ **Keep your passwords a secret.** Do not write your passwords down. As passwords become longer and more complex, using a password manager is a secure way to manage all of your passwords (check with your IT department about acceptable tools).

(Continued on page 2)

# **Upcoming Holiday**

The pool will be closed on Monday, January 17, for Martin Luther King, Jr. Day. EON will be available, but the system will not allow transactions to settle on the holiday.

# **Interest Rates**

Average Annualized Yield

November 0.45%

December 0.45%

Interest Rates

(Continued from page 1)

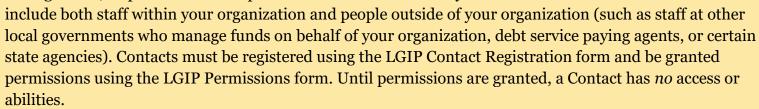

- ▲ **Use a "passphrase."** A passphrase is a sequence of words or text that you can easily remember. For example, mygraydoglikesfrogs. Passphrases can be more challenging for hackers to crack.
- Use a mix of upper and lowercase letters, numbers and special characters. Using a good mix of characters in your passwords makes it more challenging for password-guessing software to figure out your password. Some password managers can automatically generate strong, unique passwords.
- ▲ **Always use multi-factor authentication when available.** Though it is not fool-proof, this extra step greatly decreases the chance of your information being compromised and helps to ensure only authorized individuals are accessing your online accounts.

## **LGIP: Words to Know**

Here are some key terms to know when working with the Local Government Investment Pool:

**EON** is PFMAM's proprietary web-based system to view accounts and perform transactions.

**Contacts** are people who need access (by phone, in writing, and/or through EON) to pool accounts or pool statements. Contacts may

**Purchases** or deposits are all credits to a pool account, including those initiated by an account's owner and its authorized agents, those initiated by another pool participant and its authorized agents, those initiated by approved third-party entities (*e.g.*, state agencies), and those initiated by Treasury and its authorized agents (*e.g.*, dividends).

**Redemptions** or withdrawals are all debits from a pool account, including those initiated by an account's owner and its authorized agents, and those initiated by Treasury and its authorized agents (*e.g.*, fees).

**Transfers** are transfers between pool accounts owned by the *same* participant.

**Participant to Participant Transfers (P2P)** are transfers between pool accounts owned by *different* participants.

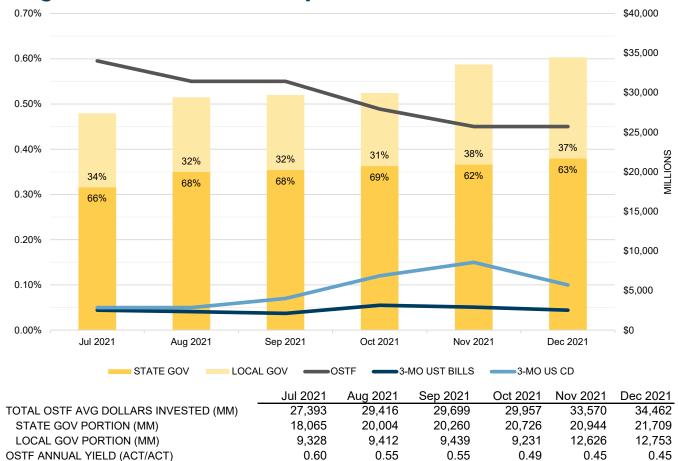

**Debt Payments** are redemptions or withdrawals *from* a pool account to a debt service paying agent via ACH and/or wire.

**State Payments** are redemptions or withdrawals *from* a pool account to a state agency via ACH.

**Dividends** represent interest paid on a pool account.

# **Oregon Short Term Fund Analysis**

NOTE: The OSTF ANNUAL YIELD represents the average annualized yield paid to participants during the month. Since interest accrues to accounts on a daily basis and the rate paid changes during the month, this average rate is not the exact rate earned by each account.
